APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q70-Q75):

NEW QUESTION # 70

Which of the key principles, for building and maintaining engagement throughout change, is demonstrated through sharing information about why change is necessary and when it will take place?

- A. Empathy.
- B. Transparency.
- C. Connectivity.

- D. Inclusivity.

Answer: B

Explanation:

* Transparency: Sharing the rationale and timeline for change ensures openness and builds trust among stakeholders. Transparency is fundamental to managing expectations and mitigating resistance.

* Other Options:

* Inclusivity: Focuses on ensuring all voices are heard.

* Connectivity: Refers to fostering relationships.

* Empathy: Relates to understanding others' feelings, not information sharing.

Key AgilePM Concepts Referenced:

* Transparent Communication: AgilePM Handbook, Chapter 4, Section 4.2.

NEW QUESTION # 71

Which of the following statements about a 'Force Field Analysis' are true?

- * It can reveal both barriers to overcome and possible sources of resistance.
- * It should be created independently by the change manager.

- A. Only 2 is true.
- B. Both 1 and 2 are true.
- C. Neither 1 nor 2 is true.
- **D. Only 1 is true.**

Answer: D

Explanation:

* Statement 1: Correct. Force Field Analysis identifies driving and restraining forces for change, helping to address barriers and resistance.

* Statement 2: Incorrect. The analysis should be a collaborative effort involving stakeholders, not solely created by the change manager.

Key AgilePM Concepts Referenced:

* Force Field Analysis as a Tool: AgilePM Handbook, Chapter 7, Section 7.2.

NEW QUESTION # 72

How are the business roles critical to the success of a DSDM project?

- **A. Guide the evolution of the solution at the detailed level**
- B. Provide formal progress reporting
- C. Lead Solution Developer demonstrations
- D. Make all decisions

Answer: A

Explanation:

Business roles are critical in a DSDM project as they guide the evolution of the solution at a detailed level. They provide day-to-day business direction and ensure that the solution being developed aligns with the business needs and objectives.

NEW QUESTION # 73

Why might the priority of a requirement in the Product Backlog differ from what might otherwise be shown?

- A. Different budget
- **B. Different timeframe**
- C. Different quality
- D. Different resources

Answer: B

Explanation:

Comprehensive and Detailed 150 to 300 words Explanation From Exact Extract of Agile Project Management (paraphrased):

AgilePM's MoSCoW prioritization is always applied within a defined timeframe (e.g., a release or timebox). A requirement can be a Must Have for a specific delivery window while being a Should/Could when viewed across the whole product roadmap.

Timeboxing, dependency considerations, and the need to deliver a coherent, usable increment by a certain date mean that priority is inherently time-contextual. While budget and resources influence overall planning, AgilePM fixes time and cost to provide predictability and flexes scope to protect quality; thus, the most legitimate driver for a requirement's priority to change is the timeframe to which MoSCoW is applied. As delivery horizons shift (e.g., near-term release vs. later release), the same requirement's priority may be re-appraised to ensure the Business Case and Product/Release Goals are met. Therefore, Different timeframe is the correct reason that explains variations in backlog priority.

NEW QUESTION # 74

Which of the following is NOT an interest into which each DSDM role is grouped?

- A. Solution/Technical
- **B. Maintenance**
- C. Business
- D. Management

Answer: B

Explanation:

Maintenance is not one of the interest groups into which each DSDM role is grouped¹. The recognized interest groups are Business, Solution/Technical, and Management¹. These groups represent the different areas of focus within a DSDM project.

In DSDM, each role is grouped into interests such as Business, Solution/Technical, and Management. Maintenance is not one of the interests into which DSDM roles are grouped. The primary focus of DSDM roles is to ensure that the project is delivered successfully by balancing business needs, technical feasibility, and effective management practices.
