UiPath UiPath-ABAv1 Online Training Materials - UiPath-ABAv1 Reliable Exam Guide

In the present situation, you will find companies laying off their employees without any notice or prior information. They are just receiving an email and the next moment they have no access to the company network. So to avoid all this, you have to keep yourself updated with the new version of technologies and applications. You have to become one of UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) certification holders who survived the laying off situation and are still in a great position in their company. You cannot afford to lose it when you need your job the most.

UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q24-Q29):

NEW QUESTION # 24

When starting a project with UiPath Process Mining, you can leverage already created applications to shorten the delivery time of a project. What are three out-of-the-box app templates available in UiPath Process Mining repository that you can deploy for a project?

- A. Incident Management for Service Now, TemplateOne-SingleFile for any source system, Mortgage Loans for Oracle Cloud
- B. Purchase-to-Pay for SAP, Order-to-Cash for Oracle JDE, Lead-to-Order for Salesforce
- C. Purchase-to-Pay for any source system, Warehouse Management for SAP, Mortgage Loans for Oracle Cloud
- D. Lead Management for Salesforce Pardot, Data Warehouse for SAP, Incident Management for ServiceNow

Answer: B

Explanation:

UiPath Process Mining provides a variety of out-of-the-box app templates that can be used as a starting point for creating process applications. These templates are designed to work with specific source systems and can be customized to fit business needs. The templates include a set of dashboards and KPIs to enable business users to monitor and analyze the processes in detail. The correct options from the given choices are:

* Purchase-to-Pay for SAP: This app template is designed for the SAP source system and can be extracted using Theobald Xtract Universal.

* Order-to-Cash for Oracle JDE: This template is suitable for the Oracle JDE source system and uses CData Sync for data extraction.

* Lead-to-Order for Salesforce: This app template is tailored for the Salesforce source system and also relies on CData Sync for data extraction.

These templates are part of the process-specific app templates for specific source systems available in the UiPath Process Mining repository.

NEW QUESTION # 25

Which of the following can be found in the Process Overview part of the PDD?

- A. Process SME and Process Owner
- B. Applications names and versions
- **C. High Level As-Is Process Map**
- D. Process schedule and frequency

Answer: C

Explanation:

In the Process Overview part of the Process Design Document (PDD), a high-level As-Is Process Map is included. This part typically encompasses the current state of the process, outlining the steps, decisions, and interactions that occur in the process as it currently exists without automation. References: UiPath Documentation on PDD at <https://docs.uipath.com/>.

NEW QUESTION # 26

What is an example of a relevant process stakeholder input necessary for the business analysis phase?

- **A. Provide a full list of applications used by the process**
- B. Offer process solution design workflows
- C. Organize testing phase meetings
- D. Create a potential cost savings graph of the business process or requirement

Answer: A

Explanation:

In the business analysis phase, it's vital to understand all components that make up the process, including the software applications involved. A comprehensive list of these applications enables a thorough evaluation of the process's digital environment, helping to tailor the automation solution more accurately.

NEW QUESTION # 27

In UiPath Studio ReFramework, what can be the output from the Process Transaction state?

- A. Success, Waiting for input, Business Exception
- B. Success, Fail, Paused
- **C. Success, Business Exception, System Exception**
- D. Success, Error

Answer: C

Explanation:

In UiPath Studio's ReFramework, the outputs from the Process Transaction state can be Success, Business Exception, or System

Exception. This classification helps in handling different outcomes of transaction processing effectively-Success for transactions completed without issues, Business Exception for errors related to the business logic, and System Exception for errors related to the system or application.

UiPath Documentation on ReFramework at <https://docs.uipath.com/>.

NEW QUESTION # 28

When an application stops responding, what should it be treated as?

- A. Business Exception
- **B. System Exception**
- C. Unknown Exception
- D. Known Exception

Answer: B

Explanation:

When an application stops responding, this should be treated as a System Exception. System Exceptions refer to errors that occur due to unforeseen issues in the system environment, such as application failures, network errors, or hardware malfunctions, which are beyond the control of the business logic of the automation. References: UiPath Documentation on Exception Handling at <https://docs.uipath.com/>.
