UiPath UiPath-SAIAv1 Exam Dumps For Ultimate Success 2025

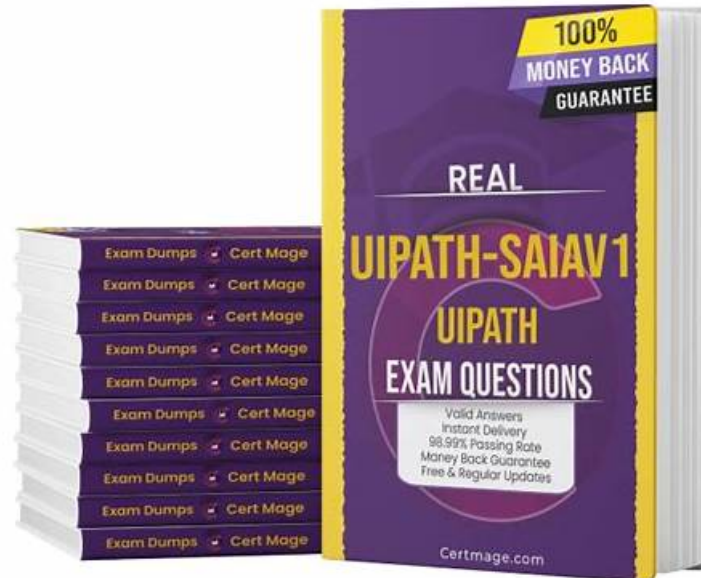

DOWNLOAD the newest TestPassKing UiPath-SAIAv1 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1NNYSKnafGwPmftMBMjWKAAL8bocp0SJF

As one of the most professional dealer of UiPath-SAIAv1 practice questions, we have connection with all academic institutions in this line with proficient researchers of the knowledge related with the UiPath-SAIAv1 exam materials to meet your tastes and needs, please feel free to choose. And we have three versions of UiPath-SAIAv1 training guide: the PDF, Software and APP online for you. You can choose the one which you like best.

TestPassKing also presents desktop-based UiPath UiPath-SAIAv1 practice test software which is usable without any internet connection after installation and only required license verification. UiPath Specialized AI Associate Exam (2023.10) (UiPath-SAIAv1) practice test software is very helpful for all those who desire to practice in an actual UiPath Specialized AI Associate Exam (2023.10) (UiPath-SAIAv1) exam-like environment. UiPath Specialized AI Associate Exam (2023.10) (UiPath-SAIAv1) practice test software contains many UiPath UiPath-SAIAv1 practice exam designs just like the real UiPath Specialized AI Associate Exam (2023.10) (UiPath-SAIAv1) exam.

2025 Certification UiPath-SAIAv1 Sample Questions | Reliable UiPath UiPath-SAIAv1 Certification Training: UiPath Specialized AI Associate Exam (2023.10)

All these three TestPassKing UiPath Specialized AI Associate Exam (2023.10) (UiPath-SAIAv1) exam questions formats are easy to use and perfectly work with all devices, operating systems, and the latest web browsers. So rest assured that with the UiPath-SAIAv1 Exam Dumps you will get everything that you need to learn, prepare and pass the challenging UiPath-SAIAv1 exam with good scores.

UiPath Specialized AI Associate Exam (2023.10) Sample Questions (Q67-Q72):

NEW QUESTION # 67

For which version(s) from Out-of-the-Box ML Packages minor versions is the download functionality available?

- A. Version 0 and above
- B. Version 0 only
- C. Version 1 and above
- D. Version 1 only

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

UiPath AI Center allowsdownloading only Out-of-the-Box ML packages from version 1 and above.

* Version 0 is consideredexperimental or in preview, and the download functionality isnot availablefor those.

* This is important when users want to clone or retrain these models.

* UiPath Documentation Reference:Managing ML Packages - AI Center

NEW QUESTION # 68

What can the Custom Named Entity Recognition out-of-the-box model be used for?

- A. Understand sentiment in product reviews, customer surveys, social media posts, and emails.
- B. Extract and classify text in emails, letters, web pages, research papers, and call transcripts.
- C. Classify text in resumes, emails, web pages, and other formats.
- D. Relate customer questions to FAQ documents and automatically pull responses from these documents.

Answer: B

Explanation:

The Custom Named Entity Recognition out-of-the-box model is a machine learning package that allows you to bring your own dataset tagged with entities you want to extract from unstructured text. The model can be trained and deployed using the UiPath AI Center, and can be integrated with the UiPath Document Understanding framework. The model can be used to extract and classify text in various domains and formats, such as emails, letters, web pages, research papers, and call transcripts. For example, you can use the model to extract information such as names, dates, addresses, amounts, products, or any other custom entity from your documents. The model supports multiple languages and can be customized according to your needs.

