Our Huawei H13-624_V5.5 Practice Exam software is compatible with Windows computers. If you run into any issues while using our HCIP-Storage V5.5 (H13-624_V5.5) exam simulation software, our 24/7 product support team is here to help you. One of our H13-624_V5.5 desktop practice exam software's other feature is that it can be used even without an active internet connection. The Internet is only required for product license validation. This feature allows users to practice without an active internet connection.

Huawei H13-624_V5.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Huawei Intelligent Storage Products and Features: This section of the exam measures the skills of a Storage Administrator and focuses on Huawei's intelligent storage solutions. It includes understanding product models, management interfaces, and advanced features like storage tuning and data protection. Candidates will explore how to manage system operations, optimize resource usage, and apply Huawei-specific technologies for secure and high-performance storage deployment.
Topic 2	<ul style="list-style-type: none">• Basic Storage Technologies: This section of the exam measures the skills of a Storage Engineer and includes fundamental knowledge of storage systems. It covers key concepts such as intelligent storage architecture, RAID levels, storage networking, and widely used data protocols. The section also introduces the structure and function of SAN and NAS environments. A strong grasp of these basic technologies helps professionals support large-scale data infrastructure with efficiency and stability.
Topic 3	<ul style="list-style-type: none">• Storage System O&M Management: This section of the exam measures the skills of a Storage Operations Specialist and covers the daily operational management of Huawei storage systems. It emphasizes practical abilities in system monitoring, troubleshooting, fault handling, and health checks. The goal is to ensure smooth, reliable operations and reduce risks through proactive maintenance and efficient use of Huawei's O&M tools.

Topic 4	<ul style="list-style-type: none"> Storage Technology Trends: This section of the exam measures skills of a Data Center Specialist and covers the latest advancements in the storage industry. It focuses on emerging technologies that are shaping intelligent storage development, including trends like AI integration, green computing, and cloud-oriented storage evolution. Candidates are expected to understand how these trends influence storage planning and deployment in modern IT environments.

If you encounter any questions about our H13-624_V5.5 learning materials during use, you can contact our staff and we will be happy to serve for you. Maybe you will ask if we will charge an extra service fee. We assure you that we are committed to providing you with guidance on H13-624_V5.5 quiz torrent, but all services are free of charge. As for any of your suggestions, we will take it into consideration, and effectively improve our H13-624_V5.5 Exam Question to better meet the needs of clients. In the process of your study, we have always been behind you and are your solid backing. This will ensure that once you have any questions you can get help in a timely manner.

Huawei HCIP-Storage V5.5 Sample Questions (Q91-Q96):

NEW QUESTION # 91

Multiple choices, which of the following descriptions of the Huawei Oceanstor 9000 product system is correct? (multiple choices)

- A. MDS service is responsible for managing the metadata of the file system
- B. system are responsible for providing MDS services, and some nodes are responsible for providing DS services
- C. CMS service is responsible for device management of the physical nodes of the cluster Some nodes in
- D. DS service is responsible for storing the file data of the system, but not the storage of metadata

Answer: A,C

NEW QUESTION # 92

Regarding the characteristics of a single file system in Huawei distributed storage, which of the following option descriptions are correct ()

- A. When accessing a single file system, users need to pay attention to the specific data storage location
- B. The system provides a unified file system for accessing all available space
- C. In a single file system, file collections are presented as directories
- D. Automatically create a unified file system when the system starts

Answer: A,B,C,D

NEW QUESTION # 93

(multiple choice) The basic principles of daily maintenance of big data storage systems include:

- A. Develop a reliable backup plan
- B. Use the resources and software provided by the original manufacturer
- C. Reserve spare parts on site for timely replacement in case of failure

Answer: A,B,C

NEW QUESTION # 94

The basic principles of daily maintenance of the multi-choice big data storage system include: (multi-choice)

- A. Develop a reliable backup plan
- B. Use the resources and software provided by the original manufacturer

- Answer: A,B,C**

- A. Parallel deduplication
- B. Global deduplication
- C. Target end deduplication
- D. Source end deduplication
