

Updated and Reliable Esri EAEP2201 Exam Questions for Guaranteed Success

P.S. Free & New EAEP2201 dumps are available on Google Drive shared by Dumpcollection: <https://drive.google.com/open?id=1rtmxvbk3ttGrTVE3FTuh2mAhFwH5Omc6>

Esri Enterprise Administration Professional 2201 evolves swiftly, and a practice test may become obsolete within weeks of its publication. We provide free updates for Esri EAEP2201 exam questions for three months after the purchase to ensure you are studying the most recent solutions. Furthermore, Dumpcollection is a very responsible and trustworthy platform dedicated to certifying you as a specialist. We provide a free sample before purchasing Esri EAEP2201 valid questions so that you may try and be happy with its varied quality features. Learn for your Esri with confidence by utilizing the Dumpcollection EAEP2201 study guide, which is always forward-thinking, convenient, current, and dependable.

Some of our customers are white-collar workers with no time to waste, and need a Esri certification urgently to get their promotions, meanwhile the other customers might aim at improving their skills. Our reliable EAEP2201 question dumps are developed by our experts who have rich experience in the fields. Constant updating of the EAEP2201 Prep Guide keeps the high accuracy of exam questions thus will help you get use the EAEP2201 exam quickly. During the exam, you would be familiar with the questions, which you have practiced in our EAEP2201 question dumps. That's the reason why most of our customers always pass exam easily.

If you want to participate in the IT industry's important Esri EAEP2201 examination, it is necessary to select Dumpcollection Esri EAEP2201 exam training database. Through Esri EAEP2201 examination certification, you will be get a better guarantee. In your career, at least in the IT industry, your skills and knowledge will get international recognition and acceptance. This is one of the reasons that why lot of people choose Esri EAEP2201 certification exam. So this exam is increasingly being taken seriously. So this exam is increasingly being taken seriously. Dumpcollection Esri EAEP2201 Exam Training materials can help you achieve your aspirations. Dumpcollection Esri EAEP2201 exam training materials are produced by the experienced IT experts, it is a combination of questions and answers, and no other training materials can be compared. You do not need to attend the expensive training courses. The Esri EAEP2201 exam training materials of Dumpcollection add to your shopping cart please. It is enough to help you to easily pass the exam.

The EAEP2201 Exam is suitable for GIS professionals who have experience in administering enterprise-level GIS systems, including IT administrators, GIS managers, and GIS analysts. It is also beneficial for individuals who want to increase their knowledge and skills in the administration of ArcGIS Enterprise environments.

Esri Enterprise Administration Professional 2201 Sample Questions (Q37-Q42):

NEW QUESTION # 37

A GIS administrator receives reports from users about a map service that is slow to draw. The service has the following characteristics:

- * Numerous detailed features
- * Complex symbology
- * Scale-dependent rendering
- * Infrequently updated
- * Query capability enabled
- * Uses shared instances

Which action should the administrator perform?

- **A. Configure the map service to use cached tiles**
- B. Use dedicated instances instead of shared instances
- C. Eliminate scale-dependent rendering

Answer: A

Explanation:

For map services that are infrequently updated and contain numerous detailed features with complex symbology, configuring the service to use cached tiles is the most effective way to improve drawing performance. Cached map services pre-render map images at various scales and store them, allowing for faster display to users. This approach is particularly beneficial when the data does not change frequently, as it reduces the server's processing load during user interactions.

Eliminating scale-dependent rendering (Option B) may lead to performance degradation, as it could result in rendering all features at all scales, increasing the amount of data processed and displayed unnecessarily.

Switching to dedicated instances (Option C) can improve performance in some scenarios, but it also increases resource usage on the server. Given that the service is infrequently updated and the primary concern is drawing performance, caching is the more efficient and scalable solution.

Reference Source: ArcGIS Enterprise documentation on optimizing map services for performance.

NEW QUESTION # 38

A GIS administrator must share an imagery service with another ArcGIS Enterprise. The administrator sets up a distributed collaboration with the other ArcGIS Enterprise and shares the service as a reference. The users in the other organization keep being prompted for credentials.

Which action should the administrator perform?

- A. Configure the service with anonymous access
- B. Share the image service as a copy
- C. Set the collaboration workspace to send and receive
- **D. Save viewer credentials in the collaboration**

Answer: D

Explanation:

When sharing a referenced service through a distributed collaboration, users accessing the service from the guest organization need valid credentials unless credentials are stored with the item. To prevent repeated credential prompts, the administrator should save credentials with the item when it is shared, particularly for read-only access like viewing imagery.

From the ArcGIS Enterprise documentation on collaborations:

"When sharing services as references across ArcGIS Enterprise organizations, credentials must be stored with the item to ensure seamless access unless the service is public."

* Option A (sharing as a copy) is an alternative, but it's not what was asked for and might not be ideal for large imagery.

* Option C (workspace direction) affects sync behavior, not access control.

* Option D would only work if the service is made public, which often isn't acceptable for internal data.

Reference: ArcGIS Enterprise - Distributed Collaborations and Shared Credential Requirements

NEW QUESTION # 39

A GIS administrator has a group of users who share maintenance responsibilities for a critical application. The administrator needs to allow all users to edit the application without transferring ownership. Which option should the administrator use?

- A. A public group
- B. An administrative group
- **C. A shared update group**
- D. A collaboration group

Answer: C

Explanation:

A shared update group allows group members to edit each other's items without needing to transfer ownership. This is ideal for collaborative editing and shared responsibility for applications, maps, or dashboards.

From Esri documentation:

"Shared update groups allow multiple members to update items shared with the group, even if they do not own the items."

* Option B doesn't exist as a group type in ArcGIS Enterprise.

* Option C allows viewing, but not editing others' content.

* Option D applies to distributed collaboration, not shared editing.

Reference: ArcGIS Enterprise - Group Settings for Collaborative Management

NEW QUESTION # 40

A small organization has an ArcGIS Enterprise deployment where all components are installed on one virtual server hosted on Microsoft Azure. Each deployment component was initially installed manually. The organization wants to upgrade its deployment to the most recent version in the most efficient way.

Which action should the organization perform?

- **A. Manually upgrade each ArcGIS Enterprise component**
- B. Run the ArcGIS Enterprise Cloud Builder for Microsoft Azure tool
- C. Upgrade the entire deployment with ArcGIS Enterprise Builder

Answer: A

Explanation:

For ArcGIS Enterprise deployments on Microsoft Azure that were initially installed manually, the recommended approach for upgrading is to manually upgrade each component. This involves downloading the latest installers for each component (Portal for ArcGIS, ArcGIS Server, ArcGIS Data Store, etc.) and following the standard upgrade procedures for each. This method ensures that each component is properly updated and configured according to the organization's specific setup.

Using ArcGIS Enterprise Builder (Option B) is intended for new installations and is not suitable for upgrading existing deployments.

ArcGIS Enterprise Cloud Builder for Microsoft Azure (Option C) is designed for deployments that were originally created using Cloud Builder; it cannot be used to upgrade deployments that were installed manually.

Reference Source: ArcGIS Enterprise documentation on upgrading manually installed deployments

NEW QUESTION # 41

An organization expects a large influx of users who use the standard analysis tools in the portal Map Viewer.

The organization is concerned with the hosting server's available resources.

Which system resource should be closely monitored?

- A. Disk activity
- **B. CPU utilization**
- C. Network utilization

Answer: B

Explanation:

When users perform standard analysis tasks in the portal Map Viewer, the hosting server executes geoprocessing operations that are computationally intensive. These operations require significant CPU resources. Monitoring CPU utilization helps ensure that the server can handle the increased load without performance degradation.

While disk activity and network utilization are important, they are less directly impacted by standard analysis tasks compared to

CPU usage. Therefore, CPU utilization is the primary resource to monitor in this scenario.
Reference Source: ArcGIS Enterprise documentation on system performance monitoring.

NEW QUESTION # 42

.....

Our EAEP2201 learning guide is very efficient tool in the world. As is known to us, in our modern world, everyone is looking for to do things faster, better, smarter, so it is no wonder that productivity hacks are incredibly popular. So we must be aware of the importance of the study tool. In order to promote the learning efficiency of our customers, our EAEP2201 Training Materials were designed by a lot of experts from our company. You can totally rely on our EAEP2201 study materials.
