MB-700 Reliable Exam Camp, MB-700 Examinations Actual Questions

Microsoft MB-700 certification can guarantee you have good job prospects, because Microsoft certification MB-700 exam is a difficult test of IT knowledge, passing Microsoft Certification MB-700 Exam proves that your IT expertise is strong and you can be qualified for a good job.

Microsoft MB-700 Certification Exam is designed for professionals who are seeking to earn the Microsoft Dynamics 365: Finance and Operations Apps Solution Architect certification. Microsoft Dynamics 365: Finance and Operations Apps Solution Architect certification validates the skills and knowledge required to design and implement solutions that support financial operations in businesses. Microsoft Dynamics 365: Finance and Operations Apps Solution Architect certification exam measures the candidate's abilities to create and design financial management architecture, analyze and evaluate financial data, and manage financial operations effectively.

Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q258-Q263):

NEW QUESTION # 258

A company implements Dynamics 365 finance and operations apps for its retail operations.

Unauthorized vendor checks have been created in the past resulting in check fraud.

The company must print a vendor aging report from a local printer in its headquarters location every week on Sunday night.

Every week on Monday, the comptroller must review the report and approve checks to issue to vendors.

You need to recommend a solution to meet the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Prevent check fraud.	☐ Electronic reporting ☐ Three-way matching ☐ Dynamics 365 Fraud Protection ☐ Positive pay
Print the vendor aging report.	☐ Document Routing Agent ☐ Electronic reporting ☐ Document reporting services ☐ Print and Document Services

Answer:

Explanation:

Requirement	Solution
Prevent check fraud.	☐ Electronic reporting ☐ Three-way matching ☐ Dynamics 365 Fraud Protection ☐ Positive pay
Print the vendor aging report.	☐ Document Routing Agent ☐ Electronic reporting ☐ Document reporting services ☐ Print and Document Services

Explanation:

Box 1: Positive Pay

Positive Pay within Dynamics AX is one of the easiest systems to put into place to help prevent check fraud and protect your business. Positive Pay generates an electronic file that you can submit to your bank with a list of your approved checks, reducing the chance of processing any fraudulent checks.

Box 2: Electronic reporting

Electronic reporting (ER) is a configurable tool that helps you create and maintain regulatory electronic reporting and payments.

You can use ER to configure formats for both incoming and outgoing electronic documents in accordance with the legal requirements of various countries and regions. ER lets you manage these formats during their lifecycle. For example, you can adopt new regulatory requirements and generate business documents in the required format to electronically exchange information with government bodies, banks, and other parties.

The ER engine is targeted at business users instead of developers. Because you configure formats instead of code, the processes for creating and adjusting formats for electronic documents are faster and easier.

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/general-electronic-reporting>

NEW QUESTION # 259

A company plans to use Dynamics 365 finance and operations apps.

Code builds for new development must follow Microsoft's recommendations by using supported tools.

Virtual machine (VM) environments are required for the following usage:

- * Develop code.
- * Centrally merge all code in a structured way.

You need to implement a code management solution.

Which tools should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
Lifecycle Services (LCS)	Deploy developer VMs.	Tool
Azure DevOps	Keep developer VMs updated with the latest code.	Tool
Git	Deploy new code to the build environment.	Tool
Azure portal		

Answer:

Explanation:

Tools	Requirement	Tool
Lifecycle Services (LCS)	Deploy developer VMs.	Lifecycle Services (LCS)
Azure DevOps	Keep developer VMs updated with the latest code.	Azure DevOps
Git	Deploy new code to the build environment.	Git
Azure portal		

Explanation:

Box 1: Lifecycle Services (LCS)

Deploying cloud development environments

To deploy a cloud development environment in your LCS project:

- * Create a connection between an LCS project and your Azure subscription. You will need your Azure subscription ID and authorize the use of the subscription.
- * Select + under Environments to deploy.
- * Select an application and platform version.

- * Select an environment topology. For more information, see [Sign up for preview subscriptions](#).
- * If you chose a cloud-hosted environment, select which Azure connector you want to use. Then select
- * Deploy.

Box 2: Azure DevOps

Azure DevOps provides developer services for allowing teams to plan work, collaborate on code development, and build and deploy applications. Azure DevOps supports a collaborative culture and set of processes that bring together developers, project managers, and contributors to develop software.

Box 3: Git

Git is a DevOps tool used for source code management. It is a free and open-source version control system used to handle small to very large projects efficiently. Git is used to tracking changes in the source code, enabling multiple developers to work together on non-linear development.

