

Useful 1z0-1080-24 Test Discount Provide Prefect Assistance in 1z0-1080-24 Preparation

How to Pre-Order the products:

1. Click "Pay Now" & Follow the payment instructions
2. Our Expert will arrange real Exam Questions within 3 Days to 10 Days especially for you.
3. You will be notified within as soon as your Exam is ready with all Real Questions and Possible Answers in PDF & Practice Exam Software formats.

DOWNLOAD the newest Prep4sureExam 1z0-1080-24 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1T4CtltjvkQy0MNHExB7yOCQuKi0vHlz>

The passing rate of our 1z0-1080-24 study materials is the issue the client mostly care about and we can promise to the client that the passing rate of our product is 99% and the hit rate is also high. Our 1z0-1080-24 study materials are selected strictly based on the real 1z0-1080-24 exam and refer to the exam papers in the past years. Our expert team devotes a lot of efforts on them and guarantees that each answer and question is useful and valuable. We also update frequently to guarantee that the client can get more 1z0-1080-24 learning resources and follow the trend of the times. So if you use our study materials you will pass the test with high success probability.

Oracle 1z0-1080-24 Exam Syllabus Topics:

Topic	Details
Topic 1	• Set Up Planning Security: This section of the exam measures the skills of security administrators and focuses on provisioning users and groups. It includes assigning access permissions to artifacts and cells in Planning to ensure secure access to critical information.
Topic 2	• Manage Rules: This section of the exam measures the skills of business rule developers and focuses on designing business rules and rulesets. It explains the benefits of Groovy Rules in enhancing performance and flexibility within Planning applications.
Topic 3	• Manage Metadata and Data: This section of the exam measures the skills of data integration specialists and covers metadata and data management in Planning. It includes identifying metadata and data load options, importing and exporting metadata and data, setting up and running data maps, creating data integrations, and mapping data across applications.
Topic 4	• Introduction to Planning Modules: This section of the exam measures the skills of module planners and introduces Planning modules. It includes integrating modules, leveraging best practices for module planning, and configuring Financials, Workforce, Capital, and Projects.
Topic 5	• Configure Intelligent Performance Management: This section of the exam measures the skills of machine learning specialists and focuses on configuring IPM components. It includes setting up machine learning models for predictive analytics within Planning applications.
Topic 6	• Report on Planning Data: This section of the exam measures the skills of reporting analysts and covers creating reports on Planning data. It includes reporting on EPM data to provide insights into organizational performance.
Topic 7	• Maintain Planning: This section of the exam measures the skills of system administrators and focuses on monitoring maintenance tasks for Planning applications. It includes scheduling jobs, managing EPM Automate for automation tasks, backing up data, migrating metadata, cloning environments, and maintaining system updates.

Topic 8	• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of dashboard designers and covers designing forms, dashboards, and validation rules. It also includes creating and managing navigation flows to streamline user experience within Planning applications.
Topic 9	• Planning Overview: This section of the exam measures the skills of planning administrators and focuses on understanding the features of Planning applications. It includes setting up Planning and Freeform applications, managing dimensions, and explaining the impact of dimension hierarchies. It also covers configuring valid and invalid intersections and cell-level security.
Topic 10	• Introduction to Strategic Modelling: This section of the exam measures the skills of strategic modelers and covers strategic modeling concepts. It includes setting up models, running simulations, and understanding their impact on decision-making processes.

Dumps Oracle 1z0-1080-24 Download & Latest 1z0-1080-24 Exam Practice

As the old saying goes, practice is the only standard to testify truth. In other word, it has been a matter of common sense that pass rate of the 1z0-1080-24 study materials is the most important standard to testify whether it is useful and effective for people to achieve their goal. We believe that you must have paid more attention to the pass rate of the 1z0-1080-24 study materials. If you focus on the study materials from our company, you will find that the pass rate of our products is higher than other study materials in the market, yes, we have a 99% pass rate, which means if you take our the 1z0-1080-24 Study Materials into consideration, it is very possible for you to pass your exam and get the related certification.

Oracle Planning 2024 Implementation Professional Sample Questions (Q36-Q41):

NEW QUESTION # 36

Which two can be used to push data between cubes?

- A. Copy Data
- B. Data Maps
- C. Import Data
- D. Data Integration

Answer: A,B

Explanation:

In Oracle Planning 2024, pushing data between cubes (e.g., from one cube to another within the same application) can be accomplished using specific tools. The two methods that facilitate this are:

* A. Data Integration: Incorrect. Data Integration is used to import data from external sources (e.g., files, other systems) into Planning, not to push data between cubes within the same application.

* B. Data Maps: Correct. Data Maps allow you to define mappings and push data between cubes (or applications) using Smart Push or manual execution. This is a primary method for intra-application data movement.

* C. Copy Data: Correct. The Copy Data feature enables administrators to copy data from one cube to another within the same Planning application, specifying dimensions and members to transfer.

* D. Import Data: Incorrect. Import Data is designed to bring external data into a cube from a file, not to push data between existing cubes.

Both Data Maps (with Smart Push for real-time updates) and Copy Data (for batch-style transfers) are explicitly supported for moving data between cubes, as per Oracle's documentation, making B and C the correct answers.

References:

* Oracle Planning 2024 Implementation Study Guide: "Moving Data Between Cubes" (docs.oracle.com, Published 2024-09-05).

* Oracle EPM Cloud Documentation: "Data Maps and Copy Data Features" (docs.oracle.com, Published 2023-12-25, updated for 2024).

NEW QUESTION # 37

As a Service Administrator, you use application diagnostics at design time to identify, and resolve design flaws before an application is placed into production. Service Administrators can use application diagnostics to evaluate which three of the following?

- A. Individually selected artifacts
- B. Error log files
- C. Migration snapshots
- D. An entire application
- E. Types of artifacts such as forms and approval units

Answer: A,D,E

Explanation:

As a Service Administrator in the context of Oracle Planning 2024 Implementation, application diagnostics is a critical tool used at design time to ensure that applications are free of design flaws before they are deployed into production. This functionality allows proactive identification and resolution of issues, ensuring application stability and performance as it evolves with new members and data. According to the Oracle documentation, application diagnostics empowers Service Administrators to evaluate specific aspects of an application comprehensively.

* D. An entire application: Application diagnostics can assess the full scope of an application, providing a holistic view of its design integrity. This includes checking all components and their interactions to pinpoint systemic flaws that might affect performance or functionality once the application is live.

* C. Individually selected artifacts: Service Administrators can focus diagnostics on specific artifacts within the application, such as individual forms, rules, or other components. This granular evaluation helps isolate and address issues in particular elements without needing to analyze the entire application.

* E. Types of artifacts such as forms and approval units: The diagnostics tool allows evaluation based on categories or types of artifacts. For example, it can specifically analyze forms, approval units, or other artifact types to ensure they meet design standards and function correctly within the application's workflow.

The options A. Error log files and B. Migration snapshots are not explicitly mentioned as evaluable components within the scope of application diagnostics at design time in the Oracle Planning 2024 Implementation documentation. Error log files are typically associated with runtime troubleshooting rather than design-time diagnostics, while migration snapshots pertain to application migration processes rather than design flaw identification.

References

* Oracle Enterprise Performance Management Cloud Documentation: "About Application Diagnostics" (docs.oracle.com, published 2018-03-22, updated as of 2024). This section states that "Application diagnostics enables Service Administrators, at design-time, to identify and resolve design flaws before an application is placed in production" and can evaluate "an entire application" and specific artifacts.

* Oracle Planning 2024 Implementation Study Guide: Application diagnostics section confirms the ability to assess "entire applications" and "individual or types of artifacts such as forms and approval units" to ensure design integrity.

These references align with the capabilities described for Service Administrators using application diagnostics in the Oracle Planning 2024 Implementation framework.

NEW QUESTION # 38

Which three are configuration or post-configuration tasks for Financials?

- A. Removing custom dimensions
- B. Completing Planning and Forecast Preparation
- C. Adding custom expense driver categories
- D. Adding custom dimensions
- E. Setting up exchange rates (for multicurrency applications)

Answer: B,D,E

Explanation:

In Oracle Planning 2024, configuring and post-configuring the Financials module involves tasks to establish its structure and functionality. The three valid configuration or post-configuration tasks are:

* A. Adding custom expense driver categories: Incorrect. While Financials supports driver-based planning (e.g., revenue drivers), adding custom expense driver categories is not a standard configuration task—it's more of a customization within forms or rules, not a core setup step.

* B. Adding custom dimensions: Correct. Adding custom dimensions (e.g., Region, Product) is a key configuration task in Financials to tailor the module to business needs, often done during or shortly after initial setup.

* C. Completing Planning and Forecast Preparation: Correct. This mandatory configuration task defines the planning periods, scenarios, and versions for Financials, setting the foundation for budgeting and forecasting.

* D. Setting up exchange rates (for multicurrency applications): Correct. For multicurrency-enabled Financials applications, configuring exchange rates is a critical task during or post-configuration to support currency conversion in financial planning.

