SAP C-SEC-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.

Topic 2	<ul style="list-style-type: none"> • Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.
Topic 3	<ul style="list-style-type: none"> • SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.
Topic 4	<ul style="list-style-type: none"> • User Administration: This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.
Topic 5	<ul style="list-style-type: none"> • Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.

SAP Certified Associate - Security Administrator Sample Questions (Q57-Q62):

NEW QUESTION # 57

Which archiving objects are relevant for archiving change documents for user master records? Note: There are 2 correct answers to this question.

- A. US_PROF
- B. US_USER
- C. US_PASS
- D. US_AUTH

Answer: B,D

Explanation:

* Context: Archiving change documents for user master records ensures compliance and reduces database size.

* Solution Explanation:

* US_USER: Relevant for changes to user master data.

* US_AUTH: Pertains to changes in user authorization assignments.

SAP Security References:

* SAP Archiving and Data Management Guide

* SAP Help Portal for User Master Data Archiving

NEW QUESTION # 58

Which privilege types are available in SAP HANA Cloud? Note: There are 3 correct answers to this question.

- A. Object
- B. System
- C. Package
- D. Application
- E. Analytic

Answer: A,B,C

Explanation:

* Context: Privileges in SAP HANA Cloud define access control and permissions for various system entities.

* Solution Descriptions:

- * B. Package: Grants permissions for packages, a logical grouping of objects.
 - * C. System: Controls system-level actions and configurations.
 - * E. Object: Provides access control at the object level.
- SAP Security References:
- * SAP HANA Cloud Privilege Management Documentation

NEW QUESTION # 59

Which SAP Fiori deployment option requires the Cloud connector?

- A. SAP S/4HANA embedded
- B. SAP Fiori for SAP S/4HANA standalone front-end server
- C. SAP S/4HANA Cloud Public Edition
- **D. SAP Business Technology Platform**

Answer: D

Explanation:

The SAP Business Technology Platform (BTP) deployment option for SAP Fiori requires the Cloud connector. The Cloud connector serves as a secure tunnel between SAP BTP and on-premise systems, enabling Fiori apps hosted on BTP to access data and services from on-premise SAP S/4HANA or other systems. It ensures secure communication without exposing on-premise systems to the public internet, supporting hybrid scenarios. SAP S/4HANA Cloud Public Edition operates entirely in the cloud, not requiring the Cloud connector for Fiori access. SAP Fiori for SAP S/4HANA standalone front-end server and SAP S/4HANA embedded deployments typically run within the same system or network, using direct connections rather than the Cloud connector. By requiring the Cloud connector for BTP, SAP ensures secure and efficient integration of Fiori apps with on-premise back-ends, supporting flexible deployment models while maintaining robust security standards in hybrid cloud environments.

NEW QUESTION # 60

What is the correct configuration setting in table PRGN_CUST for user assignments when transporting roles within a Central User Administration scenario?

- A. USER_REL_IMPORT = YES
- **B. USER_REL_IMPORT = NO**
- C. SET_IMP_LOCK_USERS = NOO
- D. SET_IMP_LOCK_USERS = YES

Answer: B

Explanation:

* Context: When transporting roles in a Central User Administration (CUA) scenario, certain configurations in table PRGN_CUST affect user assignments.

* Solution Explanation:

* Setting USER_REL_IMPORT = NO ensures that user assignments are not transported along with roles, maintaining assignment control in the target system.

SAP Security References:

* SAP CUA Role Transport Documentation

* SAP PRGN_CUST Configuration Guide

NEW QUESTION # 61

When performing a comparison from the imparting role, what happens to the organizational level field values in the derived role?

Note: There are 2 correct answers to this question.

- **A. Data for organizational levels is transferred only when authorization data for the derived role is first modified.**
- B. Data for organizational levels is always transferred when authorization data for the derived role is modified.
- **C. Data for organizational levels that have already been maintained in the derived role is NOT overwritten.**
- D. Data for organizational levels that have already been maintained in the derived role is overwritten.

Answer: A,C

Explanation:

When comparing an imparting role to a derived role:

* Preservation of Data (B): If organizational levels have already been maintained in the derived role, they are not overwritten to preserve specific configurations.

* Conditional Data Transfer (C): Organizational data is transferred only when the authorization data in the derived role is being modified for the first time.

SAP Security References:

* SAP Role Derivation Best Practices Guide

* SAP Help Portal: Derived Role Maintenance
