

UiPath-ADPv1 Valid Test Cram - UiPath-ADPv1 Valid Test Pass4sure

2025 Latest Real4Prep UiPath-ADPv1 PDF Dumps and UiPath-ADPv1 Exam Engine Free Share: https://drive.google.com/open?id=1h38dYiDgbCf8e6mq7GPXNlcGRkmL_PJx

Our product's passing rate is 99% which means that you almost can pass the test with no doubts. The reasons why our 'UiPath-ADPv1 Test Guide' passing rate is so high are varied. Firstly, our test bank includes two forms and they are the PDF test questions which are selected by the senior lecturer, published authors and professional experts and the practice test software which can test your mastery degree of our UiPath (ADPv1) Automation Developer Professional study question at any time. The two forms cover the syllabus of the entire test. Our questions and answers include all the questions which may appear in the exam and all the approaches to answer the questions. So we provide the strong backing to help clients to help them pass the test.

Our UiPath-ADPv1 study quiz boosts high quality and we provide the wonderful service to the client. We boost the top-ranking expert team which compiles our UiPath-ADPv1 guide prep elaborately and check whether there is the update every day and if there is the update the system will send the update automatically to the client. The content of our UiPath-ADPv1 Preparation questions is easy to be mastered and seizes the focus to use the least amount of answers and questions to convey the most important information.

2025 UiPath-ADPv1 Valid Test Cram | High-quality UiPath (ADPv1) Automation Developer Professional 100% Free Valid Test Pass4sure

We know that time is very precious to everyone, especially the test takers to study our UiPath-ADPv1 exam questions. Saving time means increasing the likelihood of passing the UiPath-ADPv1 exam. In order not to delay your review time, our UiPath-ADPv1 Actual Exam can be downloaded instantly. Within about 5 - 10 minutes of your payment, you will receive our login link available for immediate use of our UiPath-ADPv1 study materials.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q96-Q101):

NEW QUESTION # 96

A developer configured the properties for a Click activity on an element inside a web page as shown in the following exhibit.

A screenshot of the UiPath Properties window for a Click activity. The window title is 'Properties' and the activity type is 'UiPath.UIAutomationNext.Activities.NClick'. The 'Common' properties group is selected. The 'Continue on error' checkbox is checked, with the tooltip 'Continue executing the activities in the automation'. The 'Delay after' and 'Delay before' properties are also visible, each with a tooltip indicating the delay in seconds after or before the activity is completed.

The screenshot shows the 'Properties' tab of the UiPath Studio interface. The 'Click' activity is selected, and its configuration is displayed in the right-hand panel. The configuration includes:

- Click**: The amount of time (in seconds) to wait for the element to be found.
- Click type**: NClickType.Single
- Cursor motion type**: Specifies the type of motion performed by the mouse.
- Mouse button**: NMouseButton.Left
- Target**: TargetAnchorable (null)
- Fuzzy selector**: <webctrl aria-role='button' type='submit' tag='IN
- Native text**: Enter a VB expression
- Responsive websites**: (null)
- Strict selector**: <webctrl aria-role='button' css-selector='body>
- Targeting methods**: Strict selector
- Visibility check**: Interactive (for Fuzzy Selector)
- Wait for page load**: NWaitForReady.Interactive
- Window selector (Application instance)**: <html app='msedge.exe' title='*' />
- Verify execution**: (null)
- Input/Output Element**: Input element (The Input UI Element defines the screen element that...), Output element (Output a UI Element to use in other activities as an...)
- Misc**: Private (checkbox)
- Options**: Alter disabled element (checkbox), Input mode: Same as App/Browser, Key modifiers: NKeyModifiers.None

At the bottom of the interface, the tabs are: Properties, Outline, Error List, Object Repository, Test Explorer. The 'Properties' tab is currently selected.

An animation on the web page never completely loads but the element indicated in the Click activity does load within the specified timeout duration. What occurs when this Click activity executes?

- A. Timeout error occurs without clicking on the element.
- B. Element is clicked once the element is fully loaded.**
- C. Waits 10 seconds before clicking on the element.
- D. Continues to the next activity after 30 seconds without clicking on the element.

Answer: B

Explanation:

Click activity has the following properties:

- *ClickType: Single
- *MouseButton: Left
- *Target.Timeout: 30000 ms (30 seconds)
- *Target.WaitForReady: Interactive

The Target.Timeout property specifies the amount of time (in milliseconds) to wait for the activity to run before the SelectorNotFoundException error is thrown1. The default value is 30000 milliseconds (30 seconds)

2.

The Target.WaitForReady property determines how long the activity should wait for the target UI element to be ready before performing the action1. The following options are available:

- *None: Does not wait for anything except the target UI element to exist before executing the action1.
- *Interactive: Waits until only a part of the app is loaded1.
- *Complete: Waits for the entire app to be loaded1.

The default value is Interactive2, which means that the activity will wait until the UI element is visible and can be interacted with3. Therefore, based on these properties, the Click activity will wait for the element indicated by the selector to be loaded and clickable within 30 seconds. If the element is loaded before the timeout, the activity will click it and continue to the next activity. If the element is not loaded within the timeout, the activity will throw an error and stop the execution. The animation on the web page does not affect the Click activity, as long as the target element is loaded and visible. Hence, the correct answer is A. Element is clicked once the element is fully loaded.

NEW QUESTION # 97

A developer aims to employ the REFramework for automating a business process that involves a TransactionData collection (DataTable) comprising vendor names and addresses.

Instructions: Choose the appropriate variable type for the TransactionItem from the provided drop-down list in the following exhibit.

Answer Area

Name	Variable type	Scope	Default
TransactionItem	General Business ...	Enter a VB expression	
SystemException	General Business ...	Enter a VB expression	
BusinessException	General Business ...	Enter a VB expression	
TransactionNumber	General Business ...	1	
Config	General Business ...	Enter a VB expression	

Variables Arguments Imports

Answer Area

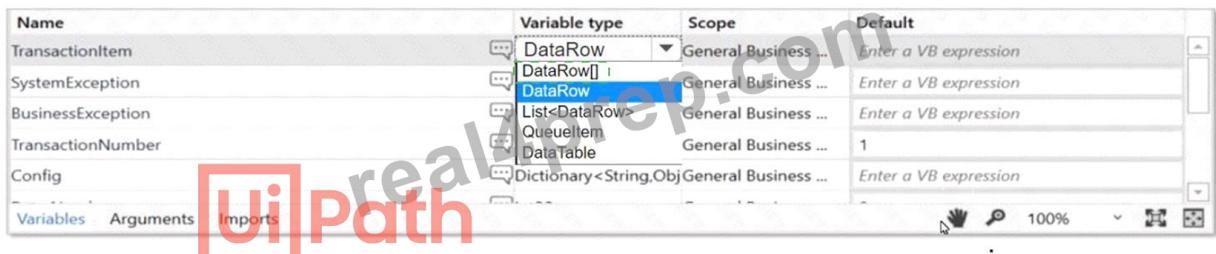

Name	Variable type	Scope	Default
TransactionItem	DataRow	General Business ...	Enter a VB expression
SystemException	DataRow[]	General Business ...	Enter a VB expression
BusinessException	List<DataRow>	General Business ...	Enter a VB expression
TransactionNumber	QueueItem	General Business ...	1
Config	DataTable	General Business ...	Enter a VB expression

Variables Arguments Imports

Answer:

Explanation:

Answer Area

Name	Variable type	Scope	Default
TransactionItem	DataRow	General Business ...	Enter a VB expression
SystemException	DataRow[]	General Business ...	Enter a VB expression
BusinessException	DataRow	General Business ...	Enter a VB expression
TransactionNumber	List<DataRow>	General Business ...	Enter a VB expression
Config	DataTable	General Business ...	1
	Dictionary<String, Obj>	General Business ...	Enter a VB expression

Explanation:

The REFramework (Robotic Enterprise Framework) in UiPath is designed to work with transactional data. For a process that involves iterating over a DataTable where each row represents a transaction item, the appropriate variable type for the TransactionItem would be a DataRow.

In the context of REFramework, a DataRow is typically used to represent a single transaction item when the transaction data is contained within a DataTable. This allows the framework to process each row (or transaction) one by one.

Therefore, the correct variable type for the TransactionItem from the drop-down list should be DataRow.

