

Use the Latest Ping Identity PAP-001 Questions to pass your Certification Exam

Even in a globalized market, the learning material of similar PAP-001 doesn't have much of a share, nor does it have a high reputation or popularity. In this dynamic and competitive market, the PAP-001 learning questions can be said to be leading and have absolute advantages. In order to facilitate the user real-time detection of the learning process, we PAP-001 Exam Material provided by the questions and answers are all in the past. It is closely associated, as our experts in constantly update products every day to ensure the accuracy of the problem, so all PAP-001 practice materials are high accuracy.

Ping Identity PAP-001 Exam Syllabus Topics:

Topic	Details
Topic 1	General Maintenance and File System: This section of the exam measures the skills of System Engineers and addresses maintenance tasks such as license management, backups, configuration imports or exports, auditing, and product upgrades. It also includes the purpose of log files and an overview of the PingAccess file system structure with important configuration files.
Topic 2	Security: This section of the exam measures skills of Security Administrators and highlights how to manage certificates and certificate groups. It covers the association of certificates with virtual hosts or listeners and the use of administrator roles for authentication management.
Topic 3	Product Overview: This section of the exam measures skills of Security Administrators and focuses on understanding PingAccess features, functionality, and its primary use cases. It also covers how PingAccess integrates with other Ping products to support secure access management solutions.

Topic 4	• Policies and Rules: This section of the exam measures the skills of Security Administrators and focuses on how PingAccess evaluates paths for applying policies and resources. It covers the role of different rule types, their configuration, and the implementation of rule sets and rule set groups for consistent policy enforcement.
Topic 5	• Installation and Initial Configuration: This section of the exam measures skills of System Engineers and reviews installation prerequisites, methods of installing or removing PingAccess, and securing configuration database passwords. It explains the role of run.properties entries and outlines how to set up a basic on-premise PingAccess cluster.

Once you enter into our official website, you will find everything you want. All the PAP-001 test engines are listed orderly. You just need to choose what you are willing to learn. In addition, you will feel comfortable and pleasant to shopping on such a good website. All the contents of our PAP-001 practice test are organized logically. Each small part contains a specific module. You can clearly get all the information about our PAP-001 Study Guide. If you cannot find what you want to know, you can have a conversation with our online workers. They have been trained for a long time. Your questions will be answered accurately and quickly. We are still working hard to satisfy your demands. Please keep close attention to our PAP-001 training material.

Ping Identity Certified Professional - PingAccess Sample Questions (Q33-Q38):

NEW QUESTION # 33

Which two variables should be set in order for the PingAccess service script to start? (Choose 2 answers.)

- A. PA_HOME
- B. J2EE_HOME
- C. JAVA_HOME
- D. PA_PATH
- E. JAVA_PATH

Answer: A,C

Explanation:

PingAccess service scripts depend on knowing:

- * Where the Java runtime is installed (JAVA_HOME)
- * Where PingAccess itself is installed (PA_HOME)

Exact Extract:

"The PingAccess startup scripts require the JAVA_HOME environment variable to locate the JDK/JRE and the PA_HOME variable to locate the PingAccess installation directory."

- * Option A (J2EE_HOME) is irrelevant to PingAccess.
- * Option B (JAVA_HOME) is correct - needed for Java execution.
- * Option C (PA_PATH) is not a standard variable.
- * Option D (PA_HOME) is correct - required to point to the PingAccess installation root.
- * Option E (JAVA_PATH) is not valid; PATH can include Java, but JAVA_HOME is the correct environment variable.

NEW QUESTION # 34

Which of the following is a processing rule?

- A. HTTP Request Header
- B. HTTP Request Parameter
- C. Web Session Attribute
- D. Cross-Origin Request

Answer: D

Explanation:

PingAccess rules are categorized into Access Control Rules and Processing Rules.

* Processing Rules modify or add to HTTP requests and responses.

* Cross-Origin Request (CORS) is specifically listed as a Processing Rule, because it modifies response headers to support cross-origin requests.

Exact Extract:

"Processing rules apply to HTTP traffic, such as Cross-Origin Resource Sharing (CORS), header injection, or response modification."

* Option A (Web Session Attribute) is an access control rule.

* Option B (Cross-Origin Request) is correct - this is a processing rule.

* Option C (HTTP Request Parameter) is an access control rule.

* Option D (HTTP Request Header) is an access control rule.

NEW QUESTION # 35

An administrator configures PingAccess to use PingFederate as the token provider. Which benefit does this provide?

- A. The ability to use Single Sign-On support for the administrative console and OAuth for Admin API
- **B. The automatic population of the Client ID field for selection in creating or editing a Web Session**
- C. The ability to manage token issuance criteria from within PingAccess
- D. The ability to define new OAuth clients in PingFederate from within PingAccess

Answer: B

Explanation:

When PingAccess is integrated with PingFederate as a Token Provider, the OAuth clients already configured in PingFederate become available in PingAccess. This enables administrators to automatically select Client IDs when creating Web Sessions.

Exact Extract:

"When PingAccess uses PingFederate as its token provider, PingFederate OAuth clients appear automatically in PingAccess for selection during web session configuration."

* Option A is incorrect - this refers to Admin Console authentication, which is separate.

* Option B is incorrect - OAuth clients must be created in PingFederate, not from within PingAccess.

* Option C is incorrect - token issuance policies are managed in PingFederate, not PingAccess.

* Option D is correct - the Client ID dropdown is populated automatically from PingFederate.

Reference: PingAccess Administration Guide - Token Provider Configuration

NEW QUESTION # 36

A business application must be accessible via two FQDNs. Which PingAccess functionality should an administrator use to meet this requirement?

- A. Sites
- B. Web Sessions
- **C. Virtual Hosts**
- D. Applications

Answer: C

Explanation:

Virtual Hosts in PingAccess define the external FQDNs (and ports) through which applications are accessed.

An application can be bound to multiple virtual hosts to allow access via multiple FQDNs.

Exact Extract:

"A virtual host specifies the fully qualified domain name and port number through which an application is accessed."

* Option A (Virtual Hosts) is correct - multiple FQDNs can be supported by assigning multiple virtual hosts.

* Option B (Applications) define resource protection but do not manage FQDN binding.

* Option C (Sites) define back-end targets, not the public-facing FQDN.

* Option D (Web Sessions) handle authentication state, unrelated to hostnames.

Reference: PingAccess Administration Guide - Virtual Hosts

NEW QUESTION # 37

Which element in the log4j2.xml file must be modified to change the log level in PingAccess?

- A. Appenders
- B. RollingFile
- C. AsyncLogger
- D. Logger

Answer: D

Explanation:

In Log4j2, the Logger element controls the log level (INFO, DEBUG, ERROR, etc.) for specific packages or classes.

Exact Extract:

"To modify logging levels, edit the <Logger> element in log4j2.xml and change the level attribute."

* Option A (AsyncLogger) is a performance optimization, not for changing levels.

* Option B (RollingFile) defines file rotation, not log levels.

* Option C (Logger) is correct - this is where log levels are defined.

* Option D (Appenders) define output destinations, not severity levels.

Reference: PingAccess Administration Guide - Log Configuration

NEW QUESTION # 38

.....

If you do not have extraordinary wisdom, do not want to spend too much time on learning, but want to reach the pinnacle of life through PAP-001 exam, then you must have PAP-001 question torrent. The goal of PAP-001 exam torrent is to help users pass the exam with the shortest possible time and effort. With PAP-001 Exam Torrent, you neither need to keep yourself locked up in the library for a long time nor give up a rare vacation to review. You will never be frustrated by the fact that you can't solve a problem.
