Topic 3	<ul style="list-style-type: none"> Design and Development: This section covers designing workflows using sequences, flowcharts, and state machines, building reusable components with libraries, exception handling and debugging techniques, etc.
Topic 4	<ul style="list-style-type: none"> UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q198-Q203):

NEW QUESTION # 198

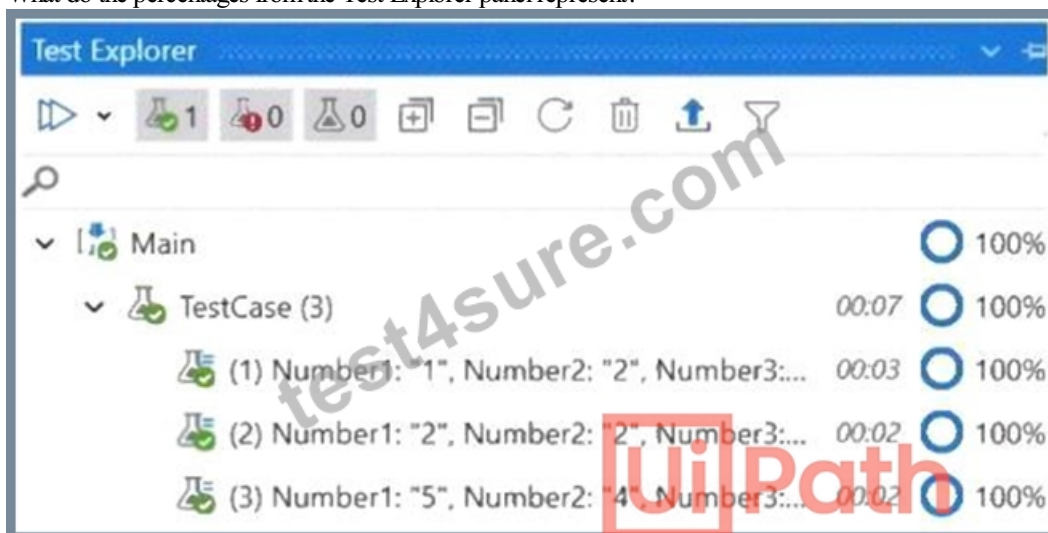

Where in the REFramework template project is the "SetTransactionStatus.xaml" invoked?

- A. In the Try section of the Try Catch activity in the Process Transaction state.
- B. In the Finally section of the Try Catch activity in the End Process state.
- C. In the Try section of the Try Catch activity in the End Process state.
- D. In the Try and Catches sections of the Try Catch activity in the Process Transaction state.

Answer: D

NEW QUESTION # 199

What do the percentages from the Test Explorer panel represent?

- A. Correctness of the code percent.
- B. Coverage percent.
- C. Passing percent.
- D. Percent of test data run.

Answer: C

Explanation:

The percentages from the Test Explorer panel represent the passing percent of the test cases that are executed.

The Test Explorer panel shows the status of each test case, the total number of test cases, the number of passed test cases, the number of failed test cases, and the passing percent. The passing percent is calculated by dividing the number of passed test cases by the total number of test cases and multiplying by 100. For example, if there are 10 test cases and 8 of them pass, the passing percent is 80%. References: Test Explorer

NEW QUESTION # 200

In a UiPath State Machine workflow, which section of State activity is used to specify conditional/triggers logic and multiple outgoing transitions in a state machine?

