

# UiPath-ADPv1 Sample Questions Answers & Latest UiPath-ADPv1 Braindumps Pdf

BONUS!!! Download part of PDFTorrent UiPath-ADPv1 dumps for free: [https://drive.google.com/open?id=1Rw\\_Vazet37jDu3tBXkdG5Jz7Xo34AqyC](https://drive.google.com/open?id=1Rw_Vazet37jDu3tBXkdG5Jz7Xo34AqyC)

Our product for the UiPath-ADPv1 exam is compiled by the skilled professionals who have studied the exam for years, therefore the quality of the practice materials are quite high, it will help you to pass the exam with ease. Free update for the latest version within one year are available. And the questions and answers of the UiPath-ADPv1 Exam are from the real exam, and the answers are also verified by the experts, and money back guarantee. The payment of the UiPath-ADPv1 exam is also safe for our customers, we apply online payment with credit card, it can ensure the account safety of our customers.

You can take our UiPath UiPath-ADPv1 practice exams (desktop and web-based) multiple times to gauge how well you've prepared for the real UiPath UiPath-ADPv1 test. These UiPath-ADPv1 practice exams are designed specifically to help you identify your mistakes and attempt the real UiPath-ADPv1 examination successfully. You can continually enhance your UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) test preparation by overcoming your mistakes. Customers can check their prior UiPath-ADPv1 tests and give UiPath-ADPv1 practice exams multiple times to improve themselves for the final UiPath UiPath-ADPv1 test.

## UiPath-ADPv1 Sample Questions Answers - Free PDF Quiz 2025 First-grade UiPath Latest UiPath-ADPv1 Braindumps Pdf

As we all know, it is a must for all of the candidates to pass the UiPath-ADPv1 exam if they want to get the related UiPath-ADPv1 certification which serves as the best evidence for them to show their knowledge and skills. If you want to simplify the preparation process, here comes a piece of good news for you. We will bring you integrated UiPath-ADPv1 Exam Materials to the demanding of the ever-renewing exam, which will be of great significance for you to keep pace with the times. Before your purchase, you can free download the demo of our UiPath-ADPv1 exam questions to check the outstanding quality.

### UiPath UiPath-ADPv1 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                   |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>Design and Development: This section covers designing workflows using sequences, flowcharts, and state machines, building reusable components with libraries, exception handling and debugging techniques, etc.</li></ul>                                                           |
| Topic 2 | <ul style="list-style-type: none"><li>UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.</li></ul>                                                                                                                 |
| Topic 3 | <ul style="list-style-type: none"><li>UiPath Studio Fundamentals: In this section, the focus is given to the understanding of Robotic Process Automation (RPA) concepts; it covers UiPath Studio and its components, Working with the UiPath user interface, project creation, management, and version control.</li></ul> |

|         |                                                                                                                                                                                                  |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 4 | <ul style="list-style-type: none"> <li>• Debugging and Testing: This section is about utilizing logging and debugging tools and adopting unit testing and test automation strategies.</li> </ul> |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## UiPath (ADPv1) Automation Developer Professional Sample Questions (Q163-Q168):

### NEW QUESTION # 163

Starting with UiPath Studio version 2022.10, what happens to dependencies that lack Windows compatibility when they are converted in a project?

- A. They are removed from the project.
- B. They are replaced with compatible alternatives.
- C. They are automatically resolved.
- D. They are marked as unresolved.

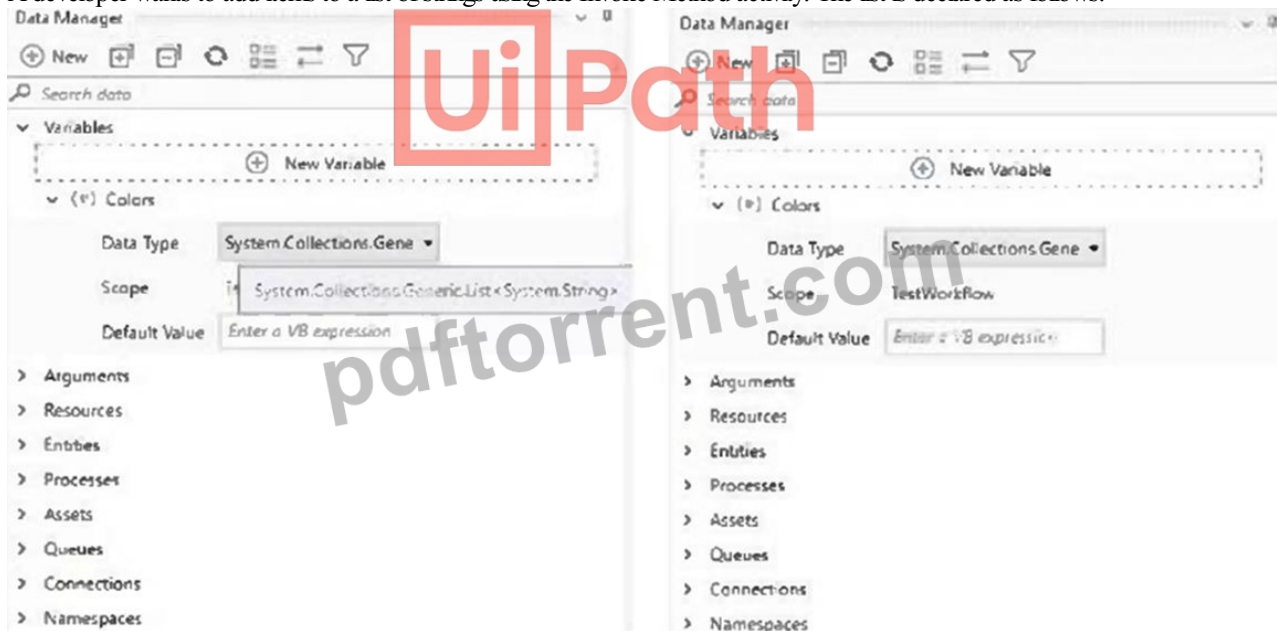

**Answer: D**

Explanation:

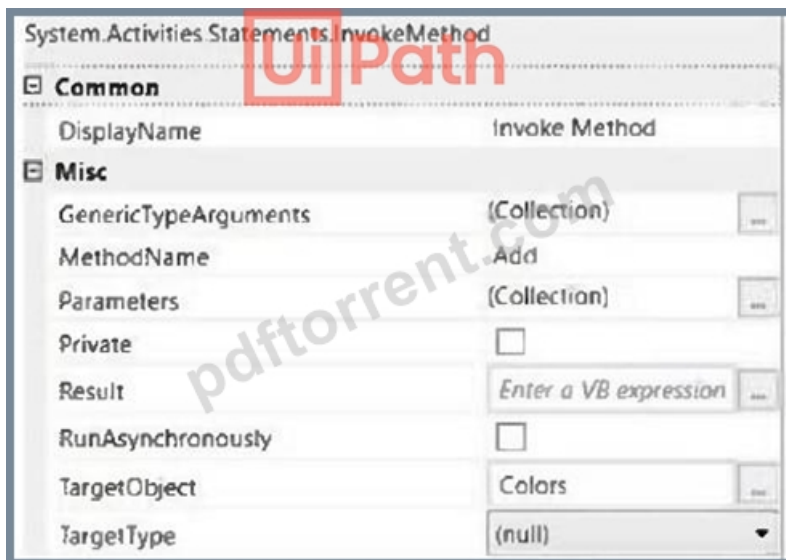

Starting with UiPath Studio version 2022.10, dependencies that lack Windows compatibility are marked as unresolved when they are converted in a project. This means that the project cannot be executed until the unresolved dependencies are manually resolved by the developer. This is done to ensure that the project can run on both Windows and Linux platforms without compatibility issues. References: [UiPath Studio Guide - Converting Projects to Linux Compatibility]

### NEW QUESTION # 164

A developer wants to add items to a list of strings using the Invoke Method activity. The list is declared as follows:

The Invoke Method activity has the following properties:

The Parameters property is as follows:

Based on the information shown in the exhibits what is the outcome of the Invoke Method activity?

