UiPath UiPath-ADPv1 UiPath (ADPv1) Automation Developer Professional PDF Dumps - The Fastest Way To Prepare For Exam

In order to provide you with the best UiPath certification exam dumps forever, Actual4test constantly improve the quality of UiPath-ADPv1 exam dumps and update the dumps on the basis of the latest test syllabus at any time. Actual4test is your best choice on the market today and is recognized by all candidates for a long time. If you don't believe what I say, you can know the information by asking around. Somebody must have been using Actual4test dumps. We assure Actual4test provide you with the latest and the best questions and answers which will let you pass the UiPath-ADPv1 Exam at the first attempt.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q184-Q189):

NEW QUESTION # 184
You need to create a process where multiple events happen at the same time, and triggers must handle these events simultaneously in an attended automation.
How can you set up this parallel execution of triggers?

- A. Rely on the Form Builder to set up multiple events and manage their execution based on user input.

- B. Use the Enable Local Trigger activity to run all triggers at the same time once they are enabled.
- C. Use the Run Local Triggers activity to manage the simultaneous execution of multiple triggers within the project.
- D. Use the Trigger Scope activity to handle all events in a sequential manner rather than parallel.

Answer: C

Explanation:
To allow parallel execution of multiple local triggers, UiPath provides the Run Local Triggers activity. It monitors all defined triggers simultaneously and allows the automation to react to whichever is activated first, supporting more dynamic and responsive attended automation solutions.
Reference:UiPath Activities Guide > Triggers > Run Local Triggers

NEW QUESTION # 185
In which scenarios can the Add Attachment option in UiPath.WebAPI.Activities.HttpClient be enabled?

- A. Only when the Request Method is set to POST or PUT.
- B. Only when the Authentication protocol is set to OAuth1 or OAuth2.
- C. Only when the Request Method is set to GET or DELETE.
- D. Only when the Request Method is set to HEAD or OPTIONS.

Answer: A

Explanation:
The Add Attachment option is available in the UiPath.WebAPI.Activities.HttpClient activity only when using POST or PUT methods, as these methods are designed for sending data (such as files or form data) to the server. GET, DELETE, HEAD, and OPTIONS methods do not support body content in the same way and are typically used for retrieval or metadata operations.
Reference:UiPath Web API Activities Guide > HTTP Request Activity > Request Configuration

NEW QUESTION # 186
How can a process be converted from a toreground process to a background process?

- A. A process may be turned into a Background Process by adding a "Background" tag to the process name as long as it does/does not contain Ul interaction. You need to go to the Project Settings and modify the name of the process.
- B. A process may be turned into a Background Process as long as it does not contain activities with Ul interaction You need to go to the Project Settings window and set the Starts in Background toggle to Yes.
- C. A process may be turned into a Background Process by just deleting the UiAutomation package dependency as long as it does/does not contain Ul interaction
- D. A process may be turned into a Background Process as long as it does not contain persistence activities.
  You need to go to the Project Settings window and set the Supports Persistence toggle to No.

Answer: B

Explanation:
Converting a process into a background process in UiPath is accomplished by ensuring the process does not contain UI interaction and setting the "Starts in Background" toggle to Yes in the Project Settings. This is crucial for processes meant to run without user interface interaction.

NEW QUESTION # 187
Given the following list of arguments:

Name	Direction	Type	Value
in_numArray	In	Int32[]	{2,5,1,7,9,4,8}
out_numVar	Out	Int32	numVar

Create Argument

Invoked code arguments

OK   Cancel

and the following code:

Code Editor

VB.Net Code

```
1    out_numVar = 0
2    Dim i As Integer
3    For i = 0 To in_numArray.Length-1
4      If in_numArray(i) > out_numVar Then
5        out_numVar = in_numArray(i)
6      End If
7    Next i
```

OK   Cancel
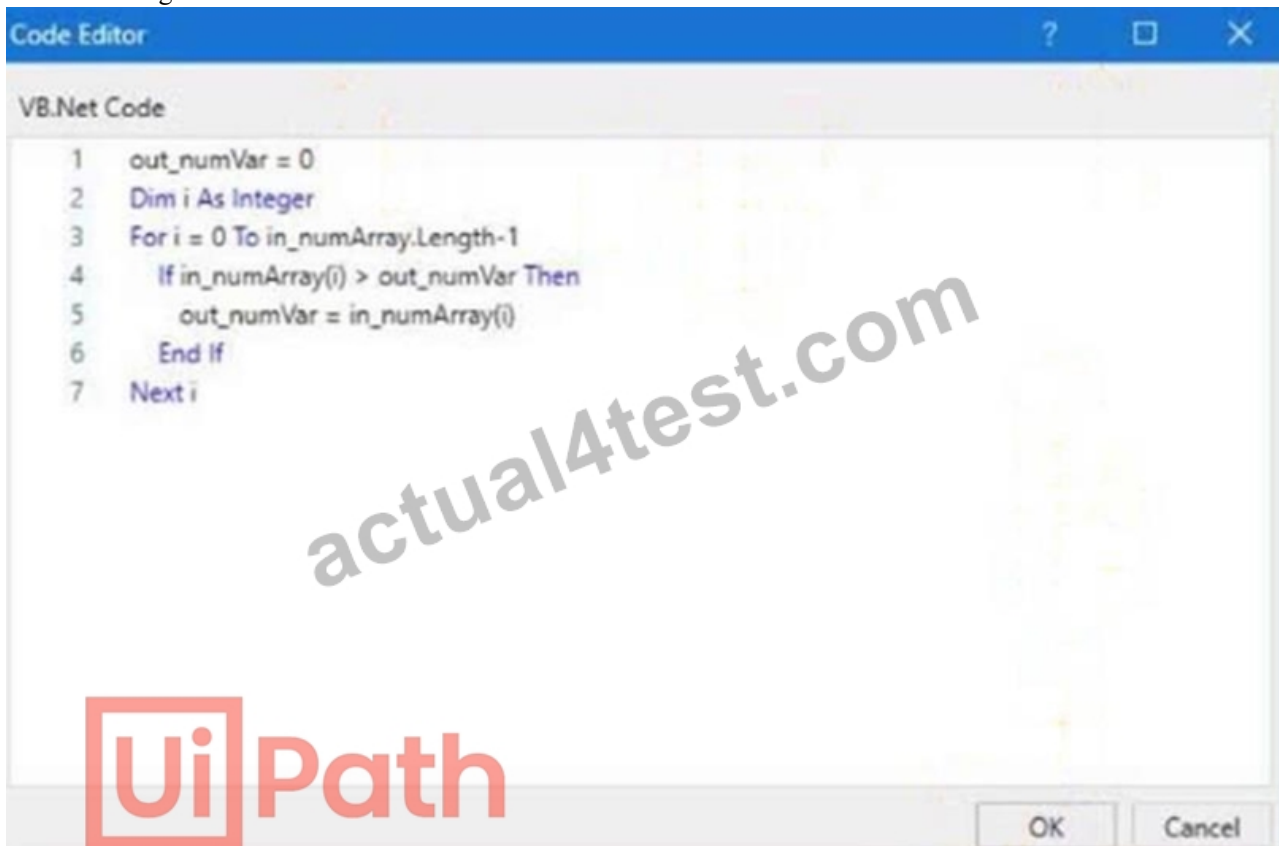

What is the value that will be displayed