of unsatisfactory results, we offer a full refund guarantee (terms and conditions apply). We also offer up to 12 months of free Valid SMI300XE Exam Questions updates. Buy our product today and get these benefits.

Supermicro MI300X Expert (SMI300XE) Certification Exam Sample Questions (Q10-Q15):

NEW QUESTION # 10

The syntax and options for the SUM command differ between Windows and Linux.

- A. True
- B. False

Answer: A

Explanation:

The SUM (Supermicro Update Manager) command has different syntax and options between Windows and Linux versions.

* On Windows, the SUM command uses .exe files and standard Windows CLI syntax.

* On Linux, SUM commands use native Linux paths, shell scripting, and different argument formatting.

For example:

* Windows: sum.exe -i 10.1.1.100 -p ADMIN -u ADMIN -c checkbasicinfo

* Linux: ./sum -i 10.1.1.100 -p ADMIN -u ADMIN -c checkbasicinfo

Since syntax differs, the correct answer is True.

NEW QUESTION # 11

When you first access the IPMI Web GUI, you will be prompted to log in. Where can you find the password?

- A. It will be on the label on the bottom of the system.
- B. It will be on the label on the bottom side of the system cover.
- C. It will be on the tag next to the I/O Module.
- D. Use the system model number as the password.

Answer: B

Explanation:

Supermicro ships systems with a unique BMC password for security purposes. This password is printed on a label located on the bottom side of the system cover.

* Option A (on the I/O module tag) is incorrect as the tag typically contains network interface information rather than credentials.

* Option B (using the system model number as a password) is incorrect because Supermicro does not use default passwords based on the model number.

* Option C (on the bottom of the system) is close but not precise; the correct location is the bottom side of the system cover.

* Option D (label on the bottom side of the system cover) is correct, as stated in the Supermicro IPMI and BMC login documentation.

Security Recommendation: Upon first login, Supermicro strongly recommends changing the default BMC password immediately for security reasons.

NEW QUESTION # 12

What is the executable file extension used in Windows for SUM?

- A. .txt
- B. binary
- C. .sh
- D. .exe

Answer: D

Explanation:

This question is a duplicate of Question No. 20. The correct Windows executable file extension for SUM is .exe.

* Option A (Correct): SUM on Windows is executed using .exe.

- * Option B (Incorrect):.sh is a script file format for Linux, not Windows.
- * Option C (Incorrect):.txt files contain text and cannot execute commands.
- * Option D (Incorrect):"binary" is not a valid file extension for SUM execution on Windows.

NEW QUESTION # 13

What information is useful for identifying system issues and their timing?

- A. Subnet Mask
- B. Last login attempt
- C. GPU memory specification
- **D. Event log**

Answer: D

Explanation:

The event log is the primary source of information for identifying system issues and their exact timing. The IPMI event log records all critical system alerts, including hardware failures, temperature warnings, power issues, and other critical errors.

- * Option A (Incorrect): GPU memory specifications do not provide issue tracking information.
- * Option B (Correct): The event log tracks all system events and errors, making it essential for troubleshooting.
- * Option C (Incorrect): Subnet masks relate to network configurations and do not provide system issue tracking.
- * Option D (Incorrect): Last login attempts show security logs but are not related to hardware or system issues.

NEW QUESTION # 14

When working on the GPU tray, where should you place it to ensure a safe work environment?

- A. On a cardboard box that may or may not support the weight of the tray
- **B. A flat surface**
- C. On the floor where everyone is walking by
- D. On top of the chassis

Answer: B

Explanation:

When handling the GPU tray, it should be placed on a flat, stable surface to prevent damage and ensure safety.

- * Option B (Correct): A flat surface provides stability and prevents accidental damage or tipping.
- * Option A (Incorrect): Placing the tray on top of the chassis can cause it to fall and sustain damage.
- * Option C (Incorrect): The floor is unsafe due to foot traffic, risking accidental damage.
- * Option D (Incorrect): A cardboard box may not support the tray's weight, making it unstable.

NEW QUESTION # 15

.....

Making right decision of choosing useful SMI300XE practice materials is of vital importance. Here we would like to introduce our SMI300XE practice materials for you with our heartfelt sincerity. With passing rate more than 98 percent from exam candidates who chose our SMI300XE Study Guide, we have full confidence that your SMI300XE actual test will be a piece of cake by them. Don't hesitate, you will pass with our SMI300XE exam questions successfully and quickly.
