TroytecDumps PTCE Questions have helped thousands of candidates to achieve their professional dreams. Our Pharmacy Technician Certification Exam (PTCE) exam dumps are useful for preparation and a complete source of knowledge. If you are a full-time job holder and facing problems finding time to prepare for the Medical Tests PTCE Exam Questions, you shouldn't worry more about it.

Although this may not sound like the hardest job in the world, being a pharmacy technician isn't easy, as the work these people do directly affects the health of others. Therefore, it is vitally important that people hired as pharmacy technicians are qualified for this job. This is why more and more pharmacies and pharmacy chains expect their employees to have a valid PTCB credential.

Exam PTCE Price | PTCE Actual Test

The only aim of our company is to help each customer pass their exam as well as getting the important certification in a short time. If you want to pass your exam and get the PTCE certification which is crucial for you successfully, I highly recommend that you should choose the PTCE Study Materials from our company so that you can get a good understanding of the exam that you are going to prepare for.

Medical Tests Pharmacy Technician Certification Exam Sample Questions

(Q236-Q241):

NEW QUESTION # 236

A patient presents the following prescription:

Clobetasol 0.05% cream

Apply small amount to affected area b.i.d. x 14 days. Avoid face, groin, and axilla.

According to the instructions, the patient should avoid applying the medication to their:

- A. underarms
- B. scalp
- C. feet
- D. chest

Answer: A

Explanation:

The axilla refers to the underarm area. Clobetasol is a high-potency corticosteroid, and such steroids are not recommended for use on thin-skinned areas like the face, groin, or underarms (axilla) due to risk of increased absorption and adverse effects like skin atrophy.

Mosby's Pharmacy Technician: Principles and Practice explains:

"High-potency corticosteroids should not be applied to intertriginous areas such as the axilla, groin, or face due to increased absorption and systemic risk." Reference:

Clobetasol Prescribing Information

Mosby's Pharmacy Technician: Principles and Practice, Topical Medications Section American Academy of Dermatology Guidelines

NEW QUESTION # 237

Which of these temperatures would be within Controlled / Room Temperature standards?

- A. 38f
- B. 65c
- C. 20c
- D. 86f

Answer: C

NEW QUESTION # 238

CORRECT TEXT

How many milliliters of 35% acetic acid must be mixed with 15% acetic acid to give 1000ml of 10% acetic acid?

Answer:

Explanation:

1 66.7 ml 35%; 833.3 ml of 15% (Chapter 4)

NEW QUESTION # 239

If a prescription for amoxicillin 150 mg PO q8h for 10 days is filled with a 250 mg/5 mL suspension, how many mL would the patient take per dose?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

To determine the correct volume of amoxicillin suspension per dose, use the given concentration and dose.

* Prescription dose: 150 mg per dose

* Suspension concentration: 250 mg per 5 mL

* Formula to calculate volume needed: $\text{Volume (mL)} = \frac{\text{Prescribed dose (mg)}}{\text{Concentration (mg/mL)}} \times \text{Volume (mL)}$
 $= \frac{\text{Concentration (mg/mL)} \times \text{Prescribed dose (mg)}}{\text{Concentration (mg/mL)}}$

Step 1: Identify Given Information Step 2: Calculate $\frac{150 \text{ mg}}{250 \text{ mg/5 mL}} = \frac{150 \times 5}{250} = \frac{750}{250} = 3 \text{ mL}$
 $\frac{150 \text{ mg}}{250 \text{ mg/5 mL}} = \frac{150 \times 5}{250} = \frac{750}{250} = 3 \text{ mL}$
 $\frac{150 \text{ mg}}{250 \text{ mg/5 mL}} = \frac{150 \times 5}{250} = \frac{750}{250} = 3 \text{ mL}$

Thus, the patient should take 3 mL per dose.

* B. 4 mL # Incorrect; this would correspond to a different strength.

* C. 5 mL # Incorrect; this would deliver 250 mg, which is incorrect.

* D. 6 mL # Incorrect; this would deliver 300 mg, exceeding the prescribed dose.

Other Answer Choices Explained: References:
