## UiPath-ABAv1 Exam Certification Cost - Accurate UiPath-ABAv1 Study Material

As we all know, no pain, no gain. If you want to enter a better company, you must have the competitive force. UiPath-ABAv1 learning materials will offer you such opportunity to pass the exam and get the certificate successfully, so that you can improve your competitive force. Also, you need to spend certain time on practicing the UiPath-ABAv1 Exam Dumps, so that you can get the certificate at last. Besides, we pass guarantee and money back guarantee if you fail to pass the exam after buying UiPath-ABAv1 learning materials. We also offer you free update for one year, and the update version will be sent to your email automatically.

## UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q97-Q102):

### NEW QUESTION # 97

Which option from the Task Mining interface allows the business analyst to change the order of the identified steps within a trace?

- A. Export trace
- B. Recompute
- C. Most frequent path
- D. Edit step

**Answer: D**

**Explanation:**

In the UiPath Task Mining interface, the option that allows a business analyst to change the order of the identified steps within a trace is 'Edit step'. This feature enables the analyst to modify the sequence of actions or steps captured during the task mining process. By selecting 'Edit step', the analyst can rearrange the steps to reflect the correct order of the process as it should be executed.

References: The explanation is based on the UiPath Documentation Portal's guide on Task Mining, which details the steps and actions, including editing and rearranging steps within a trace.

#### NEW QUESTION # 98

What is the purpose of prioritization criteria in the business analysis phase?

- A. Prioritization criteria are used to determine, evaluate, and prioritize different business processes or requirements.
- B. Prioritization criteria are used to decide the best sequence for rolling out various automation features.
- C. Prioritization criteria are used to identify suitably skilled candidates for the development team.
- D. Prioritization criteria are used to establish the most effective algorithms for diverse tasks within the automation.

**Answer: A**

Explanation:

Prioritization criteria help Business Analysts and stakeholders to decide which processes are most valuable to automate first. It typically considers factors such as:

- \* Business value
- \* Complexity
- \* Frequency of process execution
- \* Risk reduction

As per UiPath's Business Analyst guidelines:

"Prioritization criteria enable the evaluation and prioritization of automation opportunities based on measurable parameters, ensuring the most beneficial and feasible processes are tackled first." References:

UiPath Academy: Business Analyst Foundation and Advanced courses

UiPath Automation Hub and Opportunity Assessment documentation

#### NEW QUESTION # 99

What is the goal of deploying automation in RPA?

- A. To install and configure UiPath software on a computer
- B. To make the automated process available for production use
- C. To test UiPath software for performance and reliability
- D. To train employees on how to use UiPath software

**Answer: B**

Explanation:

The primary goal of deploying automation in RPA is to make the automated process available for production use. This involves automating tasks and workflows to increase efficiency, reduce errors, and free up human workers for more strategic tasks, thereby enhancing productivity and operational effectiveness across the organization. References: UiPath Academy and learning materials.

#### NEW QUESTION # 100

In the pilot phase for automation, what is the activity that should be done when selecting the use cases?

- A. Choose use case from critical Must-Do Improvements or important Long-Term Improvements
- B. Choose use case from critical Quick Wins or important Low-Hanging Fruit
- C. Choose use case from critical Quick Wins or important Long-Term Improvements
- D. Choose use case from critical Must-Do Improvements or important Low-Hanging Fruit

**Answer: B**

Explanation:

In the pilot phase for automation, the activity that should be done when selecting the use cases involves choosing use cases from critical Quick Wins or important Low-Hanging Fruit. These categories typically represent processes that are either easy to implement and yield immediate benefits (Quick Wins) or are straightforward improvements that don't require significant investment or risk (Low-Hanging Fruit).
