PDFVCE CrowdStrike Falcon Administrator is the answer if you want to score higher in the CCFA-200b exam and achieve your academic goals.

CrowdStrike Falcon Administrator Sample Questions (Q38-Q43):

NEW QUESTION # 38

You have created a new static host group to test a newly created sensor update policy, and need to add 500 servers into the group. You want to upload a list of hosts to Falcon for automatic addition into the group. What file format must the list be for this to be successfully accomplished?

- A. JSON

- B. PDF
- C. XLSX
- D. TXT

Answer: D

NEW QUESTION # 39

Where do you obtain the Windows sensor installer for CrowdStrike Falcon?

- A. Sensor installers are not used because sensors are deployed from within Falcon
- B. Sensor installers are unique to each customer and must be obtained from support
- C. Sensor installers are downloaded from the Support section of the CrowdStrike website
- D. Sensors are downloaded from the Hosts > Sensor Downloads

Answer: D

Explanation:

The Windows sensor installer for CrowdStrike Falcon can be downloaded from the Hosts > Sensor Downloads page in the Falcon console. This page allows you to download different sensor versions and installers for various operating systems and platforms, as well as view installation instructions and release notes. The other options are either incorrect or not available.

NEW QUESTION # 40

To enhance your security, you want to detect and block based on a list of domains and IP addresses. How can you use IOC management to help this objective?

- A. Using IOC management, import the list of hashes and IP addresses and set the action to Detect Only
- B. Using IOC management, import the list of hashes and IP addresses and set the action to No Action
- C. Using IOC management, import the list of hashes and IP addresses and set the action to Prevent/Block
- D. Blocking of Domains and IP addresses is not a function of IOC management. A Custom IOA Rule should be used instead

Answer: D

Explanation:

IOC management only allows "Detect only" and "No Action" among the possible actions.

Therefore, it cannot be used to block based on IPs or domains. Custom IOA Rule groups allow to create rule types based on Network Connection (configuring a remote IP address) and domains, and gives the options to "Monitor", "Detect" and "Kill Process", being the last one the closest to "block".

NEW QUESTION # 41

A host has been Network contained with Falcon and you have been asked to update the Operating System with zero day patches. You have tried using your patch update systems for this task, but the jobs fail. Which configuration steps in the Falcon UI will allow these activities?

- A. Create a Containment Policy that allow lists the specific IP addresses of your patch management tools
- B. Remove Host containment and update the host with all patches
- C. Create a Firewall Policy that allow lists your patch management tools
- D. Create a Containment Policy that allow lists the Fully Qualified name of your patch management tools

Answer: A

NEW QUESTION # 42

A member of your SECOPS team currently has the role of Falcon Security Lead to be able to Manage detections, quarantine files and reset user credentials. Which additional role is required to also allow them to view and modify remediation actions?

- A. Quarantine Manager

- B. Detections Exception Manager
- **C. Remediation Manager**
- D. Endpoint Manager

Answer: C

NEW QUESTION # 43

.....
