Updated L6M7 Practice Exam Questions

to the next problem, solves that and looks back to see if the previous one is still correct. Example: completing a Sudoku puzzle Divide and conquer -> Divides a problem into smaller sub-problems, solves them and combines the answers to solve the initial problem. Example: categorising data Dynamic programming -> Uses different approaches to solve a problem by remembering the past. Example: the shortest route to travel between two cities by road Greedy -> Finds the best possible choice at each stage. Example: giving change for a cash transaction using the highest-value coins and notes available Branch and bound -> Uses an optimisation process to test for the best possible outcome. Example: how often to place orders to ensure stock levels are maintained for the least cost. Brute force -> Tries many patterns until a solution is found. Example: software that guesses a security password

QUESTION: 5

"Counterfeit computer hardware increases the risk and likelihood of a successful cyber-attack". Is this statement False?

Option A :

Yes, because not all counterfeit products such as hardware are accessible to hackers to implant malware upfront so the likelihood of a cyber-attack is the same as buying genuine

Option B :

No, because it is the sole responsibility of the Procurement department to ensure that hardware being bought is not counterfeit which eliminates any possibility of cyber-attacks

Option C :

No, because the quality of the counterfeit product may not be high and fake hardware could include malware which increases the likelihood of a successful cyber-attack

Option D :

Yes, because counterfeit products are generally still of a high quality and can have cyber-security measures and systems installed to reduce the risk of any future cyber-attacks

Correct Answer: C

However, it's not always the same. Cramming is not what shall stay in your mind forever. you can forget the lines anytime making you blank while you are trying to solve your L6M7 Exam Questions. So, don't cram even if it takes you a little more time to clear your doubts and get the concept clear. Cramming is not going to stay with you forever.

CIPS L6M7 Exam Syllabus Topics:

Topic	Details

Topic 1	• Understand the concept of big data in the global supply chain: This section of the exam measures the skills of Supply Chain Managers and covers understanding big data's role in enhancing supply chain operations. It evaluates how big data transforms procurement and supply functions by leveraging large volumes of diverse data, focusing on skills like "Data Trend Analysis."
Topic 2	• Understand the impact of cyber security on procurement and supply: This part targets Cybersecurity Experts, exploring how cyber threats affect supply chains by compromising sensitive information through vulnerabilities in software or networks. It involves evaluating technologies to secure systems effectively, emphasizing "Secure Data Transmission."
Topic 3	• Understand data integrity and its impact on procurement and supply: Targeting IT Security Officers, this section focuses on ensuring that all collected information remains accurate (data integrity) while maintaining confidentiality through legal frameworks like GDPR. It assesses strategies for managing disruptions, such as system redundancy.

CIPS Commercial Data Management Sample Questions (Q14-Q19):

NEW QUESTION # 14
Joe is a Supply Chain Manager at Crunchy Lettuce Incorporated and is responsible for multiple sets of data on aspects of the business, including suppliers, customers, and manufacturing processes. Joe is aware that the integrity of his data is extremely important as, without accurate data, he is unable to plan effectively for future orders and deliveries.
Which of the following are ways in which data integrity can be affected? Select THREE.

- A. Manipulation
- B. Corruption
- C. Corrosion
- D. Omission
- E. Commission

Answer: A,D,E

Explanation:
Commission: Data is mistakenly created, such as duplicate records.
Omission: Data is accidentally deleted or not recorded.
Manipulation: Data is changed incorrectly, such as an extra zero added to a value.
Corruption is not included because it refers to data being unreadable or damaged rather than integrity being affected by an internal process. Corrosion refers to metal deterioration and is unrelated to data.

NEW QUESTION # 15
Fluffy Pillows Ltd has recently expanded its operations and has hired more staff. These staff will work remotely and because of this Fluffy Pillows Ltd is in need of buying and upgrading their IT systems. The CEO of Fluffy Pillows is examining the security of currently held data in preparation for the expansion and has recently completed a document which looks into what data is stored where and what the consequences would be if this data were to be stolen or corrupted. In his research he has found multiple data entries for the same information, which he believes could lead to inaccuracies in data reporting. He is also concerned that the data isn't being stored securely and is unsure whether he should retain some of the confidential personal details on employees who have left the business. He has decided that along with the introduction of new systems it is important that all members of staff at Fluffy

Pillows are aware of the responsibilities of storing data correctly and the risks of cyber attacks.
What is the main concern with regards to the quality of data currently held?

- A. Omission
- B. Corruption
- C. Commission
- D. Manipulation

Answer: C

Explanation:
This is commission-data has been created (commissioned) by mistake, leading to multiple entries for the same thing.

NEW QUESTION # 16
Which of the following is an example of a data-enhanced product?

- A. An airline that changes the price of flights depending on demand
- B. An air-conditioning unit in a hot warehouse
- C. A fridge that can recommend recipes based on the contents inside it
- D. A third-party cloud storage system

Answer: C

Explanation:
A data-enhanced product is a physical product that incorporates data-driven functionality to provide additional features. A smart fridge that suggests recipes based on its contents is an example, as it uses data to enhance user experience.

NEW QUESTION # 17
The storage of data by a third party is commonly known as what?

- A. Chips
- B. USB
- C. Cloud
- D. Integrated circuit

Answer: C

Explanation:
This is The Cloud, which may also be called 'cloud computing' or 'cloud storage.' It is commonly used in mobile phones to store data externally rather than on the device itself.

NEW QUESTION # 18
Which of the following actions can help an organisation improve the security of their router? Select ALL that apply

- A. Locate the router in a communal area where all staff can access it
- B. Change login details from the default settings
- C. Run regular scripts to check for data breaches
- D. Use the firewall

Answer: B,D

Explanation:
The correct answers are B and C. Not all routers have a firewall, but if they do, it should be used. Option A is incorrect because the router should be placed in a secure location. Option D is incorrect because you can't run a script on a router. P.195 Domain: 3.2

NEW QUESTION # 19
......

You can easily download these formats of CIPS L6M7 actual dumps and use them to prepare for the CIPS L6M7 certification test. You don't need to enroll yourself in expensive L6M7 Exam Training classes. With the CIPS L6M7 valid dumps, you can easily prepare well for the actual CIPS L6M7 exam at home.
