This exam measures your ability to describe the business value of Power Platform; identify the core components of Power Platform; demonstrate the capabilities of Power BI; describe the capabilities of Power Apps; demonstrate the capabilities of Power Automate; and demonstrate the business value of Power Virtual Agents.

How can you prepare for the Microsoft PL-900 exam?

To be able to cover all the exam topics with their subtopics, you need to prepare with great deliberation. Microsoft offers several options that you can opt for in preparation for the PL-900 test. Thus, you can decide to go for the following resources:

- **Free online courses**

  There is a free learning path that you can take to learn all the needed details of Power Platform. It has the same name as the certification and offers 12 modules lasting for 5 hours and 18 minutes in total. It covers the basic details of Power Platform, Power Apps, Power Automate, Dataverse, Power BI, Power Virtual Agents, and other information that is covered in the exam topics. The course is completely free and you can take it without prior preparation. Each module has a certain amount of XP that encourages you to proceed further to gain more of it.

- **Paid instructor-led course**

  For those who prefer to study under the supervision of a teacher, there is an option to take the paid course. Its name also coincides with the title of the certificate. You can found one by country and chose a Microsoft partner to enroll for a course. It is an ideal opportunity for those individuals who want to get knowledge from a certified expert. An instructor may also provide you with some additional resources, which is why most learners choose this tool.

- **Study guide**

  You can always buy the official tutorial if you want to increase your chances. The Exam Ref PL-900 Microsoft Power Platform Fundamentals guide is available on Amazon and Microsoft Press Store, so you can use it together with any courses

of your choice.

100% Pass-Rate Accurate PL-900 Answers - Find Shortcut to Pass PL-900 Exam

With precious time passing away, many exam candidates are making progress with high speed and efficiency. NEW QUESTION # 327
Hotspot Question
A company plans to use Power BI to visualize data from business systems.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statement	Yes	No
You can display data aggregates and raw data in a Power BI report.	○	○
You can display related data from multiple sources in the same Power BI report.	○	○

Answer:

Explanation:

Answer Area

Statement	Yes	No
You can display data aggregates and raw data in a Power BI report.	◉	○
You can display related data from multiple sources in the same Power BI report.	◉	○

Explanation:
Box 1: Yes
The following list provides advantages to using aggregations:
Query performance over big data - as users interact with visuals on Power BI reports, DAX queries are submitted to the dataset.
Boost query speeds by caching data at the aggregated level, using a fraction of the resources required at the detail level. Unlock big data in a way that would otherwise be impossible.
Box 2: Yes
With Power BI Desktop, you can connect to many different types of data sources, then shape the data to meet your needs, enabling you to create visual reports to share with others. Shaping data means transforming the data: renaming columns or tables, changing text to numbers, removing rows, setting the first row as headers, and so on. Combining data means connecting to two or more data sources, shaping them as needed, then consolidating them into a useful query.
