SSE-Engineer Exam Price | SSE-Engineer Certification Exam Dumps

Do you want to get the SSE-Engineer exam braindumps as quickly as you finish paying, then choose the SSE-Engineer study material of us, we can do this for you. You can pass the exam only just need to spend about 48 to 72 hours in practicing. The SSE-

Engineer exam braindumps of us is verified by experienced experts, therefore the quality and the accuracy of the SSE-Engineer Study Materials can be guaranteed, and we also pass guarantee and money back guarantee for your fail to pass the exam.

Palo Alto Networks Security Service Edge Engineer Sample Questions (Q23-Q28):

NEW QUESTION # 23

When a review of devices discovered by IoT Security reveals network routers appearing multiple times with different IP addresses, which configuration will address the issue by showing only unique devices?

- A. Create a custom role to merge devices with the same hostname and operating system.
- B. Delete all duplicate devices, keeping only those discovered using their management IP addresses.
- C. Merge individual devices into a single device with multiple interfaces.
- D. Add the duplicate entries to the ignore list in IoT Security.

Answer: C

Explanation:

When network routers appear multiple times with different IP addresses in IoT Security, it is likely because they have multiple interfaces with separate IPs. Merging these entries into a single device with multiple interfaces ensures that the system correctly identifies each router as a unique entity while maintaining visibility across all its interfaces. This approach prevents unnecessary duplicates, improves asset management, and enhances security monitoring.

NEW QUESTION # 24

Strata Logging Service is configured to forward logs to an external syslog server; however, a month later, there is a disruption on the syslog server.

Which action will send the missing logs to the external syslog server?

- A. Delete the affected syslog server profile and create a new one.
- B. Configure a replay profile with the affected time range and associate it with the affected syslog server profile.
- C. Export the logs from Strata Logging Service, and then manually import them to the syslog server.
- D. Configure a log filter under the syslog server profile with the affected time range.

Answer: B

Explanation:

The Strata Logging Service allows log replay, which enables resending logs that were not successfully forwarded to an external syslog server due to disruptions. By configuring a replay profile with the affected time range and associating it with the syslog server profile, Prisma Access will resend the missing logs, ensuring that all relevant data is restored in the external logging system. This approach is the most efficient and automated way to recover missing logs.

NEW QUESTION # 25

After configuring domain-based split tunnel for zoom.us, how is expected behavior on the client machine confirmed?

- A. Enable debug level logs on GlobalProtect Application.
- B. Verify from the routing table.
- C. Ping zoom.us from the CLI.
- D. Verify zoom.us is resolved by the tunnel assigned DNS server.

Answer: B

Explanation:

After configuring domain-based split tunneling for zoom.us, the expected behavior can be confirmed by checking the routing table on the client machine. If split tunneling is correctly configured, the traffic for zoom.us should be routed outside the GlobalProtect VPN tunnel, while other traffic follows the tunnel path.

Reviewing the routing table ensures that only the intended traffic is excluded from the tunnel, confirming that the split tunnel configuration is working as expected.

NEW QUESTION # 26

How can a network security team be granted full administrative access to a tenant's configuration while restricting access to other tenants by using role-based access control (RBAC) for Panorama Managed Prisma Access in a multitenant environment?

- **A. Create an Access Domain and restrict access to only the Device Groups and Templates for the Target Tenant.**
- B. Create a custom role with Device Group and Template privileges and assign it to the security team's user accounts.
- C. Create a custom role enabling all privileges within the specific tenant's scope and assign it to the security team's user accounts.
- D. Set the administrative accounts for the security team to the "Superuser" role.

Answer: A

Explanation:

In a Panorama Managed Prisma Access multitenant environment, Access Domains provide granular role-based access control (RBAC). By defining an Access Domain, the network security team can be granted full administrative privileges for a specific tenant's configuration while ensuring they cannot access or modify other tenants. This method enforces proper segmentation and ensures compliance with multitenant security policies.

NEW QUESTION # 27

An engineer has configured a Web Security rule that restricts access to certain web applications for a specific user group. During testing, the rule does not take effect as expected, and the users can still access blocked web applications. What is a reason for this issue?

- A. The rule was created at a higher level in the rule hierarchy, giving priority to a lower-level rule.
- B. The rule was created in the wrong scope, affecting only GlobalProtect users instead of all users.
- C. The rule was created with improper threat management settings.
- **D. The rule was created at a lower level in the rule hierarchy, giving priority to a higher-level rule.**

Answer: D

Explanation:

Prisma Access applies security rules in a hierarchical order, where rules at higher levels take precedence over those at lower levels. If a more permissive rule is placed higher in the hierarchy, it may allow traffic before the restrictive Web Security rule is evaluated. To resolve this, the engineer should reorder the rules to ensure the restrictive Web Security rule is positioned higher in the hierarchy so it is applied before any broader or conflicting rules.

NEW QUESTION # 28

.....

The desktop software Palo Alto Networks Security Service Edge Engineer (SSE-Engineer) practice exam format can be used easily used on your Windows system. Customers can use it without the internet. ExamBoosts have made all of the different formats so the students won't face any extra issues and crack Palo Alto Networks Security Service Edge Engineer (SSE-Engineer) certification exams for the betterment of their futures.
