

# Useful and reliable E-S4CPE-2405 training dumps & high-quality SAP E-S4CPE-2405 training material

DOWNLOAD the newest ActualPDF E-S4CPE-2405 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1xlaH0\\_j4-mNL-y2LZ20tzhYWc-jx90JG](https://drive.google.com/open?id=1xlaH0_j4-mNL-y2LZ20tzhYWc-jx90JG)

Our E-S4CPE-2405 practice materials are your best choice for their efficiency in different aspects: first of all, do not need to wait, you can get them immediately if you pay for it and download as your wish. Clear-arranged content is our second advantage. Some exam candidates are prone to get anxious about the E-S4CPE-2405 Exam Questions, but with clear and points of necessary questions within our E-S4CPE-2405 study guide, you can master them effectively in limited time.

## SAP E-S4CPE-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Extensibility, Integration, and Clean Core: This section of the exam measures skills of integration specialists and involves understanding the principles of extending SAP functionality without compromising the clean core approach. It includes integrating SAP with other systems, maintaining system integrity, and ensuring sustainable customizations.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of application consultants and covers configuring SAP solutions to meet business needs, along with setting up and managing the SAP Fiori Launchpad. It also touches on customizing the user interface for an optimal and user-friendly experience.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Data Migration and Business Process Testing: This section of the exam measures skills of SAP implementation consultants and covers the core principles of migrating data into SAP systems while ensuring that business processes run as intended. It involves understanding the methods for transferring data, verifying its accuracy, and executing process testing to confirm that the system meets operational requirements.</li></ul>

## Valid SAP E-S4CPE-2405 Exam Dumps | E-S4CPE-2405 Detailed Study Plan

Our company employs the first-rate expert team which is superior to others both at home and abroad. Our experts team includes the experts who develop and research the E-S4CPE-2405 cram materials for many years and enjoy the great fame among the industry, the senior lecturers who boost plenty of experiences in the information about the exam and published authors who have done a deep research of the E-S4CPE-2405 latest exam file and whose articles are highly authorized. They provide strong backing to the compiling of the E-S4CPE-2405 Exam Questions and reliable exam materials resources. They compile each answer and question carefully. Each question presents the key information to the learners and each answer provides the detailed explanation and verification by the senior experts. The success of our E-S4CPE-2405 latest exam file cannot be separated from their painstaking efforts.

### SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q42-Q47):

#### NEW QUESTION # 42

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. SAP Fiori application extensions
- B. Known integration requirements
- C. Target customer go-live date
- D. Business role requirements

**Answer: B,D**

Explanation:

The Digital Discovery Assessment (DDA) is a pivotal tool in the SAP S/4HANA Cloud implementation process, designed to align a customer's business requirements with the appropriate SAP solutions. It captures various critical aspects to ensure a successful deployment.

Option A: Business role requirements

This option is correct. The DDA involves identifying the specific business roles within an organization to tailor the SAP solution accordingly. Understanding these roles ensures that the system supports the necessary functions and responsibilities of each user group.

Option B: Known integration requirements

This option is correct. The assessment captures existing integration points with other systems, which is crucial for seamless data flow and process efficiency. Documenting these requirements helps in planning and executing necessary integrations during implementation.

Option C: Target customer go-live date

This option is incorrect. While the go-live date is essential for project planning, it is typically determined during the project management phase rather than being a primary focus of the DDA.

Option D: SAP Fiori application extensions

This option is incorrect. The DDA primarily focuses on assessing current business processes and integration needs. Specifics like SAP Fiori application extensions are usually addressed later in the implementation process, during the design and customization phases.

In summary, the Digital Discovery Assessment captures business role requirements and known integration requirements to ensure that the SAP S/4HANA Cloud Private Edition solution aligns with the organization's operational needs.

#### NEW QUESTION # 43

Which type of testing should be done after a release upgrade has been implemented?

- A. Regression tests
- B. String tests
- C. User acceptance tests
- D. Integration tests

**Answer: A**

#### NEW QUESTION # 44

Which activity in situation handling is exclusively available for the extended framework?

- A. Navigate from notification to the app where the situation occurred to get more info and resolve
- B. Collect situation data to prepare the automated response
- C. Adapt pre-delivered situation handling templates to business requirements
- D. SAP Fiori application extensions
- E. Develop custom situation handling templates

**Answer: E**

Explanation:

Situation handling in SAP S/4HANA Cloud Private Edition provides a framework to proactively inform users about specific business situations requiring attention. Within this framework, certain activities are exclusive to the extended framework:

Option A: Adapt pre-delivered situation handling templates to business requirements This option is incorrect. Adapting pre-delivered templates is available in both the standard and extended frameworks.

Option B: Navigate from notification to the app where the situation occurred to get more info and resolve This option is incorrect. This navigation capability is a standard feature in situation handling.

Option C: Develop custom situation handling templates

This option is correct. The extended framework allows for the development of custom situation templates tailored to specific business needs, a feature not available in the standard framework.

