We provide candidates with comprehensive Microsoft MB-500 exam questions with up to three months of free updates. If you are doubtful, feel free to download a free demo of Lead1Pass Microsoft Dynamics 365: Finance and Operations Apps Developer (MB-500) PDF dumps, desktop practice exam software, and web-based Microsoft Dynamics 365: Finance and Operations Apps Developer (MB-500) practice exam. Don't wait. Purchase Microsoft Dynamics 365: Finance and Operations Apps Developer (MB-500) exam dumps at an affordable price and start preparing for the updated Microsoft MB-500 certification exam today.

Microsoft MB-500 certification exam consists of multiple-choice questions and is designed to test your knowledge of the following topics: (1) Configuring and deploying Microsoft Dynamics 365 Finance and Operations applications, (2) Developing customizations for Microsoft Dynamics 365 Finance and Operations applications, (3) Implementing security and integrations with Microsoft Dynamics 365 Finance and Operations applications, (4) Creating and managing data entities and data management, and (5) Implementing reporting and analytics.

MB-500: Microsoft Dynamics 365: Finance and Operations Apps Developer Certification Path

MB-500: Microsoft Dynamics 365: Finance and Operations Apps Developer Exam is foundation level Certification. It is strongly recommended that aspirants for this exam have an experience in manipulating data by using Transact-SQL code, and creating and running Windows PowerShell commands and scripts.

Microsoft Dynamics 365: Finance and Operations Apps Developer certification is one of the most sought-after certifications in the field of business applications development. Microsoft Dynamics 365: Finance and Operations Apps Developer certification is designed for developers who want to enhance their skills in creating and maintaining applications. The Microsoft MB-500 Exam measures the candidate's knowledge and skills in developing, testing, and deploying applications in Microsoft Dynamics 365 Finance and Operations.

Free PDF 2025 Reliable MB-500: Test Microsoft Dynamics 365: Finance and Operations Apps Developer Simulator Fee

It is essential to get the Microsoft MB-500 exam material because you have no other option to understand the subject. Microsoft Dynamics 365: Finance and Operations Apps Developer MB-500 have latest exam answers, latest exam book and latest exam collection. Lead1Pass offers valid exam book and valid exam collection help you pass the MB-500 Exam successfully.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q82-Q87):

NEW QUESTION # 82

You are a Dynamics 365 Finance and Operations developer. You have the following code: (Line numbers are created for reference only.)

```

01 class TestQuestion
02 {
03     public static void main(Args _args)
04     {
05         TestQuestion testQuestion = new testQuestion();
06         testQuestion.run();
07     }
08     public void run()
09     {
10         TmpFrmVirtual tmpFrmVirtual;
11         str salesId;
12         int salesQty
13         tmpFrmVirtual.Id = "SID1234";
14         salesQty = 5;
15         this.updateValues(tmpFrmVirtual, salesQty);
16         info(tmpFrmVirtual.Id);
17         info(salesQty);
18     }
19     public void updateValues(TmpFrmVirtual _tmpFrmVirtual, str _salesQty)
20     {
21         TmpFrmVirtual tmpFrmVirtual = _tmpFrmVirtual;
22         int salesQty = _salesQty;
23         tmpFrmVirtual.Id = "SID1234"-Updated";
24         salesQty = 10;
25     }
26 }

```

Which values does the info() method return? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Parameter	Value
tmpFrmVirtual.Id	▼ ☐ SID1234 ☐ SID1234-Updated ☐ SID1234 SID1234-Updated
salesQty	▼ ☐ 5 ☐ 10 ☐ 15

Answer:

Explanation:

Parameter	Value
tmpFrmVirtual.Id	▼ SID1234 SID1234-Updated SID1234 SID1234-Updated
salesQty	▼ 5 10 15

Explanation

Parameter	Value
tmpFrmVirtual.Id	▼ SID1234 SID1234-Updated SID1234 SID1234-Updated
salesQty	▼ 5 10 15

Box 1: SID1234

Parameters

All methods have their own scope. A method can take one or more parameters. Within the scope of the method, these parameters are treated as local variables and are initialized with a value from the parameter in the method call. All parameters are passed by value, which means that you can't change the value of the original variable. You can change only the local variable in the method. This local variable is a copy of the original variable.

Box 2: 5

NEW QUESTION # 83

A company has a Dynamics 365 finance and operations app.

A user requests a data entity for the sales order header information in a Power BI report that uses OData.

You need to create a data entity based on the sales order header information.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- ⋮ Disable the public API and enable data management capabilities.
- ⋮ Disable the public API and disable data management capabilities.
- ⋮ Add a new item to the Visual Studio project of category Data Model, type of Data Entity.
- ⋮ Use the data entity wizard to specify the primary data source as SalesTable, and the Entity category as Transaction.
- ⋮ Add all fields from the SalesTable data source to the data entity.
- ⋮ Enable the public API and disable data management capabilities.
- ⋮ Build the solution and perform a database sync.

Steps to create and configure a data entity based on sales order header information.

