

Updated Oracle Valid 1z0-915-1 Exam Bootcamp Offer You The Best Exam Pattern | Oracle MySQL HeatWave Implementation Associate Rel 1

BTW, DOWNLOAD part of Itcerttest 1z0-915-1 dumps from Cloud Storage: <https://drive.google.com/open?id=1mQptBtZBRGR6HjHbxL2oatF1GLkLuD3J>

First and foremost, in order to cater to the different needs of people from different countries in the international market, we have prepared three kinds of versions of our 1z0-915-1 learning questions in this website. Second, we can assure you that you will get the latest version of our training materials for free from our company in the whole year after payment on 1z0-915-1 practice materials. Last but not least, we will provide the most considerate after sale service for our customers in twenty four hours a day seven days a week.

Oracle 1z0-915-1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Inbound Replication: For database administrators and replication experts, this section of the exam covers setting up and troubleshoot inbound replication and creating channels.
Topic 2	<ul style="list-style-type: none">Backing up and restoring DB systems: For database administrators and disaster recovery specialists, this section of the exam covers backing up and restoring a DB system, managing automatic backups, and performing point-in-time recovery.
Topic 3	<ul style="list-style-type: none">MySQL HeatWave Service: For database administrators, cloud architects, and DevOps engineers, this section of the exam covers identifying key features and benefits, describing MySQL HeatWave architecture, defining MySQL HeatWave terminology, and identifying MySQL HeatWave limitations.
Topic 4	<ul style="list-style-type: none">High Availability: For system reliability engineers and database architects, this domain of the exam covers how to enable and disable the high availability of a DB system, explain placement considerations for a high availability DB system, distinguish between switchover and failover, etc.
Topic 5	<ul style="list-style-type: none">Data Migrations: For data migration specialists and database administrators, this part of the exam covers creating a DB system with data import, importing data into a DB system, and exporting data from MySQL servers and DB systems.
Topic 6	<ul style="list-style-type: none">MySQL HeatWave Configurations: For database administrators and performance tuning specialists, this part of the exam covers creating custom configurations, comparing configurations, describing the effects of changing dynamic and non-dynamic variables, and updating a DB system configuration.
Topic 7	<ul style="list-style-type: none">Describe the architecture of the HeatWave cluster, adding a HeatWave cluster to a DB system, and determine whether a query is offloaded to HeatWave cluster for execution.
Topic 8	<ul style="list-style-type: none">Managing DB systems: For network administrators and cloud infrastructure specialists, this domain of the exam covers demonstrating a command of DRG and DRG Attachments, applying BGP in the OCI environment, evaluating OCI VPN Services, and validating the various FastConnect products from OCI.

1z0-915-1 Exam Pattern & Cert 1z0-915-1 Exam

We all know the effective diligence is in direct proportion to outcome, so by years of diligent work, our experts have collected the frequent-tested knowledge into our 1z0-915-1 practice materials for your reference. So our 1z0-915-1 training materials are triumph of their endeavor. By resorting to our 1z0-915-1 practice materials, we can absolutely reap more than you have imagined before. We have clear data collected from customers who chose our 1z0-915-1 actual tests, the passing rate is 98-100 percent. So your chance of getting success will be increased greatly by our materials.

Oracle MySQL HeatWave Implementation Associate Rel 1 Sample Questions (Q54-Q59):

NEW QUESTION # 54

You have successfully provisioned a MySQL DB system on Oracle Cloud Infrastructure by using OCI Console. You have installed the standard MySQL client libraries and MySQL Shell on your workstation that is not connected to any VPN, FastConnect, or SSH tunnel.

You CANNOT connect directly to the DB system endpoint from your workstation connected to the Internet.

What is the reason?

- A. MySQL DB system endpoint does not have a public IP address.
- B. MySQL DB system allows only connections through a proxy server.
- C. MySQL DB system cannot use the standard MySQL client libraries.
- D. MySQL DB system allows only SSL-encrypted connections.

Answer: A

Explanation:

If you cannot connect directly to the MySQL DB system endpoint from your workstation connected to the Internet, the reason is that MySQL DB system endpoint does not have a public IP address (Answer B).

* Private Subnet: The MySQL DB system is provisioned in a private subnet, which means it is not directly accessible from the Internet.

* Network Accessibility: To access the DB system, you need to establish a secure connection via a VPN, FastConnect, or SSH tunnel.

References:

* Connecting to a MySQL DB System

* OCI Networking Documentation

NEW QUESTION # 55

You want to create a new DB system with data import. How do you prepare the data?

- A. Back up the database into an Object Storage bucket with MySQL Enterprise Backup.
- B. Export the data into the file system with a MySQL Shell dump utility
- C. Export the data into an Object Storage bucket with a MySQL Shell dump utility.
- D. Export the data into the file system with the mysqldump client utility.

Answer: C

Explanation:

To prepare data for a new DB system with data import in OCI, you should export the data into an Object Storage bucket with a MySQL Shell dump utility (Answer B). This method allows you to store the data in a scalable and durable object storage service before importing it into the new DB system.

Steps:

* Use MySQL Shell dump utility to export the data.

* Save the export files to an Object Storage bucket in OCI.

* Import the data from the Object Storage bucket into the new DB system.

References:

* MySQL Shell Documentation

* OCI Object Storage Documentation

NEW QUESTION # 56

You have obtained a new tenancy on Oracle Cloud Infrastructure. You first create a VCN by using the VCN Wizard, and then

create a MySQL DB system. You want to create a Connection in Database tools to use the SQL Worksheet feature. Which three steps are required? (Choose three.)

- **A. Create an OCI secret.**
- B. Create an encryption key.
- C. Create an OCI vault.
- **D. Import an X.509 certificate into the OCI vault.**
- **E. Create an OCI password.**

Answer: A,D,E

Explanation:

To create a connection in Database Tools to use the SQL Worksheet feature, the following steps are required:

- * Create an OCI password(Answer A): This password is necessary for authentication when connecting to the MySQL DB system.
- * Create an OCI secret(Answer D): Secrets are used to store sensitive information like passwords securely. The secret will contain the database credentials.
- * Import an X.509 certificate into the OCI vault(Answer E): This certificate is required for secure connections to the database, ensuring encrypted communication.

References:

- * OCI Database Tools Documentation
- * Using OCI Secrets
- * X.509 Certificates Documentation

NEW QUESTION # 57

You want to restore a stand-alone DB system to a high-availability DB system with a point-in-time recovery. Which three are required? (Choose three.)

- A. Every user table must have a primary key.
- B. The stand-alone DB system must remain active during the restore.
- **C. An automatic backup taken before the selected point in time must be available.**
- **D. A manual backup taken before the selected point in time must be available.**
- **E. Point-in-time recovery must be enabled before the point in time to which you want to restore.**

Answer: C,D,E

NEW QUESTION # 58

You have a MySQL DB system with five active read replicas. The workload consists of 5% writes and 95% reads. Which connection method provides the fastest query response time?

- **A. Connect to the read replica load balancer to perform read-only operations.**
- B. Connect to the read replica load balancer to perform read/write operations.
- C. Connect to a specific read replica to perform read-only operations.
- D. Connect to the source DB system to perform read-only operations.

Answer: A

Explanation:

For a MySQL DB system with five active read replicas and a workload consisting mostly of reads, the fastest query response time is achieved by:

C:Connect to the read replica load balancer to perform read-only operations: The read replica load balancer distributes the read workload across all replicas, optimizing performance and response time.

NEW QUESTION # 59

.....

It is very convenient for all people to use the 1z0-915-1 study materials from our company. Our study materials will help a lot of people to solve many problems if they buy our products. The online version of 1z0-915-1 study materials from our company is not limited to any equipment, which means you can apply our study materials to all electronic equipment, including the telephone,

computer and so on. So the online version of the 1z0-915-1 Study Materials from our company will be very useful for you to prepare for your exam. We believe that our 1z0-915-1 study materials will be a good choice for you.