NEW QUESTION # 69

When processing a document type that comes in a high variety of layouts, what is the recommended data extraction methodology?

- A. Manual data extraction.
- B. Model-based data extraction.
- C. Hybrid data extraction.
- D. Rule-based data extraction.

Answer: C

Explanation:

Based on the classification of documents, there are two common types of data extraction methodologies: rule- based data extraction and model-based data extraction1. Rule-based data extraction targets structured documents, while model-based data extraction is used to process semi-structured and unstructured documents1. However, neither of these methods alone can handle the high variety of layouts that some document types may have. Therefore, a hybrid data extraction approach is recommended, which combines the strengths of both methods and allows for more flexibility and accuracy23. A hybrid data extraction approach can use one or more extractors, such as RegEx Based Extractor, Form Extractor, Intelligent Form Extractor, Machine Learning Extractor, or FlexiCapture Extractor, depending on the document type and the fields of interest3. The Data Extraction Scope activity in UiPath enables the configuration and execution of a hybrid data extraction methodology, by allowing the user to customize which fields are requested from each extractor, what is the minimum confidence threshold for a given data point extracted by each extractor, what is the taxonomy mapping, at field level, between the project taxonomy and the extractor's internal taxonomy (if any), and how to implement "fall-back" rules for data extraction2.

NEW QUESTION # 70

What does the following expression do?

subTotalAdditions.Select(Function(field) CDec(documentFields(field))).ToList.Sum() + subtotal

- A. Sums up subtotal fields from the config file converted to CDec with the subtotal.
- B. Sums up all the line amounts converted to CDec and the subtotal
- C. Sums up all the line amounts and converts the fields to CDec.
- D. Sums up the subtotal to the total variable by converting it to CDec

Answer: B

Explanation:

The expression does the following:

It uses the subTotalAdditions variable, which is a list of field names that represent the line amounts in the document.

It uses the Select method to apply a function to each element of the list. The function takes a field name as an argument and returns the value of the corresponding document field converted to a decimal number using the CDec function.

It uses the ToList method to convert the result of the Select method into a list of decimal numbers.

It uses the Sum method to calculate the sum of the elements in the list.

It adds the subtotal variable, which is another decimal number, to the sum.

The expression returns the total amount of the document, which is the sum of all the line amounts and the subtotal.

NEW QUESTION # 71

How do you use the Generative Classifier within UiPath Document Understanding Cloud APIs to classify a document as either an "Invoice" or a "Receipt"?

- A. By sending a GET request to /api/framework/projects/{projectld}/classifiers/generative_classifier /classification with a body containing prompts that specify the 'Invoice' and 'Receipt' names and descriptions.
- B. By sending a POST request to yapi/framework/projectsy{projectld}/ctassifiers/generative_classifier /classification with a body containing prompts that specify the 'Invoice' and 'Receipt' names and descriptions.
- C. By sending a POST request to /api/framework/projects/{projectld}/classifiers/generative_classifier /dassification with a body containing prompts that specify the 'Invoice' and 'Receipt' names and a description for their fields.
- D. By sending a PUT request to /api/framework/proiects/{projectld}/classifiers/generative_classifier /classification without any specific classification details in the body of the request.

Answer: B

Explanation:

In UiPath Document Understanding Cloud APIs, the Generative Classifier is used to classify documents by leveraging a generative AI model. To classify a document as either an "Invoice" or a "Receipt," a POST request must be sent to the /api/framework/projects/{projectId}/classifiers/generative_classifier/classification endpoint. The body of this request should contain prompts specifying the classification types (in this case,

"Invoice" and "Receipt") along with their corresponding descriptions. This allows the model to correctly classify incoming documents based on these predefined prompts.

UiPath Document Understanding API Documentation: Cloud API for Classification Generative Classifier APIs: UiPath Classification APIs

NEW QUESTION # 72

......

There are many users who worry that if they fail to pass the exam after purchasing our UiPath-SAIAv1 latest exam torrents, the money will be wasted, and the cost of the test seems too great to be worth. The UiPath-SAIAv1 exam questions in order to let users do not have such concerns, solemnly promise all users who purchase the UiPath-SAIAv1 latest exam torrents, the user after failed in the exam as long as to provide the corresponding certificate and failure scores scanning or screenshots of UiPath-SAIAv1 Exam, we immediately give money refund to the user, and the process is simple, does not require users to wait too long a time. Of course, if you have any other questions, users can contact the customer service of UiPath-SAIAv1 test torrent online at any time, they will solve questions as soon as possible for the users, let users enjoy the high quality and efficiency refund services.
