

UiPath UiPath-ADAv1 Latest Exam Review - UiPath-ADAv1 Training Questions

BONUS!!! Download part of Lead2PassExam UiPath-ADAv1 dumps for free: <https://drive.google.com/open?id=1C184ixNZ5hy0NgoW1oUUyGLzWThsKbHU>

The practice materials of the exam with low quality may complicate matters of the real practice exam. So, you must know about our UiPath-ADAv1 question torrent. Our study material is not same as other dumps or study tools, it not only has good quality but also has cheap price. We have most professional team to compiled and revise UiPath-ADAv1 Exam Question, in order to try our best to help you pass the exam and get a better condition of your life and your work.

UiPath UiPath-ADAv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• UI Automation: Here, the topic explains how UI Automation works and offer guidance on using the Modern Recorder and associated activities. It also covers UI synchronization and the configuration of static and dynamic descriptors.
Topic 2	<ul style="list-style-type: none">• Exception Handling: This topic focuses on error management, showcasing the use of Try Catch, Throw, and Rethrow activities, along with the Retry Scope feature, to handle exceptions gracefully.
Topic 3	<ul style="list-style-type: none">• Implementation Methodology: The section offers an overview of project implementation stages, interpretation of PDDs and SDDs, and the conduct of automation project peer reviews, ensuring a structured approach to development.
Topic 4	<ul style="list-style-type: none">• Variables and Arguments: This topic introduces data types and delves into creating, managing, and utilizing variables, arguments, and global constants• variables. It also clarifies the distinctions between these concepts, ensuring a comprehensive understanding of data handling in automation projects.
Topic 5	<ul style="list-style-type: none">• Working with Files and Folders: Here, you explore creating, managing, and navigating local files and folders, providing a foundation for file system automation.
Topic 6	<ul style="list-style-type: none">• Control Flow: The section explains the functionality of control flow activities and their impact on workflow types. It covers the use of sequence and flowchart layouts. Lastly, it focuses on implementing IF, For Each, and While activities, among others.
Topic 7	<ul style="list-style-type: none">• Platform Knowledge: The section provides an overview of UiPath's product suite, including Studio and Robot variants, Orchestrator, and Integration Service, showcasing their unique contributions. It also emphasizes the benefits of Academy, Forum, and Marketplace in the UiPath ecosystem.

Topic 8	<ul style="list-style-type: none"> • Integration Service: The section introduces Integration Service, explaining its purpose and demonstrating the use of connectors and triggers in automation projects to interact with external systems.
Topic 9	<ul style="list-style-type: none"> • Object Repository: This topic covers the creation, publication, and consumption of UI Libraries, including the use of static and dynamic descriptors, offering a structured approach to UI element management.
Topic 10	<ul style="list-style-type: none"> • Logging: The section provides insights into interpreting robot execution logs and adhering to logging best practices, ensuring effective issue identification and resolution.
Topic 11	<ul style="list-style-type: none"> • Excel Automation: The section delves into Excel Automation, showcasing the use of modern Excel activities and workbook-level operations.
Topic 12	<ul style="list-style-type: none"> • Email Automation: This topic covers retrieving emails via IMAP • POP3, sending SMTP messages, and managing integrations with Microsoft and Gmail accounts, utilizing their respective packages.
Topic 13	<ul style="list-style-type: none"> • Orchestrator: This topic covers the definition of Orchestrator entities, tenant entities, and folder entities, along with their respective functionalities. It also provides practical guidance on robot provisioning, workspace management, role assignments, and logging features.
Topic 14	<ul style="list-style-type: none"> • Studio Interface: Here, the topic guides users through installing Studio Community Edition and connecting to Orchestrator. It covers profile differences, backstage view options, compatibility modes, and package management. Additionally, it offers an in-depth exploration of the Studio interface and its various elements.
Topic 15	<ul style="list-style-type: none"> • Libraries and Templates: This topic covers the creation, publication, and consumption of process libraries, along with the sharing and access of templates, promoting efficient project development and standardization.
Topic 16	<ul style="list-style-type: none"> • Debugging: Here, we explore various debugging techniques, including debug modes, actions, and ribbon options. It also guides users through setting breakpoints, utilizing debugging panels, and optimizing performance with profile execution.
Topic 17	<ul style="list-style-type: none"> • Version Control Integration: The section highlights the benefits of version control by demonstrating the use of Studio's Git integration for adding projects, cloning repositories, committing changes, and managing branches.

UiPath-ADAv1 Training Questions - Pdf UiPath-ADAv1 Free

As is known to us, the high pass rate is a reflection of the high quality of UiPath-ADAv1 study torrent. The more people passed their exam, the better the study materials are. There are more than 98 percent that passed their exam, and these people both used our UiPath-ADAv1 Test Torrent. We believe that our UiPath-ADAv1 test torrent can help you improve yourself and make progress beyond your imagination. If you buy our UiPath-ADAv1 study torrent, we can make sure that our study materials will not be let you down.

UiPath Automation Developer Associate v1 Exam Sample Questions (Q91-Q96):

NEW QUESTION # 91

Where can a process be found, after being published from UiPath Studio and deployed as an automation in Orchestrator?

- A. Manage Packages
- B. Snippets Panel
- C. Resources Panel
- D. UiPath Assistant

Answer: D

Explanation:

A process can be found in the UiPath Assistant after being published from UiPath Studio and deployed as an automation in Orchestrator. UiPath Assistant is a desktop tool that enables users to easily access, manage, and run automation workflows on their machines. It displays all the available automations that the user can run, either from Orchestrator or locally. To run an automation from Orchestrator, the user needs to connect the UiPath Assistant to Orchestrator and synchronize the automations and settings with the cloud. The user can also add automations to the launchpad for quick and easy access, create custom folders and sections to organize the automations, view the status and progress of the running automations, and access the help and feedback options.