in the Output Panel at the end of the sequence below:
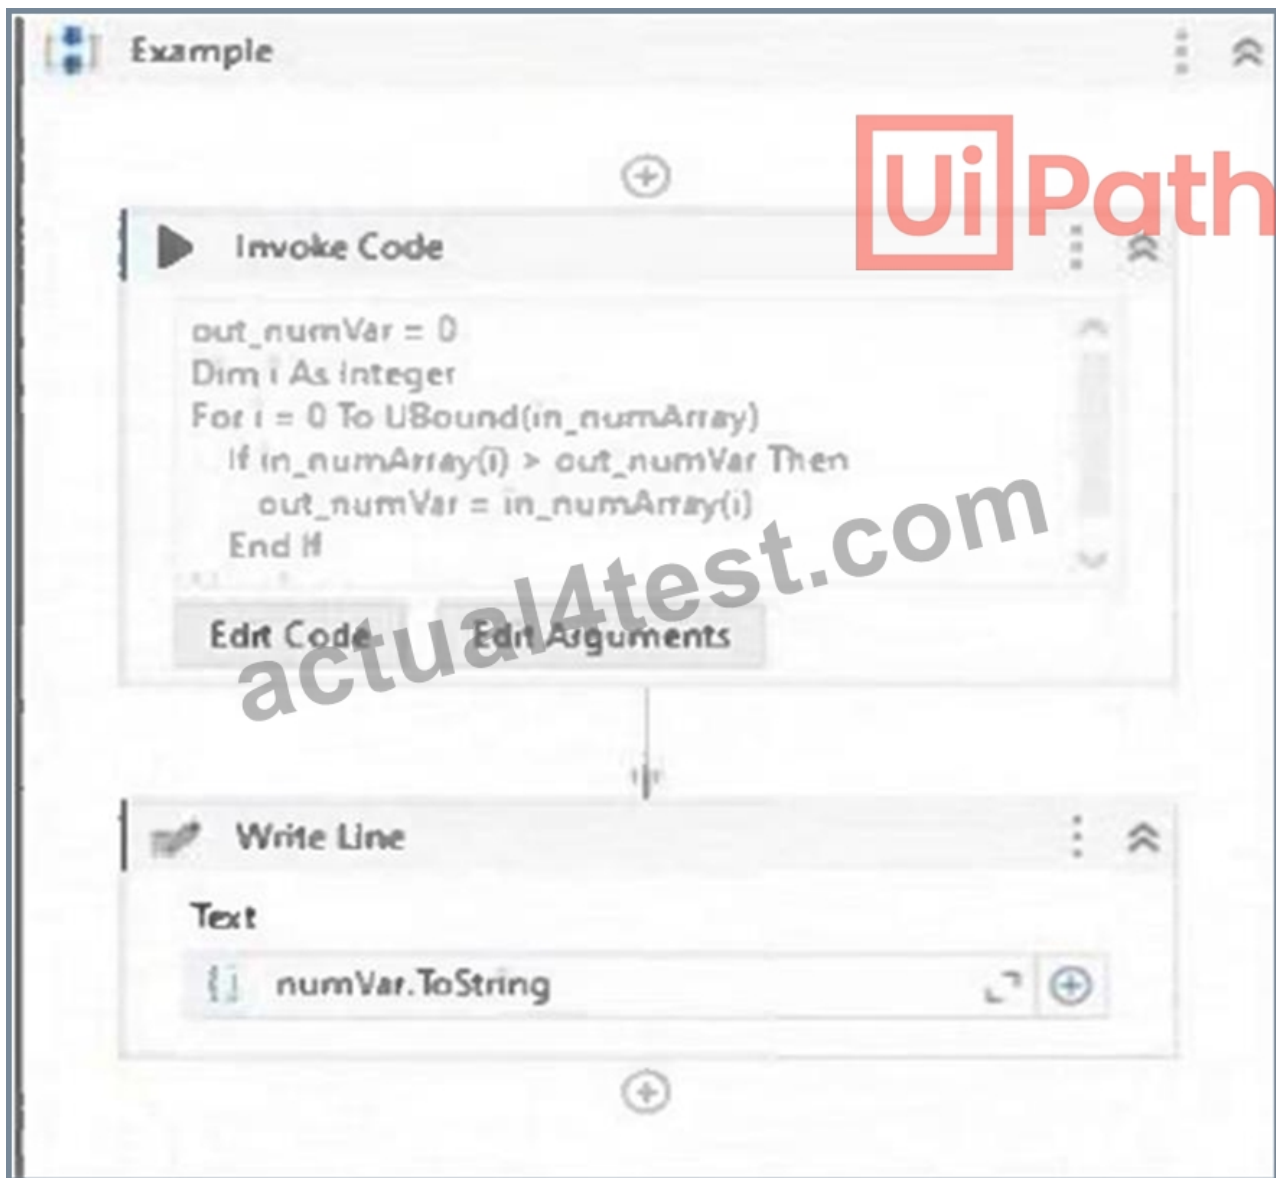

