## Talend-Core-Developer Latest Braindumps Book - Valid Test Talend-Core-Developer Tips

Users of Test4Engine software can attempt multiple Talend Core Certified Developer Exam (Talend-Core-Developer) practice exams to assess and improve preparation for the examination. Customers can view their previous attempts' scores and see their mistakes. It helps test takers take the final Talend Core Certified Developer Exam (Talend-Core-Developer) exam without making mistakes. The web-based version of the Talend-Core-Developer practice exam can be taken online. It means you can take this mock test via any browser like MS Edge, Firefox, Chrome, Internet Explorer, and Safari.

## Talend Core Certified Developer Exam Sample Questions (Q51-Q56):

### NEW QUESTION # 51

Which statements are true about the execution logs of a task running on a Remote Engine? Choose 2 answers.

- A. Logs are stored in Parquet format on the server where the Remote Engine is running.
- B. Logs can be downloaded from Talend Management Console.
- C. Logs are stored in the file system of the server where the Remote Engine is running.
- D. Logs are stored in an H2 database hosted on the server where the Remote Engine is running.

**Answer: B,C**

Explanation:

Comprehensive and Detailed Explanation:

When a task executes on a Talend Remote Engine, the execution logs are handled as follows:

\* Logs are stored in the file system of the server where the Remote Engine is running (Option A):

- \* The Remote Engine writes execution logs to its local file system, typically in plain text or log formats. These logs provide detailed information about the task's execution and are essential for troubleshooting and monitoring.
- \* Logs can be downloaded from Talend Management Console (Option C):
- \* Talend Management Console (TMC) aggregates execution logs from Remote Engines, allowing users to access and download them directly through the TMC interface. This centralized access simplifies monitoring and debugging across multiple environments.
- Why not other options?
- \* Option B: While some components of Talend may use H2 databases for internal purposes, execution logs are not typically stored in an H2 database on the Remote Engine server.
- \* Option D: Execution logs are generally stored in plain text or standard log formats, not in Parquet format. Parquet is a columnar storage file format commonly used for efficient data processing, not for logging purposes.

## NEW QUESTION # 52

You want to create a generic schema using a schema defined in a Talend component in the Repository view. How can you accomplish this?

- A. On the Advanced settings tab of the Component view.
- B. **In the Repository, by right-clicking Generic schemas.**
- C. By right-clicking the component and selecting the Generic schema option.
- D. In the Schema Editor window for the component.

### Answer: B

Explanation:

To create a generic schema from a schema defined in a Talend component, follow these steps:

- \* Open the Repository View:
- \* In Talend Studio, navigate to the Repository panel, typically located on the left side of the interface.
- \* Locate the 'Generic schemas' Node:
- \* Within the Repository, expand the 'Metadata' section to find the 'Generic schemas' node.
- \* Initiate the Generic Schema Creation Process:
- \* Right-click on 'Generic schemas' and select 'Create generic schema' from the context menu.
- \* Define the Schema Properties:
- \* In the schema creation wizard that appears, provide the necessary properties such as 'Name' and 'Description' for the new generic schema.
- \* Set Up the Schema Structure:
- \* Define the schema structure by adding columns and specifying their data types as required.
- \* Finalize the Schema Creation:
- \* Click 'Finish' to complete the creation process. The new generic schema will now be available under the 'Generic schemas' node in the Repository.

This method allows you to create a reusable generic schema that can be applied across multiple components and Jobs within Talend Studio.

## NEW QUESTION # 53

You have a MySQL table named customers with columns named id, name, address, and country. You need to retrieve records that have a specific country based on a variable. Which steps should you use to achieve this?

- A. Use a tDBInput component with a Run if trigger.
- B. Use a tDBInput component and link it to a tFilterColumns component.
- C. Use a tDBInput component and link it to a tMatchGroup component.
- D. **Use a tDBInput component with a context variable in the SQL query.**

### Answer: D

Explanation:

Comprehensive and Detailed Explanation:

To filter records based on a specific country dynamically, the best approach is using a tDBInput component with a context variable in the SQL query (Option A).

Step-by-Step Process:

- \* Define a Context Variable:
- \* In the Context Variables section of Talend Studio, create a new variable (context.country) and set its value dynamically.

- \* Configure tDBInput:
- \* Drag and drop the tDBInput component onto the Designer.
- \* Set up the database connection using either Built-in or Repository mode.
- \* In theQuery field, write:  
SELECT id, name, address, country FROM customers WHERE country = "" + context.country + "
- \* Execute the Job:
- \* The Job will retrieve only those records where the country column matches the value of the context variable.
- \* The value of context.country can be modified at runtime, making the query dynamic.

Why not other options?

- \* tMatchGroup (Option B): Used for record deduplication, not filtering.
- \* Run if Trigger (Option C): Controls execution flow but does not filter records inside tDBInput.
- \* tFilterColumns (Option D): Removes unwanted columns but does not filter records based on conditions.

#### NEW QUESTION # 54

User A shared a connection with User B. User B used the shared connection and created Dataset\_1. User A stops sharing the connection with User B. Which statement is true about access to Dataset\_1?

- A. User B has full access to Dataset\_1.
- B. User A has full access to Dataset\_1.
- C. User B has limited access to Dataset\_1.
- D. User B has no access to Dataset\_1.

#### Answer: A

Explanation:

Comprehensive and Detailed Explanation:

In Talend Cloud Data Inventory, when a user creates a dataset using a shared connection, the following applies:

\* User B has full access to Dataset\_1 (Option D):

\* Once User B creates Dataset\_1 using the shared connection, they become the owner of that dataset. Even if User A later revokes access to the connection, User B retains full access to Dataset\_1. The dataset's accessibility is independent of the connection's sharing status after its creation.

Why not other options?

- \* Option A: User B's access to Dataset\_1 is not limited; they have full ownership and control.
- \* Option B: Revoking the connection does not remove User B's access to datasets they have already created.
- \* Option C: User A's access to Dataset\_1 depends on the sharing settings applied by User B; by default, User A does not have access unless granted.

#### NEW QUESTION # 55

Which HTTP methods are supported by tRESTRequest?

- A. POST, PATCH, and UPDATE
- B. GET, POST, UPDATE, and DELETE
- C. GET, POST, PUT, PATCH, and DELETE
- D. SELECT, INSERT, UPDATE, and DELETE

#### Answer: C

Explanation:

Comprehensive and Detailed Explanation:

The tRESTRequest component in Talend Studio is designed to handle RESTful web service requests. It supports the following HTTP methods:

- \* GET: Retrieves data from the server.
- \* POST: Submits data to the server, often causing a change in state or side effects.
- \* PUT: Replaces all current representations of the target resource with the request payload.
- \* PATCH: Applies partial modifications to a resource.
- \* DELETE: Removes the specified resource from the server.

Therefore, the correct answer is A. GET, POST, PUT, PATCH, and DELETE.

## NEW QUESTION # 56

.....

Talend-Core-Developer exam dumps are famous for high-quality, since we have a professional team to collect and research the first-hand information. We have reliable channel to ensure you that Talend-Core-Developer exam braindumps you receive is the latest information of the exam. We are strict with the quality and answers of Talend-Core-Developer Exam Materials, we can guarantee you that what you receive are the best and most effective. In addition, online and offline chat service stuff are available, and if you have any questions for Talend-Core-Developer exam dumps, you can consult us.