Option D: Collect situation data to prepare the automated response

This option is incorrect. Data collection for automated responses is part of the standard framework.

In summary, the ability to develop custom situation handling templates is an activity exclusively available in the extended framework of situation handling in SAP S/4HANA Cloud Private Edition.

Situation handling in SAP S/4HANA Cloud Private Edition notifies users of issues or opportunities (e.g., delays, stock shortages).

The extended framework enhances this with advanced capabilities. Let's analyze:

\* A. Adapt pre-delivered situation handling templates to business requirements: This is incorrect.

Adapting pre-delivered templates is available in both the standard and extended frameworks, not exclusive to the extended one.

\* B. Navigate from notification to the app where the situation occurred to get more info and resolve

This is incorrect. Navigation from notifications to apps is a standard feature across both frameworks, not exclusive to the extended framework.

\* C. Develop custom situation handling templates: This is correct. The extended framework allows developers to create fully custom situation handling templates (e.g., using ABAP or BTP tools), offering greater flexibility beyond adapting pre-delivered templates. This is exclusive to the extended framework in Private Edition.

\* D. Collect situation data to prepare the automated response: This is incorrect and incomplete (likely a typo for "report"). Collecting situation data is a standard feature, not exclusive to the extended framework.

\* E. SAP Fiori application extensions: This is incorrect. While Fiori extensions can enhance situation handling, this option is unrelated to the situation handling framework's exclusivity and is a general extensibility feature.

In summary, C (Develop custom situation handling templates) is exclusively available in the extended framework.

#### NEW QUESTION # 45

Through which tools can you launch the Cloud Integration Automation service? Note: There are 2 correct answers to this question.

- A. SAP Cloud ALM
- B. SAP Solution Manager
- C. SAP for Me
- D. SAP Business Accelerator Hub

**Answer: A,C**

Explanation:

The Cloud Integration Automation service facilitates the integration of SAP cloud solutions. It can be launched through the following tools:

Option A: SAP for Me

This option is correct. SAP for Me is a customer portal that provides access to various SAP services, including the Cloud Integration Automation service.

Option B: SAP Solution Manager

This option is incorrect. SAP Solution Manager is primarily used for application lifecycle management and does not directly launch the Cloud Integration Automation service.

Option C: SAP Business Accelerator Hub

This option is incorrect. SAP Business Accelerator Hub is a repository for APIs and does not provide access to the Cloud Integration Automation service.

Option D: SAP Cloud ALM

This option is correct. SAP Cloud ALM is an application lifecycle management tool for cloud solutions and provides access to the Cloud Integration Automation service.

The Cloud Integration Automation Service (CIAS) is a tool within the RISE with SAP framework that automates the setup and configuration of integrations between SAP S/4HANA Cloud Private Edition and other SAP solutions (e.g., SAP SuccessFactors, SAP Ariba). It simplifies integration tasks by providing guided workflows. Let's evaluate the options:

\* A. SAP for Me: This is correct. SAP for Me is a customer portal that provides access to various SAP services, including tools like the Cloud Integration Automation Service. It serves as a central entry point for managing licenses, systems, and integration workflows, especially under RISE with SAP.

\* B. SAP Solution Manager: This is incorrect. SAP Solution Manager is an on-premise tool for managing SAP implementations, primarily for traditional systems like ECC. While it supports integration monitoring, it is not a launch point for CIAS, which is cloud-focused and tied to newer SAP platforms.

\* C. SAP Business Accelerator Hub: This is incorrect. The SAP Business Accelerator Hub (formerly SAP API Business Hub) provides access to APIs, integration content, and accelerators, but it does not directly launch CIAS. It's a resource for discovering integration options, not executing them.

\* D. SAP Cloud ALM: This is also correct. SAP Cloud ALM (Application Lifecycle Management) is a cloud-based tool for managing the lifecycle of SAP solutions, including SAP S/4HANA Cloud Private Edition. It integrates with CIAS to launch and execute integration workflows, particularly during implementation and operations phases.

In summary, SAP for Me and SAP Cloud ALM are the tools through which you can launch the Cloud Integration Automation Service. References:

## NEW QUESTION # 46

Where is the initial list of known integrations documented?

- A. In the SAP Integration Solution Advisory Methodology
- B. In the Business Driven Configuration Questionnaire
- C. In the Digital Discovery Assessment
- D. In SAP Cloud ALM

Answer: C

## NEW QUESTION # 47

.....

Our exam prep material is famous among SAP exam candidates which help to polish the knowledge required to pass the SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition exam. The certification is organized by SAP internationally. Our SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition (E-S4CPE-2405) exam questions are the most cost-effective as we understand that you need low-cost material but are authentic and updated. ActualPDF provides its SAP E-S4CPE-2405 Exam Questions in three forms, one is PDF eBook, the second is practice exam software for Windows-based systems, and the third is an online practice test.