NEW QUESTION # 260

You need to correctly structure the master data.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Option
Vendors with multiple ship to addresses.	▼ Business address Invoice-to account Vendor group Vendor posting profile
International and domestic customer receivables.	▼ Customer group Customer segment Default dimensions Financial dimensions

Answer:

Explanation:

Issue	Option
Vendors with multiple ship to addresses.	▼ Business address Invoice-to account Vendor group Vendor posting profile
International and domestic customer receivables.	▼ Customer group Customer segment Default dimensions Financial dimensions

Explanation

Graphical user interface, text, application, chat or text message Description automatically generated

Issue	Option
Vendors with multiple ship to addresses.	Business address Invoice to account Vendor group Vendor posting profile
International and domestic customer receivables.	Customer group Customer segment Default dimensions Financial dimensions

NEW QUESTION # 261

You are an architect implementing Dynamics 365.

The Dynamics 365 administrator who manages deployments of components leaves the company. Microsoft Azure DevOps pipelines must be configured to automate deployments.

You need to recommend which Microsoft Azure DevOps pipeline tasks to use to meet the requirements. What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Task
Add a package to a Lifecycle Services (LCS) project asset library.	Dynamics Lifecycle Services (LCS) Asset Upload Dynamics Lifecycle Services (LCS) Asset Deployment Create Deployable Package Add Licenses to Deployable Package Update Model Version
Add a package from a Lifecycle Services (LCS) project asset library to a non-production environment.	Dynamics Lifecycle Services (LCS) Asset Upload Dynamics Lifecycle Services (LCS) Asset Deployment Create Deployable Package Add Licenses to Deployable Package Update Model Version
Compile binaries into a package for build and release pipelines.	Dynamics Lifecycle Services (LCS) Asset Upload Dynamics Lifecycle Services (LCS) Asset Deployment Create Deployable Package Add Licenses to Deployable Package Update Model Version

Answer:

NEW QUESTION # 262

A company implements Dynamics 365 Finance.

A sales order confirmation report does not meet the company's branding standards. The report must include header notes and a colorful logo.

You must enable modern design for additional reports created by users in the future.

You need to meet the branding standards and enable additional forms and reports to be created by users.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution				
Add colorful logo and header notes.	<table><tr><td>Modern reports branding details</td></tr><tr><td>Print management configuration</td></tr><tr><td>Business document management</td></tr></table>	Modern reports branding details	Print management configuration	Business document management	
Modern reports branding details					
Print management configuration					
Business document management					
Enable forms by users.	<table><tr><td>Modern reports branding details</td></tr><tr><td>SQL Server Reporting Services (SSRS) report design</td></tr><tr><td>Print management configuration</td></tr><tr><td>Business document management</td></tr></table>	Modern reports branding details	SQL Server Reporting Services (SSRS) report design	Print management configuration	Business document management
Modern reports branding details					
SQL Server Reporting Services (SSRS) report design					
Print management configuration					
Business document management					

Answer:

Explanation:

Requirement	Solution				
Add colorful logo and header notes.	Microsoft <table><tr><td>Modern reports branding details</td></tr><tr><td>Print management configuration</td></tr><tr><td>Business document management</td></tr></table>	Modern reports branding details	Print management configuration	Business document management	
Modern reports branding details					
Print management configuration					
Business document management					
Enable forms by users.	<table><tr><td>Modern reports branding details</td></tr><tr><td>SQL Server Reporting Services (SSRS) report design</td></tr><tr><td>Print management configuration</td></tr><tr><td>Business document management</td></tr></table>	Modern reports branding details	SQL Server Reporting Services (SSRS) report design	Print management configuration	Business document management
Modern reports branding details					
SQL Server Reporting Services (SSRS) report design					
Print management configuration					
Business document management					

Explanation:

Box 1: Modern reports branding details

Modern report designs in Microsoft Dynamics 365 for Finance and Operations . ' The logos, color schemes, and notes are setup in "Organization administration"->"Setup"->"Document branding"->"Branding details".

Box 2: Business document management

Business document management is built on top of the ER framework and enables business users to edit business document templates by using Microsoft 365 service or appropriate Microsoft Office desktop application. Edits to the documents might include changing business document designs and adding placeholders for additional data without source code changes and new deployments. No knowledge of the ER framework is required to update templates of business documents.

Note:

Business users use the Electronic reporting (ER) framework to configure formats for outbound documents in accordance with the legal requirements of various countries/regions. Users can also define the dataflow to specify what application data is placed in generated documents. The ER framework generates outbound documents in Microsoft Office formats (Excel workbooks or Word documents) by using predefined templates.