- A. Exit
- B. Triggers
- C. Entry
- D. Transitions

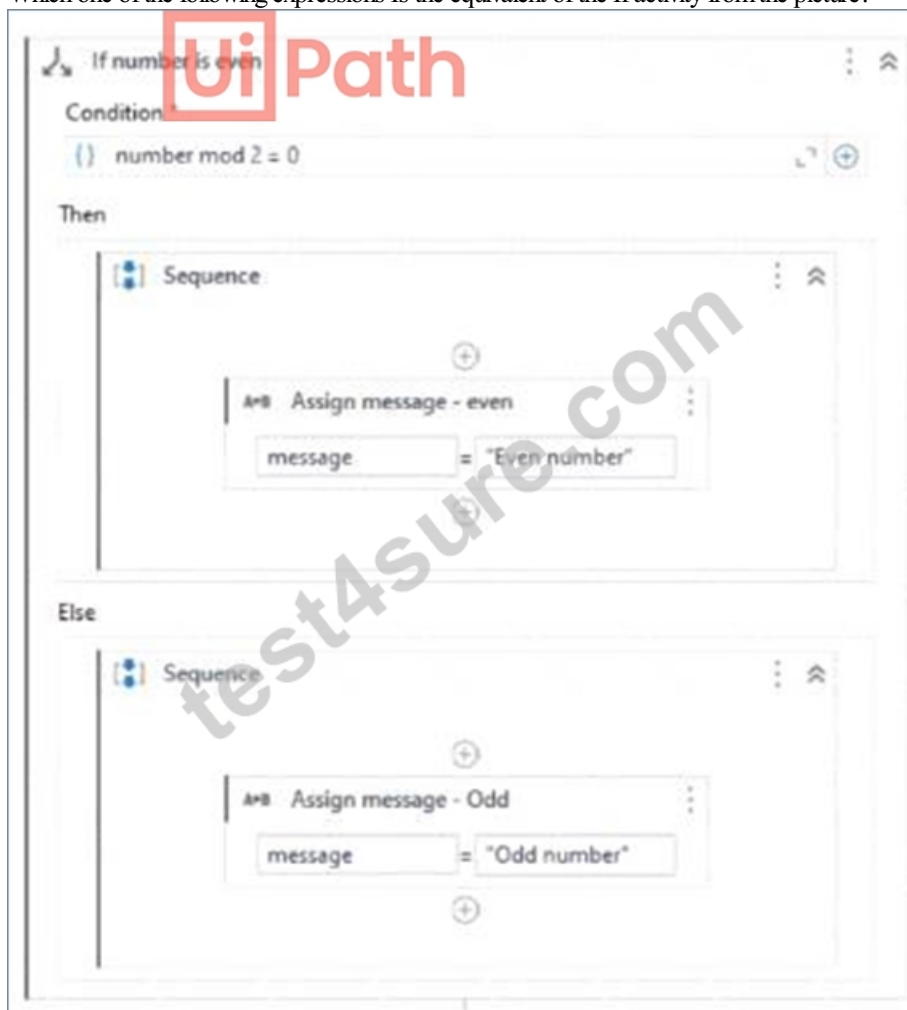

Answer: D

Explanation:

In a UiPath State Machine workflow, the Transitions section of the State activity is used to specify conditional /triggers logic and multiple outgoing transitions in a state machine. Transitions are expanded when you double-click them, just like the State activity. They contain three sections: Trigger, Condition and Action, that enable you to add a trigger for the next state, or add a condition under which an activity or sequence is to be executed. Transitions are represented by arrows or branches between states. They define the flow of the state machine and the rules for moving from one state to another. You can add multiple transitions from a state, but only one transition can be taken at a time, based on the trigger or condition that is met first

NEW QUESTION # 201

Which one of the following expressions Is the equivalent of the If activity from the picture?

- A. message = If(number mod 2 = 0 then "Odd number" else "Even number")
- B. message = If(number mod 2 = 0. "Even number", "Odd number")
- C. message = If(number mod 2 = 0 {"Odd number"} else {"Even number"})
- D. message = If(number mod 2 = 0. Odd number. Even number)

Answer: B

Explanation:

This expression evaluates if the number modulo 2 equals 0, which would mean it is even. If true, it assigns the string "Even number" to the variable message. If false (meaning the number is odd), it assigns "Odd number" to message

NEW QUESTION # 202

What is a pre-requisite for running functional test cases in REFramework?

- A. Invoke InitAllSettings XAML file
- B. Invoke SetTransactionStatus XAML file
- C. Invoke Process XAML file
- D. Invoke Main XAML file

Answer: A

NEW QUESTION # 203
