| <b>Q Ortho NCLEX Questions</b><br><small>Study online at: <a href="https://studycart24.com/">https://studycart24.com/</a></small>                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| vegetables, pasta, broccoli<br>C. Green vegetables, sardines, salmon with bone, molasses<br>D. Fresh fruits, English muffins, black beans, asparagus                                                                                                                                                                                                                                          | as fresh fruits, English muffins, black beans, and asparagus are inadequate in calcium.                                                                                                                                                                                                                                                                                                                                                                |
| 3. A patient with osteoporosis has been advised to increase the amount of calcium in her diet. Which food provides the most calcium?<br>An 8- oz glass of milk<br>An ounce of cheddar cheese<br>A half cup of raw broccoli<br>A 4- ounce salmon croquette                                                                                                                                     | Answer A is correct. An 8-ounce glass of milk contains 290mg of calcium. Answers B, C, and D contain lesser amounts; therefore, they are incorrect. (Note: An ounce of cheddar cheese contains 205 mg of calcium; half a cup of raw broccoli contains 175mg of calcium; and 4 ounces of salmon croquette contains 165 mg of calcium).                                                                                                                  |
| 4. Which of the following instructions should be included for the patient taking calcium supplements?<br>A.The patient should take her calcium with meals<br>B.The patient should take all her daily calcium supplements at one time<br>C.The patient should take her calcium supplement after meals to prevent stomach upset<br>D.The patient can use calcium-based antacids for supplement. | Rationale: Answer D is correct. Many people prefer to supplement their calcium intake with calcium-based antacids. If calcium supplements are used, they should be administered 30 minutes before meals to maximize absorption, so answer A is wrong. Calcium absorption is better if it is administered throughout the day rather than in a single dose, making answer B wrong. Calcium supplements do not cause stomach upset, so answer C is wrong. |

If you have aspiration to be an IT specialist with considerable salary and work in big company, our CompTIA exam dumps will make your dream closer. You just need to prepare CS0-002 real questions with one or two days and we will give your support in every steps of your IT test preparation if you have any problems and doubts to our CS0-002 Pdf Torrent.

## CompTIA CySA+ CS0-002 Practice Test Questions, CompTIA CySA+ CS0-002 Exam Practice Test Questions

If you want to become a certified cybersecurity analyst who has the required hands-on skills and technical knowledge to perform all the needed cybersecurity tasks, your perfect choice will be to obtain the CompTIA CySA+ certification. It is increasingly important for an organization to follow the analytics-based approach that helps it function safely and securely, and a professional who has this sought-after certificate can change the situation for better. So, if you want to earn this certification, you should pass the CompTIA CS0-002 exam.

To prepare for the CySA+ certification exam, candidates can take advantage of various training resources available online or in-person. CompTIA offers official training courses and study materials to help candidates prepare for the exam. Additionally, there are several online communities and study groups that candidates can join to get support and guidance from other cybersecurity

professionals.

CompTIA Cybersecurity Analyst (CySA+) Certification Exam, also known as CS0-002, is a globally recognized certification offered by CompTIA. CompTIA Cybersecurity Analyst (CySA+) Certification Exam certification is designed for professionals who want to pursue a career in cybersecurity analysis. CS0-002 is the updated version of the previous CySA+ exam, which was first introduced in 2017. The updated version is more comprehensive and covers the latest cybersecurity threats and challenges that organizations face.

## Advanced CS0-002 Testing Engine & CS0-002 Latest Dumps Ppt

With the help of the CS0-002 practice exam questions and preparation material offered by UpdateDumps, you can pass any CS0-002 certifications exam in the first attempt. You don't have to face any trouble, and you can simply choose to do a selective CS0-002 brain dumps to pass the exam. We offer guaranteed success with CS0-002 Dumps Questions on the first attempt, and you will be able to pass the CS0-002 exam in short time. You can always consult our CS0-002 certified professional support if you are facing any problems.

## CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample Questions (Q35-Q40):

### NEW QUESTION # 35

An analyst is conducting a log review and identifies the following snippet in one of the logs:

```
Jun 10 07:09:10 databasel sshd[24665]: Invalid user root from 101.79.130.213
Jun 10 07:36:03 databasel sshd[24901]: Invalid user root from 101.79.130.213
Jun 10 07:42:44 databasel sshd[24938]: Invalid user root from 101.79.130.213
Jun 10 07:56:11 databasel sshd[26570]: Invalid user root from 101.79.130.213
Jun 10 08:02:55 databasel sshd[30144]: Invalid user root from 101.79.130.213
```

Which of the following MOST likely caused this activity?

- A. SQL injection
- **B. Brute force**
- C. Privilege escalation
- D. Forgotten password

**Answer: B**

### NEW QUESTION # 36

A computer hardware manufacturer developing a new SoC that will be used by mobile devices. The SoC should not allow users or the process to downgrade from a newer firmware to an older one. Which of the following can the hardware manufacturer implement to prevent firmware downgrades?

- A. Encryption
- **B. eFuse**
- C. Secure Enclave
- D. Trusted execution

**Answer: B**

Explanation:

An eFuse, or electronic fuse, is a microscopic fuse put into a computer chip that can be blown by applying a high voltage or current. Once blown, an eFuse cannot be reset or repaired, and its state can be read by software or hardware. An eFuse can be used by a hardware manufacturer to prevent firmware downgrades on a system-on-chip (SoC) that will be used by mobile devices. An eFuse can store information such as the firmware version, security level, or device configuration on the chip. When a newer firmware is installed, an eFuse can be blown to indicate the update and prevent reverting to an older firmware. This can help protect the device from security vulnerabilities, compatibility issues, or unauthorized modifications.

### NEW QUESTION # 37

Which of the following are the MOST likely reasons to include reporting processes when updating an incident response plan after a breach? (Select TWO).

- A. To remediate vulnerabilities that led to the breach
- B. To establish a clear chain of command
- C. To isolate potential insider threats
- **D. To meet regulatory requirements for timely reporting**
- **E. To provide secure network design changes**
- F. To limit reputation damage caused by the breach

**Answer: D,E**

#### NEW QUESTION # 38

A security analyst receives an alert from the SIEM about a possible attack happening on the network. The analyst opens the alert and sees the IP address of the suspected server as 192.168.54.66, which is part of the network 192.168.54.0/24. The analyst then pulls all the command history logs from that server and sees the following

```
$ route -n
$ ifconfig -a
$ ping 192.168.54.1
$ tcpdump 192.168.54.80 -nnS
$ hping -s 192.168.54.80 -c 3
```

Which of the following activities is MOST likely happening on the server?

- **A. A MITM attack**
- B. A vulnerability scan
- C. Fuzzing
- D. Enumeration

**Answer: A**

#### NEW QUESTION # 39

The software development team pushed a new web application into production for the accounting department. Shortly after the application was published, the head of the accounting department informed IT operations that the application was not performing as intended. Which of the following SDLC best practices was missed?

- A. Static code analysis
- B. Fuzzing
- **C. User acceptance testing**
- D. Peer code reviews
- E. Regression testing

**Answer: C**

#### NEW QUESTION # 40

.....

We cannot predicate the future but we can live in the moment. There are many meaningful things waiting for us to do. Try to immerse yourself in new experience. Once you get the CompTIA CS0-002 certificate, your life will change greatly. First of all, you will grow into a comprehensive talent under the guidance of our CompTIA Cybersecurity Analyst (CySA+) Certification Exam CS0-002 Exam Materials, which is very popular in the job market.