NEW QUESTION # 92

What happens when the area selection feature in the UiPath Computer Vision wizard is used?

- A. The selected area is automatically resized to fit all UI elements within it.
- **B. A portion of the application UI can be selected, which is helpful when dealing with multiple fields bearing the same label.**
- C. The selected area is treated as a single UI element, with no further analysis of its contents.
- D. A duplicated UI can be selected, and the copy is modified in the automation process.

Answer: B

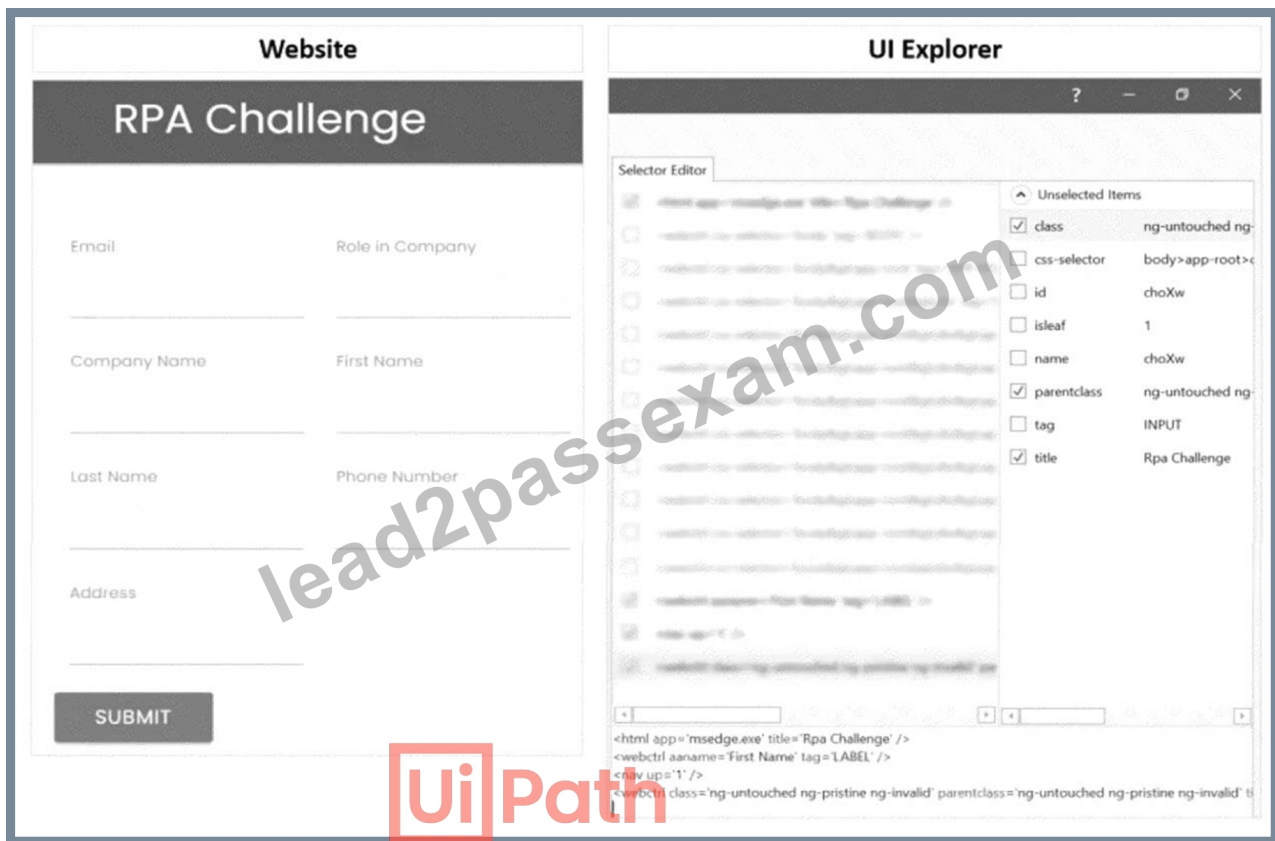

Explanation:

The area selection feature in the UiPath Computer Vision wizard is used to refine the scope of the UI elements that are detected by the Computer Vision activities¹. By using this feature, you can select a specific region of the application UI that you want to automate, and the wizard will only show the UI elements within that region. This is helpful when dealing with multiple fields bearing the same label, such as "Name" or "Address", as you can select only the field that you want to interact with². The selected area is not automatically resized, treated as a single UI element, or duplicated by the wizard.

NEW QUESTION # 93

In order to make the selector specifically target the "First Name" text field during runtime, the developer needs to select one additional Property checkbox from the Unselected Items column in the UI Explorer.

Which is the additional Property checkbox in the following UI Explorer "Unselected Items" column that should be used for the First Name text field.

- A. id
- B. name
- C. tag
- D. isleaf

Answer: A

Explanation:

To make a selector specifically target the "First Name" text field during runtime in the UI Explorer, the property that uniquely identifies the "First Name" field should be used. Based on the information provided, the most suitable property to use is the "id" as it is likely to be unique for each field in a form, which helps in precisely identifying the UI element.

NEW QUESTION # 94

What is an advantage of utilizing UiPath Orchestrator queues?

- A. Capability to track the status of Queue Items.
- B. Allows several robots to handle the same Queue Item simultaneously.
- C. Guarantees each queue is exclusively processed by a single robot, by default.
- D. Capability to modify the retry count at the queue level after its creation.

Answer: A

Explanation:

One of the key advantages of using UiPath Orchestrator queues is the ability to track the status of Queue Items. This feature allows for monitoring the progress of items as they are processed by robots, including whether they are new, in progress, successful, failed, or retried, among other statuses.