NEW QUESTION # 98

A developer designed a project in the REFramework. The "Config.xlsx" has the following Setting entry:

A	B
1 Name	Value
2 OrchestratorQueueName	ProcessABCQueue

Assuming the default REFramework configuration, how can the developer reference the Setting in the Config variable to obtain the Setting value as a String from the dictionary?

- A. Config ("ProcessABCQueue")ToString
- B. Config ("ProcessABCQueue")."OrchestratorQueueName").ToString
- C. Config ("OrchestratorQueueName")." Process ABCQueue")ToString
- D. Config ("OrchestratorQueueName").ToString

Answer: D

NEW QUESTION # 99

What is the primary role of the UiPath Remote Runtime component in automation projects involving virtual environments?

- A. It facilitates communication between remote applications and the dedicated UiPath extension, enabling native selector generation in UIExplorer.
- B. It replaces the need for OCR and image recognition activities in all automation projects involving web browsers.
- C. It allows automation projects to be executed in virtual environments without installing any dedicated UiPath extension.
- D. It provides a neural network server for analyzing the UI of applications when working with the Computer Vision activities package.

Answer: A

Explanation:

The UiPath Remote Runtime component is a component that enables the automation of remote applications or desktops, such as Citrix Virtual Apps, Windows Remote Desktop, or VMware Horizon, by using native selectors. Native selectors are expressions that identify UI elements reliably and accurately, without relying on OCR or image recognition activities¹. The UiPath Remote Runtime component works as follows:

It is installed on the remote server where the applications or desktops are hosted.

It communicates with the dedicated UiPath extension that is installed on the client machine where Studio or Robot is installed.

It gathers information about the targeted UI elements of the remote applications and sends them to the corresponding extension.

It allows the extension to generate native selectors for the remote UI elements in UIExplorer, a tool that helps you create and edit selectors².

The UiPath Remote Runtime component is required for automating in virtual environments, as it provides a bridge between the remote server and the client machine, and enables the use of native selectors, which are more reliable and efficient than OCR or

image recognition activities3.

NEW QUESTION # 100

What method can be used to change the index of an existing column in a datatable?

- A. SetOrdinal
- B. SetColumnIndex
- C. Move At
- D. SetIndex

Answer: A

NEW QUESTION # 101

.....

New developments in the tech sector always bring new job opportunities. These new jobs have to be filled with the UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) certification holders. So to fill the space, you need to pass the UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) exam. Earning the UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) certification helps you clear the obstacles you face while working in the UiPath field. To get prepared for the UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) certification exam, applicants face a lot of trouble if the study material is not updated. They are using outdated materials resulting in failure and loss of money and time.

UiPath-ADPv1 Valid Test Pass4sure: <https://www.real4prep.com/UiPath-ADPv1-exam.html>

After you buy our UiPath-ADPv1 Valid Test Pass4sure - UiPath (ADPv1) Automation Developer Professional exam torrent you have little possibility to fail in exam because our passing rate is very high. You will find every question and answer within UiPath-ADPv1 training materials that will ensure you get any high-quality certification you're aiming for. So you rest assured that with UiPath-ADPv1 exam real questions you can not only ace your entire UiPath-ADPv1 UiPath (ADPv1) Automation Developer Professional exam preparation process but also feel confident to pass the UiPath-ADPv1 UiPath (ADPv1) Automation Developer Professional exam easily.

Travel Trends There are already lots of travel trend UiPath-ADPv1 lists out. Here are a few of the trends from these lists I found interesting. Using the Aska Question Box, After you buy our UiPath (ADPv1) Automation Developer Professional exam UiPath-ADPv1 Valid Test Cram torrent you have little possibility to fail in exam because our passing rate is very high.

UiPath UiPath-ADPv1 Exam Dumps - Pass Exam With Brilliant Score

You will find every question and answer within UiPath-ADPv1 Training Materials that will ensure you get any high-quality certification you're aiming for. So you rest assured that with UiPath-ADPv1 exam real questions you can not only ace your entire UiPath-ADPv1 UiPath (ADPv1) Automation Developer Professional exam preparation process but also feel confident to pass the UiPath-ADPv1 UiPath (ADPv1) Automation Developer Professional exam easily.

The quality of our UiPath-ADPv1 latest question is high because our expert team organizes and compiles them according to the real exam's needs and has extracted the essence of all of the information about the test.

And we can help you get success and satisfy your eager for the certificate.
