EXAM CRAM NCLEX-PN PRACTICE QUESTIONS AND ANSWERS 2023

A+

the nurse is caring for a client scheduled for removal of a pituitary tumor using the transsphenoidal approach. the nurse should be particularly alert to:

- A. Nasal congestion
- B. Abdominal Tenderness
- C. Muscle Tetany
- D. Oliguria - Answer-A. Nasal congestion

why?

removal of the pituitary gland is usually done by transsphenoidal approach through the nose. Nasal congestion further interferes with the airway.

A client with cancer is admitted to the oncology unit. Stat lab values reveal Hgb 12.6, WBC 6500, K⁺1.9, uric acid 7.0, Na⁺136, and platelets 178,000. The nurse evaluates that the client is experiencing which of the following?

- A. Hyponatremia
- B. Hypokalemia
- C. Myelosuppression
- D. Leukocytosis - Answer-B. Hypokalemia

why?

Hypokalemia is evident from the lab values listed. The other laboratory findings are within normal limits, making answers A, C and D incorrect

A 24 year-old female client is scheduled for surgery in the morning. Which of the following is the primary responsibility of the nurse?

- A. taking the vital signs
- B. obtaining the permit
- C. explaining the procedure
- D. Checking the lab work - Answer-A. taking the vital signs

why?

the primary responsibility of the nurse is to take the vital signs before any surgery.

answers B, C and D are the responsibility of the doctor.

The nurse is working in the emergency room when a client arrives with severe burns of the left arm, hands, face, and neck. which action should receive priority?

Microsoft Dynamics 365: Finance and Operations Apps Developer exam test & MB-500 test training material

Welcome to iPassleader-the online website for providing you with the latest and valid Microsoft study material. Here you will find the updated study dumps and training pdf for your MB-500 certification. Our MB-500 practice torrent offers you the realistic and accurate simulations of the real test. The MB-500 Questions & answers are so valid and updated with detail explanations which make you easy to understand and master. The aim of our MB-500 practice torrent is to help you successfully pass.

How to Prepare For MB-500: Microsoft Dynamics 365: Finance and Operations Apps Developer Exam

Preparation Guide for MB-500: Microsoft Dynamics 365: Finance and Operations Apps Developer Exam

Introduction

Microsoft has created a track for developers who are knowledgeable in Finance and Operations apps in Microsoft Dynamics 365 landscape to get certified this platform. This certification program provides app developers a way to demonstrate their skills. The assessment is based on a rigorous exam using industry standard methodology to determine whether a candidate meets Microsoft's proficiency standards.

According to Microsoft, a MB-500 Certified Professional enables organizations to leverage customizing user interfaces, providing endpoints and APIs to support Power Platform apps and external systems, performing testing, monitoring performance, analyzing and manipulating data, creating technical designs and implementation details, and implementing permission policies and security requirements.

Certification is evidence of your skills, expertise in those areas in which you like to work. If candidate wants to work on Microsoft Azure for SAP Workloads and prove his knowledge, certification offered by Microsoft. This **MB-500 Exam** Certification helps a candidate to validates his skills in Microsoft Azure for SAP Workloads Technology.

In this guide, we will cover the MB-500: Microsoft Dynamics 365: Finance and Operations Apps Developer Certification exam, MB-500: Microsoft Dynamics 365: Finance and Operations Apps Developer Certified professional salary and all aspects of the MB-500: Microsoft Dynamics 365: Finance and Operations Apps Developer Certification.

Microsoft Dynamics 365 Finance and Operations Apps Developer certification is ideal for professionals who want to specialize in Finance and Operations apps development. Microsoft Dynamics 365: Finance and Operations Apps Developer certification demonstrates the candidate's proficiency in developing and customizing the Finance and Operations modules of Dynamics 365. MB-500 Exam covers various topics such as designing and developing customizations, creating and modifying workflows, and integrating with other applications.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q37-Q42):

NEW QUESTION # 37

A company uses Dynamics 365 Finance.

You must use QueryBuilder classes to implement a query that loops through all customers for whom the customer group equals EXT. You need to implement the query. You declare and initialize a query Object.

You need to run the query.

in which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions

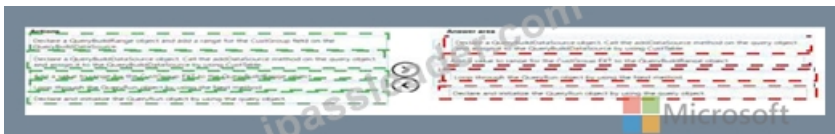

- 1. Declare a QueryBuilder object and add a range for the CustGroup field on the QueryBuilderDataSource.
- 2. Declare a QueryBuilderDataSource object. Call the addDataSource method on the query object and assign it to the QueryBuilderDataSource by using CustTable.
- 3. Add a value to range for the CustGroup EXT to the QueryBuilder object.
- 4. Loop through the QueryRun object by using the Next method.
- 5. Declare and initialize the QueryRun object.

NEW QUESTION # 38

You are a Dynamics 365 Finance and Operations developer.

You have a report in an existing model that connects with the following objects:

in-memory table

data provider class

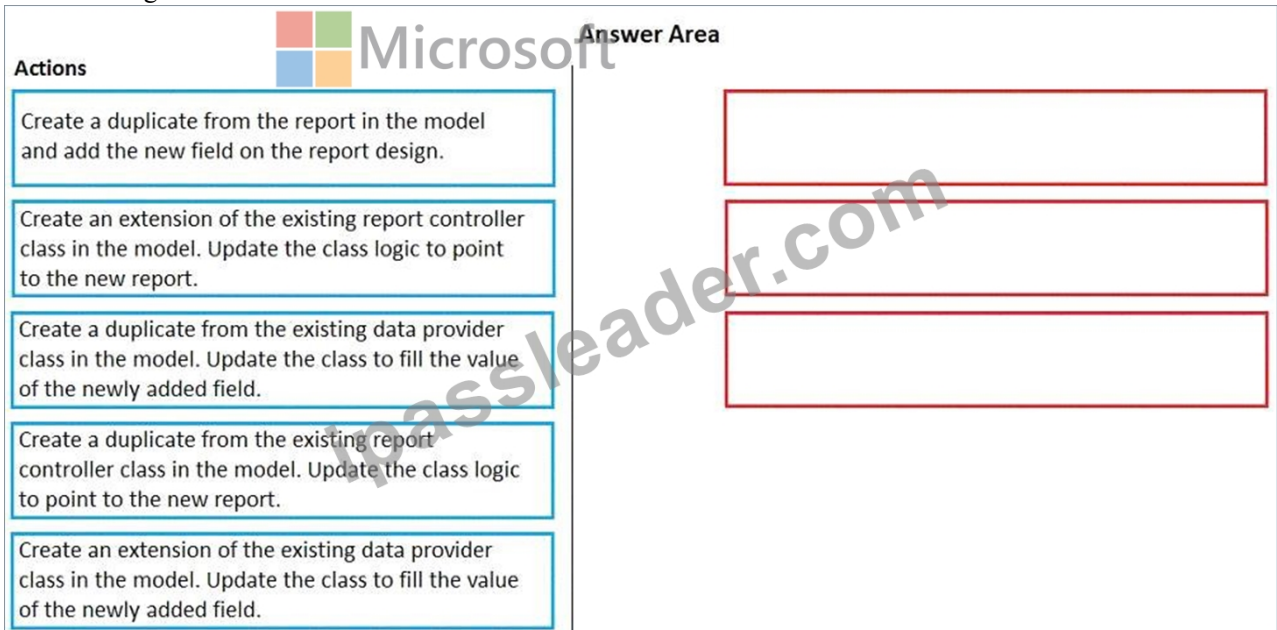

controller class

contract class

The report is locked for modifications.

You need to create an extension of the in-memory table in a model and you add the new field to the extension.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Actions

- Create a duplicate from the report in the model and add the new field on the report design.
- Create an extension of the existing report controller class in the model. Update the class logic to point to the new report.
- Create a duplicate from the existing data provider class in the model. Update the class to fill the value of the newly added field.
- Create a duplicate from the existing report controller class in the model. Update the class logic to point to the new report.
- Create an extension of the existing data provider class in the model. Update the class to fill the value of the newly added field.

Answer Area

- Create a duplicate from the report in the model and add the new field on the report design.
- Create a duplicate from the existing data provider class in the model. Update the class to fill the value of the newly added field.
- Create an extension of the existing report controller class in the model. Update the class logic to point to the new report.

Microsoft

Explanation

Microsoft

- Create a duplicate from the report in the model and add the new field on the report design.
- Create an extension of the existing data provider class in the model. Update the class to fill the value of the newly added field.
- Create an extension of the existing report controller class in the model. Update the class logic to point to the new report.

NEW QUESTION # 39

You are a Dynamics 365 Finance developer.

You need configure table caching.

Which CacheLookup properties should you use? To answer, drag the CacheLookup properties to the correct table. Each property may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

CacheLookup properties

- EntireTable
- NotInTTS
- Found
- FoundAndEmpty

Answer Area

Table type	CacheLookup property
Parameters	
Transaction	
Master data	
Region specific master data

NEW QUESTION # 40

You need to implement the integration for the Vendor Exclusion List form.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Element	Option
Element to add to project	▼ Table extension Data Entity View Query
Key type to create	▼ Unique key Foreign key
Action to perform	▼ Build the project. Build and synchronize the database. Build the solution.

Answer:

Explanation:

Element **Option**

Element to add to project

Key type to create

Action to perform

Table extension

Data Entity

View

Query

Unique key

Foreign key

Build the project.

Build and synchronize the database.

Build the solution.

Explanation:

Box 1: Table extension

Isolate all new vendor exclusion codes as a new assembly by creating a table named VendExclusions.

Implement the Excel integration for the Vendor Exclusion List form.

The table extension object allows you to add additional fields or to change some properties on a table provided by the Dynamics 365 Business Central service. In this way, you can add data to the same table and treat it as a single table.

Box 2: Unique key

Create an index for the table named PrimaryIdx that uses the following fields: CustAccount, ItemId, VendAccount.

Box 3: Build and synchronize the database.

A project property lets you specify that the synchronize operation for the database should be performed every time that you build the project. This can be useful when you're making changes to the table structure for an application. Each time that you build, you will know that the database is synchronized with the tables as they are defined in the project.

NEW QUESTION # 41

A company plans to deploy Dynamics 365 Unified Operations.

You need to recommend deployment options for the company.

What should you recommend? To answer, drag the appropriate deployment options to the correct application requirement. Each deployment option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer Area

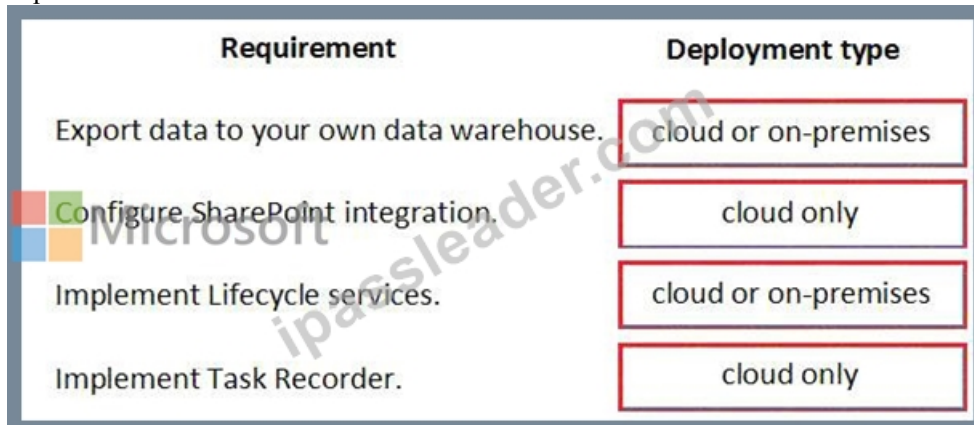

Deployment types	Requirement	Deployment type
cloud only	Export data to your own data warehouse.	
on-premises only	Configure SharePoint integration.	
cloud or on-premises	Implement Lifecycle services.	
	Implement Task Recorder.
