

Trustable Instant 300-535 Access | Easy To Study and Pass Exam at first attempt & The Best 300-535: Automating and Programming Cisco Collaboration Solutions

Q Ortho NCLEX Questions Study online at: https://liquidet.com/_282ah6	
vegetables, pasta, broccoli C. Green vegetables, sardines, salmon with bone, molasses D. Fresh fruits, English muffins, black beans, asparagus	as fresh fruits, English muffins, black beans, and asparagus are inadequate in calcium.
3. A patient with osteoporosis has been advised to increase the amount of calcium in her diet. Which food provides the most calcium? An 8- oz glass of milk An ounce of cheddar cheese A half cup of raw broccoli A 4- ounce salmon croquette	Answer A is correct. An 8-ounce glass of milk contains 290mg of calcium. Answers B, C, and D contain lesser amounts; therefore, they are incorrect. (Note: An ounce of cheddar cheese contains 205 mg of calcium; half a cup of raw broccoli contains 175mg of calcium; and 4 ounces of salmon croquette contains 165 mg of calcium).
4. Which of the following instructions should be included for the patient taking calcium supplements? A.The patient should take her calcium with meals B.The patient should take all her daily calcium supplements at one time C.The patient should take her calcium supplement after meals to prevent stomach upset D.The patient can use calcium-based antacids for supplement.	Rationale: Answer D is correct. Many people prefer to supplement their calcium intake with calcium-based antacids. If calcium supplements are used, they should be administered 30 minutes before meals to maximize absorption, so answer A is wrong. Calcium absorption is better if it is administered throughout the day rather than in a single dose, making answer B wrong. Calcium supplements do not cause stomach upset, so answer C is wrong.

Frankly speaking, it is difficult to get the 300-535 certificate without help. Usually, the time you invest to prepare the exam is long. Now, all of your worries can be wiped out because of our 300-535 exam questions. Some people worry about that some difficult knowledge is hard to understand or the 300-535 test guide is not suitable for them. Actually, the difficult parts of the exam have been simplified, which will be easy for you to understand. Also, there will be examples, simulations and charts to make explanations vivid. In order to aid you to memorize the Automating and Programming Cisco Collaboration Solutions exam cram better, we have integrated knowledge structure. You will clearly know what you are learning and which part you need to learn carefully. You will regret if you give up challenging yourself.

The Key Exam Profile

Cisco 300-535 SPAUTO is the most viable way to get a professional-level understanding of programming concepts, automation tools, and programming OS, as well as orchestration. To excel in it, the candidates will be asked to tackle questions of different types during a total time duration of 90 minutes.

The exam is available in English only and can be taken via a testing center or online proctoring facility. The cost per attempt is \$300. The score details are not revealed by the vendor, so aim to answer as many items as you can. Finally, the results you obtain will

remain valid for three years.

Ace Your Exam Preparation with TestValid 300-535 Practice Test

Solutions is one of the top platforms that has been helping 300-535 exam candidates for many years. Over this long time period countless candidates have passed their dream Automating and Programming Cisco Collaboration Solutions exam. The 300-535 exam questions are designed by experience and qualified Automating and Programming Cisco Collaboration Solutions expert. The TestValid 300-535 Exam Questions will not only assist you in 300-535 exam preparation but also give you sight knowledge about the Automating and Programming Cisco Collaboration Solutions (300-535) exam topics that will help you in your professional career.

Cisco Automating and Programming Cisco Collaboration Solutions Sample Questions (Q75-Q80):

NEW QUESTION # 75

Which of the following three statements are correct regarding IPv6 QoS? (Choose three.)

- A. The traffic class field in the IPv6 header can be used to set specific precedence or DSCP values.
- B. Per-hop behavior in IPv6 networks is based on EXP bits.
- C. IPv6 QoS features are configured using the modular QoS CLI on Cisco routers.
- D. A 20-bit flow label field enables per-flow processing.
- E. DS-TE is not supported by IPv6.

Answer: A,C,D

Explanation:

http://www.cisco.com/en/US/technologies/tk648/tk872/technologies_white_paper0900aecd8026004d.pdf Cisco Systems. IPv6 QoS AT-A-GLANCE RFC 2460/3697 Currently IPv6 provides support for QoS marking via a field in the IPv6 header.

Similar to the type of service (ToS) field in the IPv4 header, the traffic class field (8 bits) is available for use by originating nodes and for forwarding routers to identify and distinguish between different classes or priorities of IPv6 packets.

Figure 1

The traffic class field may be used to set specific precedence or differentiated services code point (DSCP) values. These values are used in the exact same way as in IPv4

The key advantages with the flow label is that the transit routers do not have to open the inner packet to identify the flow, which aids with identification of the flow when using encryption and other scenarios.

Current Cisco IOS Software support for IPv6 QoS includes:

Packet classification

Queuing (includes LLQ; excludes legacy PQ/CQ)

Traffic shaping

WRED

IPv6 also has a 20-bit field known as the flow label field (RFC 3697). The flow label enables per flow processing for differentiation at the IP layer.

It can be used for special sender requests and is set by the source node.

The flow label must be modified by an intermediate node.

Planned Cisco IOS Software support for IPv6 QoS includes:

Compressed Real-Time Protocol (cRTP)

Network-based application recognition (NBAR)

Committed access rate (CAR)

NEW QUESTION # 76

Refer to the exhibit. Cisco NSO uses the Bandwidth on Demand application in Cisco WAE Automation Server to find a path for the SR policies that are being delegated in the network.

Based on the data that is collected from the network, the average utilization of the links is around 20%. When a network operator initiates a new service instance in Cisco NSO that requires around 10% of available bandwidth, Cisco WAE cannot find a path in the network. How should a network operator solve the problem?

```
1 admin@wae# show running-config wae components bw-on-demand
2 wae components bw-on-demand config xtc-agents [xtc1 ]
3 wae components bw-on-demand config enable true
4 wae components bw-on-demand config util-threshold 10.0
5
6 admin@wae# show running-config wae components bw-opt
7 wae components bw-opt config xtc-agents [ xtc1 ]
8 wae components bw-opt config enable false
9 wae components bw-opt config util-threshold 20.0
10 wae components bw-opt config del-lsp true
11 wae components bw-opt config advanced fix-lsp-duration 120
12
13 admin@wae# show running-config wae components wmd config
14 wae components wmd config network-name sr_dare
15 wae components wmd config enable true
16
17 admin@wae# show wae agents xtc xtc status
18 wae agents xtc xtc xtc1
19 status topology-nodes connecting false
20 status topology-nodes connected true
21 status topology-nodes processing false
22 status topology-nodes valid true
23 status topology-nodes reports 4
24 status topology-nodes data-received 0.11
25 status topology-nodes paused false
```

- A. Enable the Bandwidth Optimization application to perform network bandwidth optimization.
- B. Enable XTC to process the data that is received from the network.
- C. Increase the threshold in the bw-on-demand configuration to be more than 30%.
- D. Disable the WMD component, which prevents using the near real-time network model.

Answer: C

Explanation:

The util-threshold in the bw-on-demand configuration is currently set to 10.0, which means paths will only be considered if link utilization is below 10%. Since the average utilization is around 20%, no suitable path is found. Increasing the threshold to above 20% allows Cisco WAE to consider paths with higher utilization, enabling path selection for the new service instance.

NEW QUESTION # 77

After a configuration request is sent using NETCONF, which call releases any locks and resources associated with the session?

- A. <close-session>

- B. <boot-app>
- C. <exit-operation>
- D. <close-activity>

Answer: A

NEW QUESTION # 78

An engineer needs to update the configuration on a Cisco 3850 switch. To execute this change, RESTCONF must be used. Which two operations must the engineer use that are covered by NETCONF <edit-config>? (Choose two.)

- **A. PUT**
- B. HEAD
- C. GIVE
- **D. POST**
- E. GET

Answer: A,D

Explanation:

POST is used in RESTCONF to create new resources, similar to how <edit-config> in NETCONF creates or updates configuration data.

PUT is used in RESTCONF to update or replace existing resources, which also aligns with NETCONF <edit-config> operations for updating configuration.

NEW QUESTION # 79

An engineer needs to configure network devices in an automated way. Which two ways are used to create structured data using YANG to provide REST-like APIs to enable programmability access? (Choose two.)

- A. JSON-RPC
- **B. JSON**
- **C. XML**
- D. YAML
- E. GPB

Answer: B,C

Explanation:

Section: 3.0 Network Device Programmability

Explanation/Reference: https://www.cisco.com/c/en/us/td/docs/ios-xml/ios/prog/configuration/166/b_166_programmability_cg/restconf_prog_int.pdf

NEW QUESTION # 80

.....

It can almost be said that you can pass the 300-535 exam only if you choose our 300-535 exam braindumps. Our 300-535 study materials will provide everything we can do to you. Only should you move the mouse to buy it can you enjoy our full range of thoughtful services. Having said that, why not give our 300-535 Preparation materials a try instead of spending a lot of time and effort doing something that you may be not good at? Just give it to us and you will succeed easily.
