page=pra 160&showNav=true&expandNav=true

NEW QUESTION #11

Which describes the Scrum Master role in Scrum?

- A. It is responsible for ensuring that product backlog items are clearly expressed on the product backlog
- B. It is authorized to run the project on a day-to-day basis on behalf of the project board
- C. It is servant-leadership to help everyone change their interactions to maximize the value created by the team
- D. It is empowered to organize and manage its own work to create a valuable, useful increment every sprint

Answer: A

NEW QUESTION #12

Which is often used during a retrospective to capture lessons?

- A. A Glad! Sad! Mad! board
- B. A burn chart
- C. A Gantt chart
- D. A Kanban board

Answer: A

Explanation:

showNav=true&expandNav=true&page=PRA_41

NEW QUESTION #14

What is used to address aspects of project and product development such as problem solving and release planning?

- A. Agilometer
- B. Delegation matrix
- C. Agile workshops
- D. Project log

Answer: C

Explanation:

Agile workshops are collaborative sessions used throughout the project to address various aspects such as problem-solving, release planning, team alignment, and continuous improvement. Workshops encourage open communication, collective decision-making, and foster a shared understanding of goals and challenges.

Unlike a delegation matrix, which defines roles and authorities, or the project log, which records issues and risks, workshops are interactive events that enable timely resolution of challenges. The Agilometer is a diagnostic tool assessing agility maturity but not a problem-solving forum.

Agile workshops embody the agile principle of collaboration and adaptability, enabling teams to respond quickly to issues and refine plans collectively.
