

Use Palo Alto Networks NetSec-Pro PDF Questions [2025]-Forget About Failure

P.S. Free 2025 Palo Alto Networks NetSec-Pro dumps are available on Google Drive shared by PDFTorrent:
<https://drive.google.com/open?id=1afcGhgbgPCKoRdKnCC-Qveaw-8rXl7uV>

Once you compare our NetSec-Pro study materials with the annual real exam questions, you will find that our NetSec-Pro exam questions are highly similar to the real exam questions. We have strong strengths to assist you to pass the exam. All in all, we hope that you are brave enough to challenge yourself. Our NetSec-Pro learning prep will live up to your expectations. It will be your great loss to miss our NetSec-Pro practice engine.

PDFTorrent regularly updates Palo Alto Networks Network Security Professional (NetSec-Pro) practice exam material to ensure that it keeps in line with the test. In the same way, PDFTorrent provides a free demo before you purchase so that you may know the quality of the Palo Alto Networks NetSec-Pro dumps. Similarly, the PDFTorrent Palo Alto Networks Network Security Professional (NetSec-Pro) practice test creates an actual exam scenario on each and every step so that you may be well prepared before your actual Palo Alto Networks Network Security Professional (NetSec-Pro) examination time. Hence, it saves you time and money.

NetSec-Pro Pass Exam Free PDF | Efficient NetSec-Pro Study Tool: Palo Alto Networks Network Security Professional

Our NetSec-Pro test questions are available in three versions, including PDF versions, PC versions, and APP online versions. And NetSec-Pro test material users can choose according to their own preferences. The most popular version is the PDF version of NetSec-Pro exam prep. The PDF version of NetSec-Pro test questions can be printed out to facilitate your learning anytime, anywhere, as well as your own priorities. The PC version of NetSec-Pro Exam Prep is for Windows users. If you use the APP online version, just download the application program, you can enjoy our NetSec-Pro test material service.

Palo Alto Networks Network Security Professional Sample Questions (Q27-Q32):

NEW QUESTION # 27

A network engineer pushes specific Panorama reports of new AI URL category types to branch NGFWs. Which two report types achieve this goal? (Choose two.)

- A. SNMP
- B. PDF summary
- C. CSV export
- D. Custom

Answer: B,D

Explanation:

Panorama allows engineers to create custom reports and generate PDF summary formats for consistent reporting across NGFWs.

Custom Reports

"Custom Reports provide tailored reporting based on URL categories, application usage, and threat visibility.

They are generated within Panorama and can include data on newly categorized AI URL types." (Source: Panorama Reports) PDF Summaries

"You can generate PDF summary reports to distribute these insights across branch firewalls, providing an easy-to-read format for compliance and operational review." (Source: Export Reports as PDF) Together, these options provide a consistent, standardized method to push insights about AI-based URL categories to branch devices.

NEW QUESTION # 28

When configuring Security policies on VM-Series firewalls, which set of actions will ensure the most comprehensive Security policy enforcement?

- A. Configure all default policies provided by the firewall, use Policy Optimizer, and adjust security rules after an incident occurs.
- B. Configure a block policy for all malicious inbound traffic, configure an allow policy for all outbound traffic, and update regularly with dynamic updates.
- C. Configure port-based policies, check threat logs weekly, conduct software updates annually, and enable decryption.
- D. Configure policies using User-ID and App-ID, enable decryption, apply appropriate security profiles to rules, and update regularly with dynamic updates.

Answer: D

Explanation:

A comprehensive security approach uses:

- * User-ID for identity-based policies
- * App-ID for application-based security
- * Decryption to inspect encrypted traffic
- * Security profiles to enforce protections
- * Dynamic updates to ensure up-to-date threat coverage

"For comprehensive security, combine User-ID, App-ID, decryption, and security profiles. Keep the firewall updated with dynamic content updates to maintain the strongest security posture." (Source: Best Practices for Security Policy) This ensures real-time, identity-aware, and application-centric security enforcement.

NEW QUESTION # 29

How does a firewall behave when SSL Inbound Inspection is enabled?

- A. It acts transparently between the client and the internal server.
- B. It acts as a meddler-in-the-middle between the client and the internal server.
- C. It decrypts inbound and outbound SSH connections.
- D. It decrypts traffic between the client and the external server.

Answer: B

Explanation:

SSL Inbound Inspection allows the firewall to decrypt incoming encrypted traffic to internal servers (e.g., web servers) by acting as a man-in-the-middle (MITM). The firewall uses the private key of the server to decrypt the session and apply security policies before

re-encrypting the traffic.

"SSL Inbound Inspection requires you to import the server's private key and certificate into the firewall. The firewall then acts as a man-in-the-middle (MITM) to decrypt inbound sessions from external clients to internal servers for inspection." (Source: SSL Inbound Inspection)

NEW QUESTION # 30

Which two features can a network administrator use to troubleshoot the issue of a Prisma Access mobile user who is unable to access SaaS applications? (Choose two.)

- A. SaaS Application Risk Portal
- B. GlobalProtect logs
- C. Capacity Analyzer
- D. Autonomous Digital Experience Manager (ADEM) console

Answer: B,D

Explanation:

GlobalProtect logs

These logs provide detailed insights into the user's connectivity, tunnel status, and authentication events.

"GlobalProtect logs include detailed information about connection establishment, tunnel negotiation, and any errors that can prevent mobile users from accessing applications." (Source: GlobalProtect Troubleshooting) Autonomous Digital Experience Management (ADEM) ADEM helps visualize end-to-end performance and identifies network issues affecting SaaS app access for mobile users.

"ADEM provides real-time and historical visibility into user experience, enabling quick identification and resolution of connectivity or performance issues for SaaS applications." (Source: ADEM for Prisma Access)

NEW QUESTION # 31

In a distributed enterprise implementing Prisma SD-WAN, which configuration element should be implemented first to ensure optimal traffic flow between remote sites and headquarters?

- A. Configure static routes between all the branch offices.
- B. Deploy redundant ION devices at each location.
- C. Enable split tunneling for all branch locations.
- D. Implement dynamic path selection using real-time performance metrics.

Answer: D

Explanation:

Dynamic path selection is the foundation of SD-WAN, leveraging real-time performance data to dynamically route traffic over the best available path.

"Dynamic path selection continuously monitors performance metrics (loss, latency, jitter) and makes real-time routing decisions to ensure application SLAs are met across the WAN." (Source: Prisma SD-WAN Dynamic Path Selection) Establishing dynamic path selection first ensures the rest of the SD-WAN optimizations (e.g., failover, QoS) work effectively.

NEW QUESTION # 32

.....

It is well known that under the guidance of our NetSec-Pro PDF study exam, you are more likely to get the certification easily. But I think few of you know the advantages after getting certificates. Basically speaking, the benefits of certification with the help of our NetSec-Pro practice test can be classified into three aspects. Firstly, with the certification, you can have access to big companies where you can more job opportunities which you can't get in the small companies. Secondly, with our NetSec-Pro Preparation materials, you can get the NetSec-Pro certificates and high salaries.
