As long as you face problems with the PL-200 exam, our company is confident to help you solve. Give our PL-200 practice quiz a choice is to give you a chance to succeed. We are very willing to go hand in hand with you on the way to preparing for PL-200 Exam. And we have three different versions of our PL-200 learning materials, you will find that it is so interesting and funny to study with our study guide.

Microsoft Power Platform consists of four main components: Power Apps, Power Automate, Power BI, and Power Virtual Agents. The PL-200 exam covers all these components, and it evaluates the candidate's ability to use them to design, build, and deploy solutions that meet the business requirements. PL-200 Exam also assesses the candidate's knowledge of the Power Platform's security and administration features and their ability to integrate the Power Platform with other Microsoft products and services.

PL-200 Prep Guide, Exam PL-200 Topic

Dear candidates, have you thought to participate in any Microsoft PL-200 exam training courses? In fact, you can take steps to pass the certification. ActualTestsIT Microsoft PL-200 Exam Training materials bear with a large number of the exam questions you need, which is a good choice. The training materials can help you pass the certification.

Career Opportunities

The Microsoft PL-200 exam gives the essential skills required for a wide range of IT roles. On that note, passing this test will help one make an important first step towards attaining the technical jobs listed below:

- Functional consultant
- Business analyst
- Developer

In addition, in case the individual chooses any of the above-mentioned specific certificates, the job positions in the fields of sales, marketing, customer service, etc. become available.

Microsoft PL-200 exam is divided into several sections, covering a range of topics such as the fundamentals of Power Platform, configuring Power Apps, creating Power Automate workflows, and designing Power BI reports. PL-200 Exam also evaluates the candidate's ability to integrate Power Platform with other Microsoft and third-party applications. Passing the Microsoft PL-200 exam demonstrates that the candidate has the skills and knowledge necessary to help organizations achieve their digital transformation goals by leveraging the capabilities of Microsoft Power Platform.

Microsoft Power Platform Functional Consultant Sample Questions (Q257-Q262):

NEW QUESTION # 257

A company is configuring a Power Apps portal using Microsoft Dataverse.

The company requires the following:

Only authenticated users must be able to sign into the portal.

Authenticated users must have varying degrees of access to the different parts of the portal.

Users must enter one of several external identities when creating an account during the open registration process.

You need to configure user authentication and permissions.

Which component should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Contact table record

In Power Apps portals, each authenticated portal user is associated with a contact record in Microsoft Dataverse.

Box 2: Web roles

Portal users must be assigned to web roles to gain permissions beyond unauthenticated users.

NEW QUESTION # 258
You are using a development environment to add a new column to a system table. You plan to move the changes to a test environment they are complete.
The changes must meet the following requirements:
* Must be clearly identified so that they are not confused with system components and components from other solutions.
* Must not affect any existing components in the test environment.
You need to prepare a solution for deployment to the test environment.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Step 1: Create a new publisher
Solution publisher
Every app and other solution components such as entities you create or any customization you make is part of a solution. Because every solution has a publisher, you should create your own publisher rather than use the default. You specify the publisher when you create a solution.
Step 2: Create a new unmanaged solution and select the correct publisher unmanaged solution Unmanaged solutions are used in development environments while you make changes to your application.
Unmanaged solutions can be exported either as unmanaged or managed. Exported unmanaged versions of your solutions should be checked into your source control system. Unmanaged solutions should be considered your source for Microsoft Power Platform assets. When an unmanaged solution is deleted, only the solution container of any customizations included in it is deleted. All the unmanaged customizations remain in effect and belong to the default solution.
Step 3: Add the table top the solution and add the new column.
Step 4: Run the solution checker on the solution
Use solution checker to validate your model-driven apps in Power Apps.

NEW QUESTION # 260

You are using power Automate to create a list of customers from a Microsoft Excel file, The list must contain customers who meet one of the following criteria:

* Sales of less than $500,000.

* Customers who are on credit hold.

You need to create a condition to filter the list Of customers.

How should you complete the filter condition? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point
Answer:

Explanation:

Explanation
Graphical user interface, application, Word Description automatically generated

Box 1: or
Or: Takes two arguments and returns true if either argument is true.
Box 2: equals(item()?['credithold'],'true')
Equals: Returns true if two values are equal.
For example, if parameter1 is someValue, this expression returns true:
equals(parameters('parameter1'), 'someValue')
Reference:
