

# Trustworthy Analytics-DA-201 Accurate Answers & Latest Updated Analytics-DA-201 Exams Collection & High Pass-Rate Salesforce Salesforce Certified Tableau Data Analyst

Our cancellation policy allows you to cancel up to 24 hours before the scheduled time and you will receive a full refund.

P.S. Free & New Analytics-DA-201 dumps are available on Google Drive shared by TestInsides: <https://drive.google.com/open?id=1IJFyqEEooFrYd9u9UfpVJ9uyjmP51NZT>

Believe in yourself, choosing the Analytics-DA-201 study guide is the wisest decision. So far, the Analytics-DA-201 practice materials have almost covered all the official test of useful Analytics-DA-201 exam materials, before our products on the Internet, all the Analytics-DA-201 study materials are subject to rigorous expert review, so you do not have to worry about quality problems of our latest Analytics-DA-201 Exam Torrent, focus on the review pass the Analytics-DA-201 qualification exam. I believe that through these careful preparation, you will be able to pass the exam.

## Salesforce Analytics-DA-201 Exam Syllabus Topics:

| Topic   | Details  |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"><li>ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.</li></ul>                            |
| Topic 2 | <ul style="list-style-type: none"><li>Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S</li><li>4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices.</li></ul>                                    |
| Topic 3 | <ul style="list-style-type: none"><li>SAP Clean Core Extensibility and ABAP Cloud: This part of the exam targets the SAP S</li><li>4HANA Technical Consultant and covers concepts of clean core extensibility using ABAP in the cloud. The focus is on in-app and side-by-side extensibility techniques, ensuring that custom code complies with cloud-readiness principles and does not compromise the upgrade stability of core systems.</li></ul> |
| Topic 4 | <ul style="list-style-type: none"><li>ABAP Core Data Services and Data Modeling: This section of the exam measures the skills of the SAP ABAP Cloud Developer and covers the fundamental understanding of core data services (CDS) and how to design data models in the SAP ABAP environment. Candidates are expected to know how to define, consume, and optimize CDS views effectively to support application development in the cloud.</li></ul>  |

## Real Salesforce Analytics-DA-201 Questions - Tips And Tricks To Pass Exam

As mentioned earlier, TestInsides solves all problems that you face while locating updated Salesforce Certified Tableau Data Analyst (Analytics-DA-201) exam questions. We know that as an applicant for the test, you have excessive pressure to pass the Salesforce Certification Exam. TestInsides is here to help you earn the highly sought-after Salesforce Certified Tableau Data Analyst (Analytics-DA-201) certification on the first attempt. Don't wait to get help from our Salesforce Analytics-DA-201 real exam dumps to crack the test quickly. You can better comprehend TestInsides's Salesforce Certified Tableau Data Analyst (Analytics-DA-201) exam questions if you know about the three formats described here.

### Salesforce Certified Tableau Data Analyst Sample Questions (Q58-Q63):

#### NEW QUESTION # 58

A Data Analyst has created a Tableau Prep flow that is ready to be used. The output will be used by a colleague to build a dashboard on Tableau Cloud or Tableau Server.

Where should the analyst output the data to?

- A. Salesforce Data Cloud
- **B. A published data source**
- C. CRM Analytics
- D. A Tableau data extract file

**Answer: B**

#### NEW QUESTION # 59

You have a line chart on a worksheet.

You want to add a comment to March 2020 as shown in the following visualization.

What should you do?

- A. Add a tooltip
- B. Enable captions
- C. Drag the growth rate to Text on the Marks card
- **D. Annotate March 2020**

**Answer: D**

Explanation:

To add a comment to March 2020 on a line chart, you need to annotate that mark. You can right-click on the mark and select Annotate > Mark from the menu. This will open a dialog box where you can type your comment and format it as you like. You can also drag and drop the annotation to position it on the worksheet.

Dragging the growth rate to Text on the Marks card will add a label to every mark on the line chart, enabling captions will show a description of the worksheet at the bottom, and adding a tooltip will show a text box when users hover over a mark. References:

[https://help.tableau.com/current/pro/desktop/en-us/formatting\\_annotations.htm](https://help.tableau.com/current/pro/desktop/en-us/formatting_annotations.htm)

[https://help.tableau.com/current/pro/desktop/en-us/formatting\\_annotations\\_create.htm](https://help.tableau.com/current/pro/desktop/en-us/formatting_annotations_create.htm)

To add a comment to a specific point on a line chart, such as March 2020 in the provided visualization, you would use the 'Annotate' feature. Right-clicking on the data point for March 2020 and selecting 'Annotate' allows you to add a text annotation directly to the chart, which can be used to highlight and comment on that particular data point.

#### NEW QUESTION # 60

You have a sales dataset that contains the following fields.

| Field name      | Data type      |
|-----------------|----------------|
| Order Date      | Date           |
| Quantity        | Whole number   |
| Revenue         | Decimal number |
| Product Name    | Text           |
| Customer Region | Geographical   |

You need to analyze the average revenue per product in different regions over time.  
Which two fields should be measures? Choose two.

- A. Order Date
- **B. Revenue**
- C. Product Name
- D. Customer Region
- **E. Quantity**

**Answer: B,E**

Explanation:

To analyze the average revenue per product in different regions over time, you need to use two fields that contain numeric, quantitative values that you can measure and aggregate. Quantity and Revenue are both measures that fit this criterion. You can multiply Quantity and Revenue to get the total sales for each product, and then divide by the number of products to get the average revenue. You can also use these measures to create charts and tables that show the trends and comparisons over time and across regions. References:

### NEW QUESTION # 61

A Data Analyst is given the following table and asked to create a flow that adds a date field to the data. This field should automatically update as new dates (months) are added to the original table.

| Region  | Sales Jan-24 | Sales Feb-24 | Sales Mar-24 |
|---------|--------------|--------------|--------------|
| East    | 60,521       | 60,963       | 60,593       |
| West    | 200,424      | 201,165      | 210,794      |
| Central | 300,089      | 290,365      | 310,192      |

Which technique should the analyst use as the first step to achieve this in Tableau Prep?

- **A. A wildcard search to pivot in the Pivot step**
- B. An Aggregate step to reshape the data
- C. A wildcard search for multiple tables in the Input step
- D. A Rows to Columns Pivot step

**Answer: A**

### NEW QUESTION # 62

You have a data source that contains 20 tables.

You want the tables to be organized within the Data pane based on the type of data contained within the tables.

What should you use?

- A. Hierarchies
- B. Groups
- **C. Folders**
- D. Sets

**Answer: C**

To organize the tables in the Data pane based on the type of data contained within the tables, you should use folders. Folders are a way to manually group fields, parameters, sets, or tables in the Data pane according to your preference. You can create folders by right-clicking on the fields or tables you want to group and selecting **Folders > Create Folder**. You can also drag and drop fields or tables into existing folders. You can name the folders according to the type of data they contain, such as sales, customer, product, etc. Folders can help you find and access the fields or tables you need more easily and efficiently.
