

Trusting Authorized NCP-DB New Dumps Pdf in ExamBoosts Is The Valid Way to Pass Nutanix Certified Professional - Database Automation (NCP-DB) v6.5

P.S. Free & New NCP-DB dumps are available on Google Drive shared by ExamBoosts: https://drive.google.com/open?id=1Y4q2NVFU-JCu_ngWw5KjfGCY0ftdUGFo

Our NCP-DB study tools not only provide all candidates with high pass rate NCP-DB study materials, but also provide them with good service. If you have some question or doubt about us or our products, you can contact us to solve it. The thoughtfulness of our NCP-DB study guide services is insuperable. What we do surly contribute to the success of NCP-DB practice materials. Therefore, the NCP-DB practice materials can give users more advantages in the future job search, so that users can stand out in the fierce competition and become the best.

Nutanix NCP-DB Exam Syllabus Topics:

Topic	Details
Topic 1	Protect NDB-managed Databases Using Time Machine: SLA retention policies, source databases, clones, protection of databases, and Data Access Management (DAM) policies are discussed in this topic.
Topic 2	Operate and Maintain an NDB Environment: Application of procedural concepts to register database server, provision databases, and test and publish database patches. Additionally, the topic explains the right method to apply Linux OS patches. Lastly, it delves into databases and troubleshooting of NDB operations.
Topic 3	Monitor Alerts and Storage Usage Within an NDB Implementation: It is all about monitoring alerts and management of storage usage.

100% Pass 2025 High Pass-Rate Nutanix NCP-DB: Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 New Dumps Pdf

Individuals who work with Nutanix affiliations contribute the greater part of their energy working in their work spaces straightforwardly following accomplishing Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 certification. They don't get a lot of opportunity to spend on different exercises and regarding the Nutanix NCP-DB Dumps, they need assistance to scrutinize accessible.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 Sample Questions (Q75-Q80):

NEW QUESTION # 75

An administrator is tasked with auditing NDB SLAs. What data will the administrator be reviewing?

- A. Recovery Time Objective
- **B. Data retention policies**
- C. Snapshot schedules
- D. Clone Management

Answer: B

NEW QUESTION # 76

Which file type must be downloaded from the Nutanix Portal for NDB deployment?

- A. TAR
- B. QCOW2
- **C. OVA**
- D. ZIP

Answer: C

Explanation:

For deploying Nutanix Database Service (NDB), the required file type to download from the Nutanix Portal is an OVA (Open Virtual Appliance) file. The OVA format is a standardized package that includes a pre-configured virtual machine image, including the NDB software, which can be imported into supported hypervisors (e.g., VMware ESXi or Nutanix AHV). This simplifies the deployment process by providing a ready-to-use VM template with all necessary components.

* Option A (ZIP) is incorrect as ZIP files are generic archives, not deployment-specific formats for NDB.

* Option B (QCOW2) is incorrect because QCOW2 is a disk image format primarily used with KVM /QEMU, not the standard for NDB deployment.

* Option C (OVA) is correct as it is the official file type provided by Nutanix for NDB deployment.

* Option D (TAR) is incorrect as TAR files are used for archiving, not as a deployment package for NDB.

Administrators should download the OVA from the Nutanix Portal and follow the deployment guide.

NEW QUESTION # 77

In an Oracle upgrade scenario using Era, if the source database is on a non-Nutanix platform, is it possible to upgrade it with an Era workflow?

- A. Yes, only if the non-Nutanix platform is little-endian platform
- **B. No, the database instance must be Era managed to be upgraded**
- C. Yes, it is possible to upgrade database instance on a non-Nutanix platform
- D. Yes, only if the non-Nutanix platform is big-endian platform

Answer: B

Explanation:

According to the Nutanix Database Automation (NCP-DB) learning documents, Nutanix Era is a database management tool that automates and simplifies database operations, including provisioning, patching, upgrading, and more¹. However, for a database to be managed by Era, it must be registered with Era¹. This means that if a database is on a non-Nutanix platform, it cannot be directly upgraded using an Era workflow. It must first be migrated to a Nutanix platform and registered with Era before it can be managed and upgraded using Era¹.

NEW QUESTION # 78

When performing a SQL Server Restore Source Database operation, what is a valid reason an administrator would choose the Restore Location as New Location?

- A. The log files are needed to perform the point in time restore.
- B. The database files are on a disk with other database files and the administrator wants to get the database restored as quickly as possible.
- C. The administrator wants to keep the original schema in place.
- D. The administrator wants to restore to a new location and have Era apply Nutanix best practices.

Answer: D

Explanation:

When performing a SQL Server Restore Source Database operation in Nutanix Database Automation (NCP-DB), an administrator might choose the Restore Location as New Location if they want to restore to a new location and have Era apply Nutanix best practices¹. This is because Nutanix Era automates and simplifies database management, allowing the administrator to manage databases at scale, and it applies Nutanix best practices during the restore process¹. This ensures optimal performance and reliability of the restored database¹.

NEW QUESTION # 79

What are two supported entities that metadata tags can be applied to? (Choose two.)

- A. Databases
- B. Snapshots
- C. SLAs
- D. Clones

Answer: A,D

Explanation:

According to the Nutanix Database Automation (NCP-DB) learning documents, metadata tags can be applied to various entities in Nutanix Era for better database inventory management¹. Among the options provided, Databases and Clones are two entities that support metadata tags¹. These tags can be used to categorize, search, and manage these entities more effectively¹. Please note that the information might be available in the Nutanix Database Automation (NCP-DB) course materials or in the Nutanix Era documentation.

NEW QUESTION # 80

.....

Now rest assured that with the Nutanix NCP-DB exam questions you will get the updated version of NCP-DB exam real questions all the time. You have the option to download updated Nutanix NCP-DB Exam Questions up to 12 months from the date of Nutanix NCP-DB exam questions purchase.
