## Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q56-Q61):

### NEW QUESTION # 56

Your organization recently implemented context-aware access policies for Google Drive to allow users to access Drive only from corporate managed desktops. Unfortunately, some users can still access Drive from non-corporate managed machines. What preliminary checks should you perform to find out why the Context-Aware Access policy is not working as intended? (Choose two.)

- A. Delete and recreate a new Context-Aware Access device policy.
- B. **Confirm that the user has a Google Workspace Enterprise Plus license.**
- C. Confirm that the user has at least a Google Workspace Business license.
- D. **Check whether Endpoint Verification is installed on users' desktops.**
- E. Check whether device policy application is installed on users' devices.

Answer: B,D

### NEW QUESTION # 57

Your Accounts Payable department is auditing software license contracts companywide and has asked you to provide a report that shows the number of active and suspended users by organization unit, which has been set up to match the Regions and Departments within your company. You need to produce a Google Sheet that shows a count of all active user accounts and suspended user accounts by Org unit. What should you do?

- A. From the Admin Console Users Menu, download a list of all user info columns and currently selected columns.
- B. From the Admin Console Billing Menu, turn off auto-assign, and then click into Assigned Users and export the data to Sheets.

- C. From the Admin Console Users Menu, download a list of all Users to Google Sheets, and join that with a list of ORGIDs pulled from the Reports API.
- D. From the Google Workspace Reports Menu, run and download the Accounts Aggregate report, and export the data to Google Sheets.

**Answer: D**

Explanation:

- \* Admin Console: Log into the Google Admin console at admin.google.com
- \* Reports Menu: Navigate to Reports > Reports.
- \* Accounts Aggregate Report:
  - Under the "Reports" section, select "Accounts".
  - Click on "Aggregate" to view the report.
- \* Download Data:
  - Click on the download icon and choose "Google Sheets" as the format to export the data.
  - This report includes a count of active and suspended users by organizational unit.
- \* Google Sheets:
  - Open the downloaded report in Google Sheets.
  - Review and organize the data as needed to present it by Org unit, ensuring it matches the Regions and Departments within your company.

#### NEW QUESTION # 58

Your organization is on Google Workspace Enterprise and allows for external sharing of Google Drive files to facilitate collaboration with other Google Workspace customers. Recently you have had several incidents of files and folders being broadly shared with external users and groups. Your chief security officer needs data on the scope of external sharing and ongoing alerting so that external access does not have to be disabled.

What two actions should you take to support the chief security officer's request? (Choose two.)

- A. Review total external sharing in the Aggregate Reports section.
- B. Review who has viewed files using the Google Drive Activity Dashboard.
- C. Automatically block external sharing using DLP rules.
- D. Create an alert from Drive Audit reports to notify of external file sharing.
- E. Create a custom Dashboard for external sharing in the Security Investigation Tool.

**Answer: D,E**

#### NEW QUESTION # 59

Multiple users across the organization are experiencing video degradation in Meet video calls. As an administrator, what steps should you take to start troubleshooting?

- A. Troubleshoot network bandwidth for the organizer of the meeting.
- B. Push the Meet quality tool to end user devices and run local reports to determine connectivity issues.
- C. Update the Admin Console Meet settings to disable streaming.
- D. Locate the Meet quality tool, and review the output for issues with quality.

**Answer: D**

Explanation:

To troubleshoot video degradation issues in Google Meet, the first step should be to locate the Meet Quality Tool and review the output for issues with quality. This tool provides detailed insights into the performance and quality of Meet calls, including network metrics, device performance, and user feedback. By analyzing this data, administrators can identify specific causes of degradation and take appropriate actions to resolve them.

#### NEW QUESTION # 60

Your company has decided to change SSO providers. Instead of authenticating into Google Workspace and other cloud services with an external SSO system, you will now be using Google as the Identity Provider (IDP) and SSO provider to your other third-party cloud services.

What two features are essential to reconfigure in Google Workspace? (Choose two.)

- A. Apps > add SAML apps to your domain.
- B. Reconfigure user provisioning via Google Cloud Directory Sync.
- C. Enable API Permissions for Google Cloud Platform.
- D. Disable SSO with third party IDP.
- E. Replace the third-party IDP verification certificate.

**Answer: A,D**

Explanation:

- \* Apps > add SAML apps to your domain:
  - When switching to Google as the Identity Provider (IDP) for Single Sign-On (SSO), you need to configure Google Workspace to act as the SSO provider for third-party applications. This involves adding the necessary SAML (Security Assertion Markup Language) applications to your domain within Google Workspace.
  - Navigate to the Admin console, go to Apps > Web and mobile apps, and add SAML apps to your domain. This allows Google to authenticate users for those apps.
- \* Disable SSO with third party IDP:
  - Since you are switching from an external SSO provider to Google Workspace as your IDP, you must disable the current SSO configuration with the third-party provider.
  - Go to the Admin console, navigate to Security > Set up single sign-on (SSO) with a third party IdP, and disable the existing SSO setup. This ensures that users will now authenticate directly through Google Workspace instead of the previous SSO provider.
