UpdateDumps will provide you with actual Appian Senior Developer (ACD201) exam questions in pdf to help you crack the Appian ACD201 exam. So, it will be a great benefit for you. If you want to dedicate your free time to preparing for the Appian Senior Developer (ACD201) exam, you can check with the soft copy of pdf questions on your smart devices and study when you get time. On the other hand, if you want a hard copy, you can print Appian Senior Developer (ACD201) exam questions.

Appian ACD201 Exam Syllabus Topics:

Topic	Details
Topic 1	Advanced Appian Concepts: This section of the exam measures the skills of Solution Architects and covers creating and configuring authentication methods, setting up integration objects, designing APIs, evaluating smart services and plug-ins, and applying SSO mechanisms with SAML and LDAP.
Topic 2	Application Design and Development: This section of the exam measures the skills of Appian Developers and covers translating business requirements into user stories, building end-to-end applications, managing object security, applying design best practices, and ensuring user-centric experiences through proper UX design.

Topic 3	• Data Management: This section of the exam measures the skills of Solution Architects and covers designing and documenting data models, recommending record types for optimization and security, working with relational data, and implementing complex models with supporting objects.
Topic 4	• Performance and Scalability: This section of the exam measures the skills of Appian Developers and covers designing performant components, building memory-efficient models, conducting database load and automated testing, analyzing server memory and logs for risks, and resolving performance concerns for end users.

ACD201 Dumps Guide | ACD201 Mock Test

Our ACD201 test braindumps are carefully developed by experts in various fields, and the quality is trustworthy. What's more, after you purchase our products, we will update our ACD201 exam questions according to the new changes and then send them to you in time to ensure the comprehensiveness of learning materials. We also have data to prove that 99% of those who use our ACD201 Latest Exam torrent to prepare for the exam can successfully pass the exam and get ACD201 certification. As long as you decide to choose our ACD201 exam questions, you will have an opportunity to prove your abilities, so you can own more opportunities to embrace a better life.

Appian Senior Developer Sample Questions (Q29-Q34):

NEW QUESTION # 29

You need to connect to an external system using OAuth 2.0: SAML Bearer Assertion Flow authentication type, which requests access to an API on of a signed in user.

This standard has several steps involved with the SAML Bearer Assertion Flow.

Which two steps should you perform to connect to the external system? (Choose two.)

- A. Generate a service account key in third-party systems.
- **B. Register the connection in the third-party system**
- **C. Configure SAML for single sign-on (SSO).**
- D. Use an `authorizationLink()` on the relevant interface.

Answer: B,C

Explanation:

Configure SAML for single sign-on (SSO).

The bearer-assertion flow relies on an existing SAML SSO configuration so Appian can issue a signed SAML assertion on behalf of the signed-in user.

Register the connection in the third-party system.

You must register (or "trust") Appian's client/certificate with the external system so it will accept the SAML assertion and issue an OAuth 2.0 access-token for the user.

NEW QUESTION # 30

You need to allow external systems to invoke Appian web APIs.

Which user role should be assigned?

- A. System Administrator
- **B. Service Account**
- C. Application User

Answer: B

Explanation:

A Service Account user role is specifically designed for integrations, allowing external systems to securely authenticate and invoke Appian web APIs.

NEW QUESTION # 31

You're conducting a code review and notice that some accessibility features are missing on the interfaces. Which two UX best practices should be followed to align with accessibility requirements? (Choose two.)

- A. Use rich text items to act as headers for structuring interfaces.
- B. Indicate the hierarchy of sections with a heading tag in addition to label sizes (for example: "H1").
- C. Use a single rich text icon with "POSITIVE" or "NEGATIVE" styling to indicate statuses.
- D. Apply a label value for all fields when the label position is "Hidden".

Answer: B,D

Explanation:

Applying a label value for all fields, even when the label position is hidden, ensures screen readers and assistive technologies can interpret the field correctly.

Indicating the hierarchy of sections with heading tags improves navigation for users with assistive technologies, aligning with accessibility standards.

NEW QUESTION # 32

You need to add test cases to an existing expression rule in the system. Expression rule gives a complex data type value as an output result.

The test case should pass only when a field in the resultant data matches with a specific value mentioned.

How should you configure the test case assertion?

- A. Test completes without errors.
- B. Test output matches the asserted output.
- C. Assertion expression evaluates to True.

Answer: C

Explanation:

Configuring the test case assertion so that the assertion expression evaluates to True allows you to specifically check whether the desired field in the complex data type result matches the required value.

NEW QUESTION # 33

What are two advantages of database normalization? (Choose two.)

- A. Minimizing the number of tables that need to be created.
- B. Minimizing data redundancy.
- C. Enforcing data integrity.
- D. Simplifying query statements to read data.

Answer: B,C

Explanation:

Database normalization enforces data integrity by structuring data and relationships to prevent anomalies.

It minimizes data redundancy by ensuring each piece of information is stored only once, reducing duplication.

NEW QUESTION # 34

.....

If you don't prepare with real ACD201 questions, you fail, lose time and money. UpdateDumps product is specially designed to help you pass the exam on the first try. The study material is easy to use. You can choose from 3 different formats available according to your needs. The 3 formats are Appian ACD201 desktop practice test software, browser based practice exam, and PDF.