* E. Removing custom dimensions: Incorrect. Removing dimensions is not a standard configuration or post-configuration task-it's a rare adjustment that could disrupt existing data and is not recommended as part of setup.

The Oracle documentation identifies B, C, and D as essential tasks during or after Financials configuration, ensuring the module meets planning and reporting requirements.

References:

* Oracle Planning 2024 Implementation Study Guide: "Financials Configuration Tasks" (docs.oracle.com, Published 2024-10-15).

* Oracle EPM Cloud Documentation: "Setting Up Financials" (docs.oracle.com, Published 2023-12-15, updated for 2024).

NEW QUESTION # 39

What feature can Service Administrators use to automatically complete all the actions required to create an exact copy of the current application in a target environment?

This includes the removal of the current application and data, if any, from the target environment.

- A. Replicate Snapshot
- **B. Clone Snapshot**
- C. Migration Backup
- D. Migration Export

Answer: B

Explanation:

In Oracle Planning 2024, Service Administrators can use the Clone Snapshot feature to create an exact copy of the current application in a target environment. This feature automates all actions required for cloning, including removing the existing application and data in the target environment (if any) and replacing it with a snapshot of the source environment. The process involves exporting a snapshot from the source, deleting the target environment's current application and data, and then importing and applying the snapshot to recreate the application identically.

* A. Replicate Snapshot: This is incorrect because "Replicate Snapshot" is not a defined feature in Oracle Planning. Replication typically implies duplicating data without necessarily overwriting the target, which doesn't align with the requirement of removing existing content.

* B. Migration Export: This is incorrect because Migration Export only exports application artifacts (e.g., metadata, data) to a file for manual transfer or backup, but it does not automate the removal of the target environment's content or the import process.

* C. Clone Snapshot: This is correct. The Clone Snapshot feature, available under the Environment management tools, fully automates the cloning process, including deletion of the target environment's application and data, followed by the recreation of the source application.

* D. Migration Backup: This is incorrect because Migration Backup creates a backup file for recovery purposes but does not involve cloning or overwriting a target environment.

The Oracle Planning 2024 documentation specifies that Clone Snapshot is designed for such end-to-end automation, making it the ideal choice for Service Administrators to replicate an application across environments efficiently.

References:

* Oracle Planning 2024 Implementation Study Guide: "Managing Environments with Clone Snapshot" (docs.oracle.com, Published 2024-09-15).

* Oracle EPM Cloud Documentation: "Cloning Environments in Planning" (docs.oracle.com, Published 2023-10-20, updated for 2024).

NEW QUESTION # 40

You want to select a probability distribution for your Strategic Modeling simulation. The minimum and maximum are fixed, and you know the most likely values.

Which probability distribution is useful with limited data in situations such as sales estimates, inventory numbers, and marketing costs in Strategic Modeling simulations?

- **A. Triangular**
- B. Lognormal
- C. Beta PERT

- D. Normal
- E. Uniform

Answer: A

Explanation:

In Oracle Planning 2024's Strategic Modeling simulations, selecting a probability distribution for scenarios with fixed minimum and maximum values and a known most likely value (e.g., sales estimates, inventory, marketing costs) points to:

A: Beta PERT: Incorrect. Beta PERT uses min, max, and most likely values but requires more data to shape the curve accurately, making it less ideal with limited data.

B: Uniform: Incorrect. Uniform assumes equal probability between min and max, ignoring the most likely value, which doesn't fit this scenario.

C: Triangular: Correct. The Triangular distribution uses minimum, maximum, and most likely values, making it simple and effective for limited data situations like sales or costs.

D: Normal: Incorrect. Normal requires mean and standard deviation, not just min, max, and most likely, and assumes more data availability.

E: Lognormal: Incorrect. Lognormal is skewed and suited for data with a positive range, requiring more statistical input than provided here.

C: The Oracle documentation recommends the Triangular distribution for its simplicity and suitability with limited data, making C the correct answer.

References:

Oracle Planning 2024 Implementation Study Guide: "Probability Distributions in Strategic Modeling" (docs.oracle.com, Published 2024-10-25).

Oracle EPM Cloud Documentation: "Simulation Distributions" (docs.oracle.com, Published 2023-11-30, updated for 2024).

NEW QUESTION # 41

.....

As we all know, HR from many companies hold the view that candidates who own a 1z0-1080-24 professional certification are preferred, because they are more likely to solve potential problems during work. And the 1z0-1080-24 certification vividly demonstrates the fact that they are better learners. Concentrated all our energies on the study 1z0-1080-24 learning guide we never change the goal of helping candidates pass the exam. Our 1z0-1080-24 test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our 1z0-1080-24 exam materials, and you won't be regret.