Answer:

Explanation:

Actions

- ⋮ Disable the public API and enable data management capabilities.
- ⋮ Disable the public API and disable data management capabilities.
- ⋮ Add a new item to the Visual Studio project of category Data Model, type of Data Entity.
- ⋮ Use the data entity wizard to specify the primary data source as SalesTable, and the Entity category as Transaction.
- ⋮ Add all fields from the SalesTable data source to the data entity.
- ⋮ Enable the public API and disable data management capabilities.
- ⋮ Build the solution and perform a database sync.

Steps to create and configure a data entity based on sales order header information.

- ⋮ Add a new item to the Visual Studio project of category Data Model, type of Data Entity.
- ⋮ Use the data entity wizard to specify the primary data source as SalesTable, and the Entity category as Transaction.
- ⋮ Add all fields from the SalesTable data source to the data entity.
- ⋮ Enable the public API and disable data management capabilities.
- ⋮ Build the solution and perform a database sync.

Explanation:

Actions

- ⋮ Disable the public API and enable data management capabilities.
- ⋮ Disable the public API and disable data management capabilities.

Steps to create and configure a data entity based on sales order header information.

- 1 ⋮ Add a new item to the Visual Studio project of category Data Model, type of Data Entity.
- 2 ⋮ Use the data entity wizard to specify the primary data source as SalesTable, and the Entity category as Transaction.
- 3 ⋮ Add all fields from the SalesTable data source to the data entity.
- 4 ⋮ Enable the public API and disable data management capabilities.
- 5 ⋮ Build the solution and perform a database sync.

NEW QUESTION # 84

You are a Dynamics 365 Finance developer.

You need configure table caching.

Which CacheLookup properties should you use? To answer, drag the CacheLookup properties to the correct table. Each property may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer Area

CacheLookup properties	Table type	CacheLookup property
EntireTable	Parameters	
NotInTTS	Transaction	
Found	Master data	
FoundAndEmpty	Region specific master data	

Answer:

Explanation:

Answer Area

CacheLookup properties	Table type	CacheLookup property
EntireTable	Parameters	EntireTable
NotInTTS	Transaction	NotInTTS
Found	Master data	Found
FoundAndEmpty	Region specific master data	FoundAndEmpty

Explanation:

Parameters: EntireTable

Transaction: NotInTTS

Master Data: Found

Region specific master data: FoundAndEmpty

<https://community.dynamics.com/365/financeandoperations/b/performance-tips-and-tricks/posts/dynamics-365-for-finance-and-operations-table-caching-basic-rules#:~:text=Entire%20table%20cache%20size%20determines,365%20for%20Finance%20and%20Operations.&text=Each%20AOS%20server%20can%20have%20its%20own%20cache%20settings.>

NEW QUESTION # 85

The system includes the following code: (Line numbers are included for reference only.)

```

01 public boolean checkVendor(CustAccount _custAccount, ItemId _itemId,
    VendAccount _vendAccount)
02 {
03     boolean ret;
04     CustAccount custAccount;
05     ItemId itemId;
06     VendExclusion vendExclusion;
07     select vendExclusion
08     index hint PrimaryIdx
09     where vendExclusion.CustAccount == _custAccount
        && vendExclusion.ItemId == _itemId
        && vendExclusion.VendAccount == _vendAccount;
10     if (vendExclusion.RecId)
11     {
12         ret = false
13     }
14     return ret;
15 }

```

You need to apply changes to address User2's issues.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
Add the firstly keyword to the query and choose a field list in the select statement.	☐	☐
Review and configure clustered index table properties.	☐	☐
Review and configure primary index table properties.	☐	☐
Add a column list that includes the RecId field to the query.	☐	☐

Answer:

Explanation:

Statement	Yes	No
Add the firstly keyword to the query and choose a field list in the select statement.	☒	☐
Review and configure clustered index table properties.	☐	☒
Review and configure primary index table properties.	☒	☐
Add a column list that includes the RecId field to the query.	☒	☐

Explanation:

Yes, No, Yes, Yes.

Topic 3, Munson's Pickles and Preserves FarmBackground

Munson's Pickles and Preserves Farm produces and sells jarred food goods. The organization has several production and warehouse locations across the United States. Each location runs both production and warehousing operations. The company has three locations: East Central, and West.

The company is upgrading its Dynamics AX 2009 system to Dynamics 365 Finance.

Current environment

Munson's Pickles and Preserves Farm plans to migrate customizations, data, and integration from its legacy system into Dynamics 365 finance and operations apps. The Dynamics 365 finance and operations environment includes:

- * multiple cloud-hosted development environments using Microsoft Visual Studio 2017
 - * a Microsoft Azure DevOps project for source control
 - * two tier 2 environments for user acceptance testing and staging, as well as production
- Munson's Pickles and Preserves Farm is currently in the planning and development phase of the upgrade process- The company's internal development team needs additional development resources to address issues.

The company already created a project that is set up to use a custom model named GPExtensions.

