SAP Certified Professional - Solution Architect - SAP BTP Sample Questions (Q17-Q22):

NEW QUESTION # 17

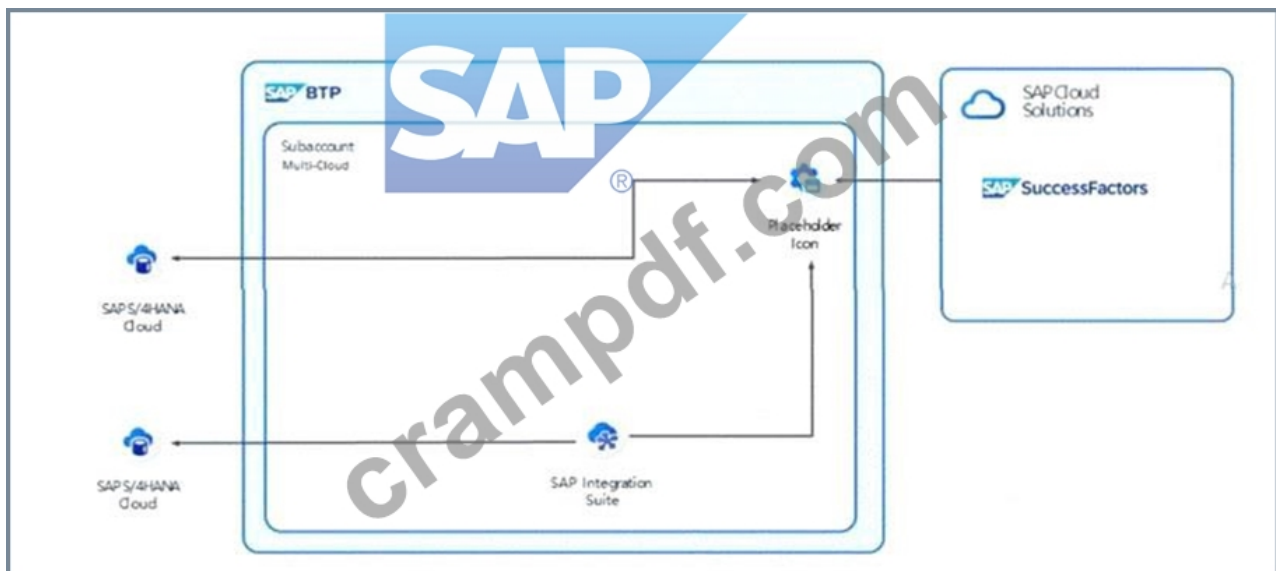

You are a solution architect and your client needs help in choosing the appropriate SAP solution to use for their application design. #
*SAP SuccessFactors will trigger an "event" when employees complete a variety of tasks such as changing their address or updating their W-4 information.

*The event will be caught by one of SAP's event solutions and it will trigger (via webhook) either SAP Integration Suite or SAP S/4HANA Cloud as needed.

*The number of events processed is not expected to be high.

*A cloud solution is preferred.

Which of the following could be used in place of the "Placeholder Icon" in the attached diagram? Note: There are 2 correct answers to this question.

- A. SAP Event Mesh
- B. SAP Event Broker
- C. SAP Process Orchestration
- D. SAP Integration Suite, advanced event mesh

Answer: A,B

Explanation:

SAP Event Broker is part of SAP Integration Suite and provides lightweight event processing for handling scenarios with a limited number of events, as described in the use case.

SAP Event Mesh offers a cloud-native event-driven architecture, enabling applications to communicate asynchronously through events. It integrates with SAP systems like SAP SuccessFactors and supports low-latency webhook triggers.

Both solutions support cloud-first architectures, meeting the customer's preference for a cloud-based event solution. (Reference: SAP Event Mesh Overview)

NEW QUESTION # 18

Applications on a customer's Marketing subaccount continuously crash due to insufficient memory.

At the global account level, what can you use to allocate more memory to the Marketing subaccount?

- A. Quota
- B. Service Assignment
- C. Entity Assignment
- D. Entitlement

Answer: A

NEW QUESTION # 19

A manufacturer wants to discuss the design of a solution that tracks and manages stock availability and movement of goods within a warehouse. They want to ensure that movements are aggregated for reporting purposes and that these reports can be used to optimize stock movements. They also want to use the newest solutions to build these reports.

Which of the following solutions can be used together to fulfill the requirements? Note: There are 3 correct answers to this question.

- A. SAP HANA Service (SAP Regions) for SAP BTP
- B. SAP Datasphere
- C. SAP Analytics Cloud
- D. SAP Data Intelligence
- E. SAP HANA Cloud

Answer: B,C,E

Explanation:

SAP Analytics Cloud: Offers advanced reporting and visualization tools to aggregate and analyze stock movements, making it ideal for the reporting requirements.

SAP Datasphere: Serves as the central data layer, allowing seamless integration and transformation of stock movement data for reporting and optimization purposes.

SAP HANA Cloud: Provides a high-performance database to store and process real-time stock movement data, ensuring the required agility and accuracy.

Together, these solutions form a robust ecosystem for tracking, managing, and reporting on warehouse stock movements, while leveraging the newest cloud-native tools. (Reference: SAP Analytics Cloud Overview and SAP Datasphere Documentation)

NEW QUESTION # 20

You have been hired as a solution architect and it's your first day on the job. You participate in a meeting discussing the design and development of an extension to SAP S/4HANA Cloud. In the meeting, you are told:

"We have determined that the BusinessPartner (A2X) API in SAP S/4HANA Cloud is insufficient for our needs. Fortunately, the API is extendable via key user extensibility. We are currently creating a diagram with the technical building blocks of the extension". In which SAP Application Extension Methodology phase is the project?

- A. Assess Extension Technology
- B. Assess Extension Use Case
- C. Define Extension Target Solution

Answer: C

Explanation:

The project is in the Define Extension Target Solution phase because the team is actively:

* Determining the technical building blocks of the solution.

* Finalizing the necessary extensions to the SAP Business Partner (A2X) API using key user extensibility, a step involved in defining how the extension will integrate with existing SAP S/4HANA Cloud functionality.

* Extension Target Solution Phase in Application Extension Methodology (AEM):

* This phase focuses on defining the technical architecture and building blocks to fulfill the identified extension use cases.

* Discussions about extending APIs and detailing the technical requirements align with this phase.

* Other Options Explanation:

* Assess Extension Technology (A): Evaluates the available SAP BTP technologies, which occurs before designing the solution.

* Assess Extension Use Case (C): Focuses on analyzing business use cases but does not involve technical architecture discussions.

References:

* SAP Application Extension Methodology

NEW QUESTION # 21

You are a solution architect assigned to a customer business transformation project.

Which solutions would you recommend the customers adopt to analyze and to optimize their procurement process to exceed industry benchmarks? Note: There are 2 correct answers to this question.

- A. SAP Signavio Process Intelligence
- B. SAP Signavio Process Manager
- C. SAP Signavio Value Accelerators
- D. SAP Signavio Process Transformation Manager

Answer: A,D