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:
The value that will be displayed in the Output Panel at the end of the sequence is 9. This is because the code in the Invoke Code activity is looping through the array in_numArray and setting the variable out_numVar to the highest value in the array. The array in_numArray has the values {1, 2, 7, 9, 4} as shown in the list of arguments. The variable out_numVar is initialized to 0. The For loop iterates from 0 to the upper bound of the array, which is 4. In each iteration, the If condition checks if the current element of the array is greater than the current value of out_numVar. If it is, then out_numVar is assigned to the current element of the array. Otherwise, out_numVar remains unchanged. Therefore, after the first iteration, out_numVar becomes 1. After the second iteration, out_numVar becomes 2. After the third iteration, out_numVar becomes 7. After the fourth iteration, out_numVar becomes 9. After the fifth iteration, out_numVar remains 9, since 4 is not greater than 9. The Write Line activity outputs the value of out_numVar to the console, which is
9. References: Invoke Code

NEW QUESTION # 188
The provided exhibit displays the representation of the "Deadline" field using the yyyy-mm-dd format.

Queue Item Name	Deadline	Priority
EmployeeID1		Normal
EmployeeID2	2050-01-01	High
EmployeeID3	2050-01-02	High
EmployeeID4	2050-01-01	Normal
EmployeeID5	2050-01-02	Low
EmployeeID6		High
EmployeeID7	2050-01-01	Low
EmployeeID8	2050-01-01	Normal
EmployeeID9		Low

In what order should the Queue Items be processed by a single robot executing a Performer workflow?

Queue Item

EmployeeID1	EmployeeID2	EmployeeID3
EmployeeID4	EmployeeID5	EmployeeID6
EmployeeID7	EmployeeID8	EmployeeID9

Order to be Processed

1st
2nd
3rd
4th
5th
6th
7th
8th
9th

Answer:

Explanation:

Queue Item				Order to be Processed	
EmployeeID1	EmployeeID2	EmployeeID3		1st	EmployeeID2
EmployeeID4	EmployeeID5	EmployeeID6		2nd	EmployeeID6
EmployeeID7	EmployeeID8	EmployeeID9		3rd	EmployeeID7
				4th	EmployeeID1
				5th	EmployeeID4
				6th	EmployeeID8
				7th	EmployeeID3
				8th	EmployeeID5
				9th	EmployeeID9

Explanation:

Order to be Processed

1st	EmployeeID2
2nd	EmployeeID6
3rd	EmployeeID7
4th	EmployeeID1
5th	EmployeeID4
6th	EmployeeID8
7th	EmployeeID3
8th	EmployeeID5
9th	EmployeeID9

NEW QUESTION # 189

......

Our considerate service is not only reflected in the purchase process, but also reflected in the considerate after-sales assistance on our UiPath-ADPv1 exam questions. We will provide considerate after-sales service to every user who purchased our UiPath-ADPv1 practice materials. If you have any questions after you buy our UiPath-ADPv1 study guide, you can always get thoughtful support and help by email or online inquiry. If you neeed any support, and we are aways here to help you.