Integrations

Munson's Pickles and Preserves Farm has a new integration for its freight processing information. The internal development team created the secure file transfer protocol (SFTP) site for the source information to be stored and the staging table to house the source information once the data is added to Dynamics 365 Finance, information from the source will be transferred once a day from the source system and integrated with the target system. More than 10,000 records will be transferred over the integration. The company created an aggregate entity for the integration to minimize the amount of transmitted data.

Munson's Pickles and Preserves Farm has added a new integration for freight processing where all item weights, dimensions, and other factors will be configured in the external portal while planning the loads. Once the load is planned, it will be integrated into Dynamics 365 finance and operations apps for the freight invoice processing to occur.

No duplicate invoices or postings are associated with the freight invoice charges. The integration of this information from the source system is intended only for report creation and compilation purposes.

Planned changes

Munson's Pickles and Preserves Farm wants to change inventory forms to fit its current needs. Any modifications or enhancements must follow the existing functionality for forms in Dynamics 365 Finance.

Requirements

Munson's Pickles and Preserves Farm wants to change inventory forms to fit its current needs. Any modifications or enhancements must follow the existing functionality for forms in Dynamics 365 Finance.

Integrations

All data from integrations have the same format as an existing Dynamics 365 Finance apps field. All enhancements or customizations must use existing assets before creating new functionality.

Munson's Pickles and Preserves Farm wants to change its integration strategy to include real-time data from the freight processing source system. The inventory must update as it is sold from the system. That information will be updated in Dynamics 365 Finance. The freight processing integration requires the use of an SFTP site to store XML files from the source system.

The additional integration will use OData and must be transferred in real time.

A periodic batch job must

- * Pull data from the SFTP site.
- * Import the data to a staging table used to hold the information from the source system.
- * Map source data to the target table in Dynamics 365 Finance.

The imported Load ID field must be added to the Sales Order header for all processed orders. Additional requirements for integrations, including other integration strategies, may be necessary as the company grows.

Existing tables must be changed to include the Load ID. The database will need to be synched before adding the Load ID field.

Changes

Munson's Pickles and Preserves Farm must change the Inventory Status form to include more columns. It plans to create a table to enter the data for the Inventory Status form as a new data source. The company wants to add both the Product Name field and Batch ID field to this new table. The current form includes the item number, location, license plate, product inventory dimensions, and quantity.

The grid on the inventory Status form must include the product name by using the item number and legal entity. The user interface must be created to include the new columns and the data must be available to add to the grid. The form must have only an Action Pane, a Navigation List, a List Style Grid, a Details Header, and a Details Tab in the design and include the Load ID field.

Munson's Pickles and Preserves Farm is currently in the process of adding the other required fields: one for Product Name and one for Batch ID- The new fields must be related to extended data types for the original fields on the existing data source for the Inventory Status form. Munson's Pickles and Preserves Farm plans to add the EcoResProduct Name and Batch ID data to the extended table for WHSTmpStatusChange. The fields on the table extension must be populated with data and visible on the inventory Status form on insert.

Issues

- * The Internal development team has created the SFTP site connections, the staging table, and the batch Jobs for the new integration for freight processing. The development team needs to map the source data to the target table and the data management workspace.

The development team notices errors with mapping target fields in the data management workspace. The team needs another developer to configure the table extensions, class extensions, and form extensions that are required for the planned changes.

* The internal development team has issues adding the required fields to the inventory Status standard form.

The team needs another developer to configure the table extensions, class extensions, and form extensions that are required for the planned changes.

NEW QUESTION # 86

You are a Dynamics 365 Finance developer.

A report uses a synchronous call based on a saleID value. There are long wait times for the report to complete printing. You must allow the user to continue to work while the report processes and inform the user immediately when the report completes printing. You need to implement the correct method calls and behavior.

Which code segments should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Code segment or object
Run the form asynchronously.	▼ element.runAsynch(classNum(CallReport), staticMethodStr(CallReport,RunReport)... Global:runAsynch(classNum(CallReport), staticMethodStr(CallReport,RunReport)... SysOperationSandbox::callStaticMethod(classNum(CallReport), staticMethodStr(CallReport,RunReport)...
Pass parameters to the method.	▼ data contract class container parm method

Answer:

Explanation:

Requirement	Code segment or object
Run the form asynchronously.	▼ element.runAsynch(classNum(CallReport), staticMethodStr(CallReport,RunReport)... Global:runAsynch(classNum(CallReport), staticMethodStr(CallReport,RunReport)... SysOperationSandbox::callStaticMethod(classNum(CallReport), staticMethodStr(CallReport,RunReport)...
Pass parameters to the method.	▼ data contract class container parm method

Explanation:

Box 1: element.runAsynch

Box 2: container

NEW QUESTION # 87

.....

We are carrying out renovation about MB-500 test engine all the time to meet the different requirements of the diversified production market. Thus we have prepared three kinds of versions on MB-500 preparation materials. If you are used to study with paper-based materials you can choose the PDF version of our MB-500 Study Guide. If you would like to get the mock test before the real MB-500 exam you can choose the software version, and if you want to study in anywhere at any time then our online APP version is your best choice since you can download it in any electronic devices.
