

Updated Free ACP-100 Pdf Guide | Easy To Study and Pass Exam at first attempt & High-quality ATlassian Jira Administration for Data Center

What are the steps of peptide hormone synthesis?

- Synthesis
- Packaging
- Storage
- Secretion

Describe the synthesis step of peptide hormone synthesis.

- Large precursor proteins called preprohormones are synthesized by endoplasmic reticulum ribosomes

Describe the packaging step of peptide hormone synthesis.

- Preprohormones travel through the ER and Golgi complex, are processed into active hormones, and packaged into secretory vesicles

Describe the storage step of peptide hormone synthesis.

- Hormone-containing secretory vesicles can be stored until the cell receives the appropriate signal

Describe the secretion step of peptide hormone synthesis.

- The appropriate signal initiates exocytosis of the vesicles and the hormones are released into the blood

From which molecule are steroid hormones synthesized?

- Cholesterol

How is the type of steroid hormone produced controlled?

- The hormone produced by a tissue is dependent on the specific enzymes within the cells of that tissue
- E.g. The enzyme associated with cortisol synthesis is found only in the adrenal cortex

Why can't steroid hormones be stored?

- Due to their lipophilicity
- Must be released as they are synthesized

In what state must lipophilic hormones be in to enter their target cell?

- The hormone must be unbound from its carrier protein

How many hormones are bound to their carriers?

- At any given time not 100% of a steroid hormone in the blood is bound to its carrier molecule
- Hormones are constantly binding and unbinding dynamically in an equilibrium

In which state are hormones active?

- When they are unbound

Where are the peptide hormones and catecholamine receptors found?

ATLASSIAN Jira Administration for Data Center Sample Questions (Q45-Q50):

NEW QUESTION # 45

Your business users want to know more about what is happening with the issues raised by their business unit.

They gave you a list of situations in which they want to get emails, so you know which parts of the shared notification scheme they want to be added to.

You consult with the project owner.

He doesn't want any changes to the emails that go to developers and testers.

The project owner approves of the business users getting the emails, but he would like to retain control of who gets emails for his project.

How can you satisfy these requests?

- A. Add the business users as Watchers on the issues.
- B. Create a role for business users and add that role to the events in the notification scheme.
- C. Modify the events in the workflow so they send the emails to the business users.
- D. Place the business users in a group and add that group to the events in the notification scheme.

Answer: D

NEW QUESTION # 46

You install a new Jira instance using only the default configurations. A team approaches you to set up a project with the following specifications:

* There are four standard issue types and three sub-task issue types.

* The first sub-task will need a new screen for the Edit operation.

* The second sub-task will need new screens for both the Create and Edit operations.

* Everything else should use the default configurations.

How many new Screen Schemes do you need to create?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

Answer: C

NEW QUESTION # 47

Ann and Jake both clicked the Edit button on an issue in project ASTRO. While editing, the Priority field is displayed for Ann but not for Jake. Identify one possible reason.

- A. Edit Issue screen
- B. project permissions
- C. Configure Fields user setting

- D. custom field context
- E. security levels

Answer: D

NEW QUESTION # 48

All the issue types in a particular project use a single workflow, which includes the DEPLOY status. New requirements state that no one should be allowed to edit issues that are in that status. Which element must be configured?

- A. trigger
- B. step property
- C. validator
- D. project permission
- E. condition

Answer: B

NEW QUESTION # 49

You are reviewing a list of requirements and need to determine how to set up analysts. They will work in several projects that share all their schemes. Which requirement can be met only with a project role?

- A. Different analysts must be able to log time in different projects.
- B. Any analyst must be able to create a shared dashboard.
- C. Only analysts who are project leads must be able to delete issues.
- D. All analysts must be able to edit the Due Date.

Answer: C

NEW QUESTION # 50
