Answer: E

NEW QUESTION # 36

Drag and Drop Question

You have a Microsoft 365 tenant.

A new regulatory requirement states that all documents containing a patent ID be labeled, retained for 10 years, and then deleted.

The policy used to apply the retention settings must never be disabled or deleted by anyone.

You need to implement the regulatory requirement.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. (Choose three.)

Actions

Add a management lock.

Create a retention label policy.

Add a preservation lock.

Create a retention policy.

Create a retention label.

Answer Area

Answer:

Explanation:

Actions

Add a management lock.

Create a retention policy.

Answer Area

Create a retention label.

Create a retention label policy.

Add a preservation lock.

Explanation:

Preservation Lock locks a retention policy or retention label policy so that no one - including a global admin - can turn off the policy, delete the policy, or make it less restrictive. This configuration might be needed for regulatory requirements and can help safeguard against rogue administrators.

When a retention policy is locked:

No one can disable the policy or delete it

Locations can be added but not removed

You can extend the retention period but not decrease it

When a retention label policy is locked:

No one can disable the policy or delete it

Locations can be added but not removed

Labels can be added but not removed