- A. An exception will be thrown.
- B. Colors will contain an item with the value "Colors: Yellow".
- C. Colors will contain an item with the value "Yellow".
- D. Colors will contain an item with an empty value.

**Answer: C**

Explanation:

The Invoke Method activity is used to invoke a method of a class or an object. In this case, the developer wants to add items to a list of strings using the Invoke Method activity. The list is declared as follows:

Dim Colors As New List(Of String)

This means that the list is named Colors and it can store strings. The Invoke Method activity has the following properties:

\* TargetType: System.Collections.Generic.List`1[System.String]. This means that the target type is a generic list of strings.

\* TargetObject: Colors. This means that the target object is the list named Colors.

\* MethodName: Add. This means that the method name is Add, which is a method of the list class that adds an item to the end of the list.

\* Parameters: In, String, Yellow. This means that the parameter direction is In, which means that the value is passed to the method. The parameter type is String, which means that the value is a string. The parameter value is Yellow, which means that the value is the string "Yellow".

Based on the information shown in the exhibits, the outcome of the Invoke Method activity is that Colors will contain an item with the value "Yellow". This is because the Invoke Method activity will add "Yellow" to the list of strings declared as Colors.

#### NEW QUESTION # 165

A developer plans to create a process to automate a web application using the Firefox browser. The goal is to have the robot work with the web application without relying on visual elements on screen.

To achieve this goal, what option should the developer use for the Use Application/Browser activity?

- A. Input mode = Simulate

- B. WebDriver mode = Headless
- C. User Data Folder Mode = CustomFolder
- D. Input mode = Chromium API

**Answer: A**

Explanation:

To work with a web application in Firefox without relying on visual elements, the developer should use the 'Input mode = Chromium API'. This option enables the robot to interact with the web elements directly, without the need for visual screen elements.

#### NEW QUESTION # 166

A developer configured the properties for a Click activity as shown below:

The screenshot shows the 'Properties' window for the 'UiPath.UIAutomationNext.Activities.NClick' activity. The properties are organized into several sections:

- Common:**
  - Continue on error: True (checked)
  - Delay after: Delay (in seconds) after this
  - Delay before: Delay (in seconds) to wait before
  - DisplayName: Click 'File'
  - Timeout: 10
- Input:**
  - Click type: NClickType.Single
  - Cursor motion type: Specifies the type of motion
  - Mouse button: NMouseButton.Left
- Target:**
  - TargetAnchorable: (null)
- Verify execution:**
  - Verify execution: (checked)
- Input/Output Element:**
  - Input element: The Input UI Element define
  - Output element: Output a UI Element to use
- Misc:**
  - Private: (unchecked)
- Options:**
  - Alter disabled element: When selected, the activity (checked)
  - Input mode: Hardware Events
  - Key modifiers: NKeyModifiers.None

What happens if the activity cannot find its target at runtime?

- A. An exception is thrown after 10 milliseconds.
- B. The next activity is executed after 10 milliseconds.
- C. An exception is thrown after 10 seconds.
- D. The next activity is executed after 10 seconds.

