

Unparalleled GH-100 Reliable Braindumps Free - 100% Pass GH-100 Exam

Exam4Labs is a website to provide Microsoft certification exam training tool for people who attend Microsoft certification exam examinee. Exam4Labs's training tool has strong pertinence, which can help you save a lot of valuable time and energy to pass GH-100 certification exam. Our exercises and answers are very close to true GH-100 examination questions. IN a short time of using Exam4Labs's simulation test, you can 100% pass the exam. So spending a small amount of time and money in exchange for such a good result is worthwhile. Please add Exam4Labs's training tool in your shopping cart now.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	• Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.
Topic 2	• Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.
Topic 3	• Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI • CD pipelines.
Topic 4	• Support GitHub Enterprise for users and key stakeholders: This section of the exam measures skills of GitHub Enterprise Administrators and covers supporting users, identifying issues that can be resolved internally versus those needing GitHub Support, and generating support bundles and diagnostics. It also involves recognizing underutilized features, managing workflows like branching and pull requests, understanding CI • CD strategies, recommending tooling, and extending capabilities through APIs or Marketplace apps.
Topic 5	• Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.

GH-100 New Study Materials - GH-100 Test Answers

You will remain updated with the GH-100 practice test style, evaluate and improve your concepts. Users of the software can improve what they lack before Microsoft GH-100 final exam. Practicing for the GH-100 Practice Test, again and again, can be nerve-wracking, so in this situation Exams. Microsoft offer an easy-to-use GH-100 PDF questions file.

Microsoft GitHub Administration Sample Questions (Q52-Q57):

NEW QUESTION # 52

Which of the following is a benefit of creating a new GitHub organization?

- A. Automatic inheritance of policies from other organizations.
- **B. Clear separation of regges, projects, teams, billing, and organization-specific policies.**
- C. Reduced administrative overhead.
- D. Simplified collaboration across all organizations.

Answer: B

Explanation:

Creating a new organization gives you a dedicated container for your shared work, letting you isolate repositories, projects, teams, billing settings, and policy configurations on an organization-by-organization basis.

NEW QUESTION # 53

What benefit does GitHub Advanced Security provide?

- A. helps organization administrators analyze and configure permissions to the least privilege required
- B. helps organization administrators manage security tokens
- **C. helps developers improve and maintain the security and quality of code**
- D. helps enterprise administrators improve and maintain network security for their GitHub Enterprise Server instances

Answer: C

Explanation:

GitHub Advanced Security equips developers with built-in code scanning (CodeQL), secret scanning, dependency review, and other AppSec tools - helping them find, fix, and prevent security vulnerabilities while maintaining code quality.

NEW QUESTION # 54

Which events from the audit log are exposed by the GraphQL API? Each answer presents a complete solution. (Choose three.)

- **A. changes in permissions**
- B. cloning of repositories
- **C. changes to permissions of a GitHub App**
- **D. promoting users to administrators**
- E. pushes to repositories

Answer: A,C,D

Explanation:

The GraphQL Audit Log API surfaces entries whenever repository or organization permissions are changed ("Changes permissions").

It records when users are elevated to administrative roles ("Promotes users to admin").

It logs alterations to a GitHub App's granted permissions ("Changes permissions of a GitHub App").

NEW QUESTION # 55

Which of the following is true about outside collaborators in a GitHub organization?

- A. They are granted explicit access to specific repositories.
- B. They appear in the organization's internal member list.
- C. They inherit organization-wide policies, such as SSO requirements.
- D. They have access to all private repositories by default.

Answer: A

Explanation:

Outside collaborators aren't organization members; instead, they're granted explicit access - at read, write, or admin level - to only the repositories you choose.

NEW QUESTION # 56

Which of the following is the responsibility of an Organization Owner in GitHub? (Choose three.)

- A. View and manage organization billing information.
- B. Access repositories only if explicitly granted by a team maintainer.
- C. Create repositories without approval from other members.
- D. Manage organization settings, such as configuration and default permissions.

Answer: A,C,D

Explanation:

Organization owners can view and edit billing information for the organization.

Organization owners may create new repositories in the organization without needing approval from other members.

Organization owners have full administrative control over organization settings, including configuring default repository permissions.

NEW QUESTION # 57

.....

Exam4Labs Microsoft GH-100 exam materials contain the complete unrestricted dump. So with it you can easily pass the exam. Exam4Labs Microsoft GH-100 exam training materials is a good guidance. It is the best training materials. You can use the questions and answers of Exam4Labs Microsoft GH-100 Exam Training materials to pass the exam.
