ITdumpsfree releases 100% pass-rate B2C-Commerce-Architect Study Guide files which guarantee candidates 100% pass exam in the first attempt.

Salesforce B2C-Commerce-Architect (Salesforce Certified B2C Commerce Architect) Exam is designed to validate the skills and knowledge of individuals who specialize in architecting and implementing B2C commerce solutions using the Salesforce Commerce Cloud platform. B2C-Commerce-Architect Exam is specifically intended for professionals who have already earned the Salesforce Certified Technical Architect (CTA) credential and want to further specialize in B2C commerce.

## Salesforce Certified B2C Commerce Architect Sample Questions (Q54-Q59):

### NEW QUESTION # 54

The Client wants to offer custom made container products on its new B2C Commerce storefront. The Client provided two business requirements.

- \* Customer can specify container length, width, and height.
- \* Customer can specify the material that the container is made of.

The Client also provided the Architect a current data schema (shown below) for reference while preparing the technical

documentation.

Which two gaps between the requirements and the data schema should the Architect discuss with the Client?

Choose 2 answers

- A. The data schema includes a Color\_ID field, but there isn't a business requirement to allow the customer to specify container color.
- B. The data schema includes an implied structure that the customer's choices should be captured as custom objects, but there isn't a business requirement to do so
- C. The data schema includes unique identifiers for material and color fields, but neither are reflected in the business requirements.
- D. The data schema includes a material Price\_Markup field, but there isn't a business requirement to factor the material cost into the final price calculation.

Answer: A,D

#### NEW QUESTION # 55

You're in charge of Pipeline migration to Controllers. What should be the best approach to do it in order to avoid poor performance and using Pipelines and controllers together until all migration is done?

- A. onRequest and onSession pipelines are replaced with the onRequest and onSession hooks.
- B. To reduce risk of circular dependencies and for easier migration mix pipelines and controllers in a single cartridge.
- C. Use the same name for new Controllers than pipelines because it will be easy to identify that is migrated and Controllers take precedence. Furthermore it will be a good practice to do it in separate cartridges.
- D. Controllers and pipelines must be in the same folder to avoid collisions between them.

Answer: A,C

#### NEW QUESTION # 56

Given a website launched to production, the Architect can rely on several SFCC Business Manager tools that provide an automatic notification feature.

Which three tools have such a feature and do not require to be monitored manually?

Choose 3 answers

- A. Analytics Conversion Reports
- B. Pipeline Profiler
- C. Quota Status
- D. Job Schedules
- E. Custom Log Settings

**Answer: B,C,D**

Explanation:

The Salesforce B2C Commerce Business Manager tools that feature automatic notifications are:

Option A (Job Schedules): Business Manager can send notifications based on job schedules, alerting users when a scheduled job has completed, failed, or met specific conditions. This feature helps in monitoring automated processes without manual oversight.

Option D (Pipeline Profiler): This tool provides automatic notifications regarding the performance of different pipelines, allowing architects and developers to monitor site performance and troubleshoot issues proactively.

Option E (Quota Status): Automatically notifies administrators when certain quotas are reached or exceeded, such as API call limits or data storage limits, which is crucial for maintaining site stability and performance.

These tools are essential for proactive site management, ensuring that administrators can address potential issues before they affect the site's operation.

#### NEW QUESTION # 57

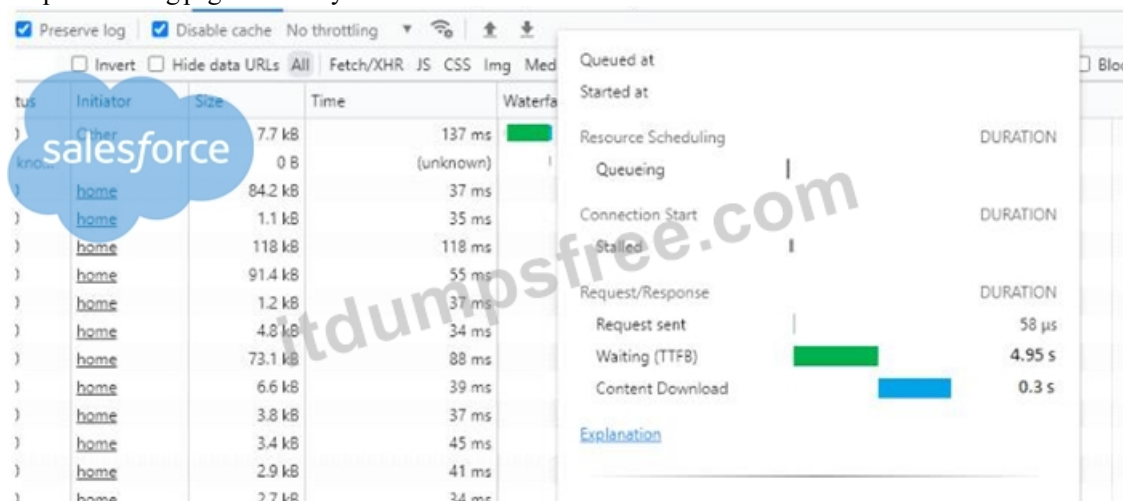

During the discovery phase as an architect you should make some recommendations to be sure all requirements will fit under SFCC scope. The project consists in building one storefront using SFRA and a native iOS app. The home page will be fully implemented using Page Designer in order to allow merchandisers to fully customize it. What should be taken into consideration?

- A. Replication and reindexing process works differently with page designer vs content assets, so home page for mobile application may be different than website for 15 minutes.
- B. Page designer load times are bigger than if using content slots.
- C. All answers are correct.
- D. Page Designer doesn't support using the OCAPi SHOP and DATA resources to access pages and components as content assets.

**Answer: D**

#### NEW QUESTION # 58

You're in charge of identifying a bottleneck in the network chain. Given this Google Dev Tools screenshot of a particular request in the product listing page. What may be the root cause?

- A. Internet connection intermittently drops out.
- B. Everything works as expected. All parameters are within pre-established limits.
- C. Probably the issue is on the server side and needs further investigation from a code perspective.
- D. Good indication of a local network or browser issue.

**Answer: C**

#### NEW QUESTION # 59