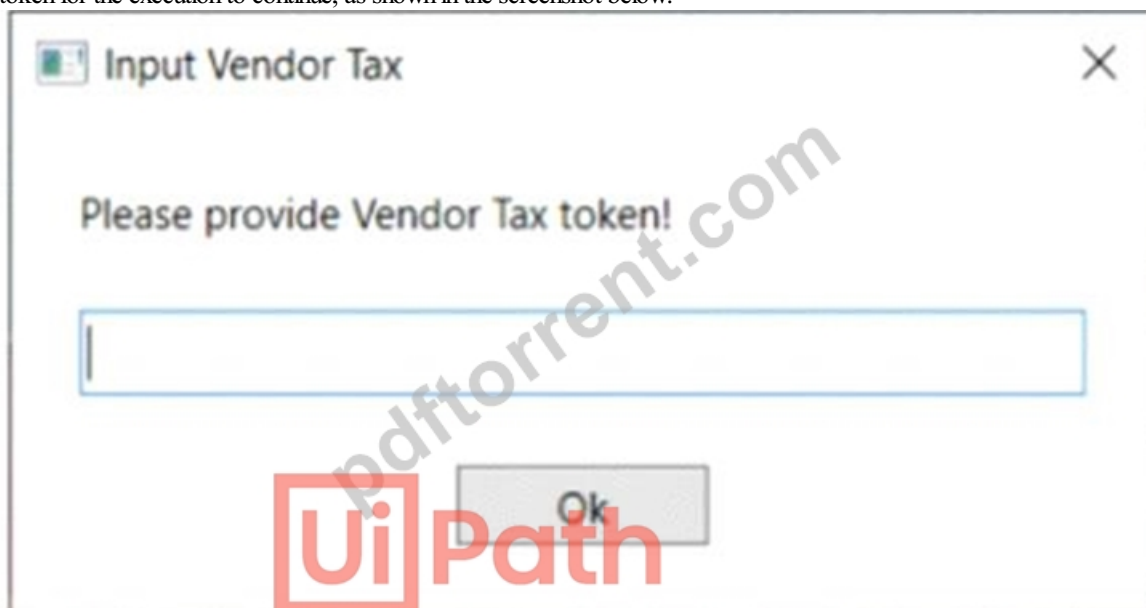

**Answer: C**

Explanation:

The Click activity has a property called TimeoutMS. This property specifies the amount of time (in milliseconds) to wait for the activity to be executed before an error is thrown. In this case, the TimeoutMS property is set to 10000 milliseconds (10 seconds). Therefore, if the activity cannot find its target at runtime, an exception will be thrown after 10 seconds.

#### NEW QUESTION # 167

You have to create a testcase for an attended RPA process. At some point, the attended process asks the user to input a specific token for the execution to continue, as shown in the screenshot below.

What testing concept (included in UiPath.Testing.Activities) can be used to isolate and replace the input part, without modifying the original workflow?

- A. Application Testing
- B. Mock Testing
- C. Data-Driven Testing
- D. RPA Testing

**Answer: B**

Explanation:

Mock Testing is a concept that allows you to isolate and replace the input part of an attended RPA process, without modifying the original workflow. Mock Testing enables you to create a mock file of your workflow by selecting Mock workflow under test in the Create Test Case window. This creates a copy of your workflow with the name workflowName\_mock and stores it in Project > Mocks. This folder mirrors the source workflow file tree structure. In the mock file, you can use the Surround with mock option to insert a mock activity that replaces the original input activity. For example, instead of asking the user to input a specific token, you can use a mock activity that assigns a predefined token value to a variable. This way, you can test the specific function of the process without having to enter the token manually every time. Mock Testing is useful for tests that have permanent effects in production or require special resources1.

The other options are incorrect because:

Option A is incorrect because Application Testing is not a concept that can be used to isolate and replace the input part of an attended RPA process, without modifying the original workflow. Application Testing is a type of testing that focuses on verifying the functionality, usability, performance, and security of an application2.

Option B is incorrect because Data-Driven Testing is not a concept that can be used to isolate and replace the input part of an attended RPA process, without modifying the original workflow. Data-Driven Testing is a type of testing that uses external data sources, such as Excel files or databases, to provide input values and expected results for the test cases3.

Option D is incorrect because RPA Testing is not a concept that can be used to isolate and replace the input part of an attended RPA process, without modifying the original workflow. RPA Testing is a type of testing that involves using robots to automate the testing of other robots or applications.
