First and foremost, in order to cater to the different needs of people from different countries in the international market, we have prepared three kinds of versions of our ANVE learning questions in this website. Second, we can assure you that you will get the latest version of our ANVE training materials for free from our company in the whole year after payment on ANVE practice materials. Last but not least, we will provide the most considerate after sale service for our customers in twenty four hours a day seven days a week on our ANVE exam questions.

The Axis Network Video Exam certification program covers a wide range of topics, including the basics of network video surveillance, network infrastructure, video management systems, and video analytics. Axis Network Video Exam certification program is designed to provide professionals with a comprehensive understanding of network video surveillance systems and how they can be used to enhance security and safety in various environments. The Axis ANVE Exam is an excellent opportunity for professionals to demonstrate their skills and knowledge in the field of network video surveillance and to enhance their career prospects.

Axis ANVE (Axis Network Video) Certification Exam is one of the most respected and sought-after certifications in the field of network video. Axis Network Video Exam certification is designed to test an individual's knowledge and skills in the field of network video surveillance, and validates their expertise in IP video, network connectivity, video analysis, and integration to other systems. The Axis ANVE certification is recognized globally and serves as an industry standard for professionals working in the field of network video surveillance.

As most of the people tend to use express delivery to save time, our ANVE preparation exam will be sent out within 5-10 minutes after purchasing. As long as you pay at our platform, we will deliver the relevant exam materials to your mailbox within the given time. Our company attaches great importance to overall services, if there is any problem about the delivery of ANVE Exam Materials: Axis Network Video Exam, please let us know, a message or an email will be available.

Axis Network Video Exam Sample Questions (Q76-Q81):

NEW QUESTION # 76

Adding network surveillance cameras to an existing Ethernet network

- A. Will benefit from establishing VPN connections to the cameras, reducing the risk of malicious users eavesdropping on the video.
- B. Is not recommended, since bandwidth demands from the surveillance video would likely congest the network.
- C. Will benefit from using VLANs, to keep the surveillance video separate from other network traffic, reducing the risk for network congestion.
- D. Will cause unacceptable video latency, due to the amount of UDP traffic taking precedence on the network.

Answer: C

Explanation:

Adding network surveillance cameras to an existing Ethernet network will benefit from using VLANs (Virtual Local Area Networks) to keep the surveillance video separate from other network traffic. This separation reduces the risk of network congestion by prioritizing surveillance video traffic and ensuring sufficient bandwidth is available for video data. VLANs enhance network performance and security by segmenting traffic and minimizing interference from other network activities.

NEW QUESTION # 77

Gatekeeper is a function that

- A. Uses video motion detection for detecting if a gate is open.
- B. Enables two way audio for communication at a gate.
- C. Uses video motion to zoom in on an object.
- D. Makes it possible for a PTZ camera to do a guard tour.

Answer: C

NEW QUESTION # 78

If using H.264 compression, in theory, what could a video containing no I-frames look like?

- A. The first P-frame is visible during the whole video
- B. All moving objects will be visible
- C. A black image is visible during the whole video
- D. All non-moving objects will be visible

Answer: C

Explanation:

H.264 compression uses I-frames (intra-coded frames) as reference points, with P-frames (predictive frames) and B-frames (bi-directional frames) encoding only the changes from the previous frames. If a video contained no I-frames, there would be no reference frame for decoding, resulting in an inability to display any image.

This would theoretically result in a black image being visible during the whole video. Therefore, the correct answer is B. For more detailed information, refer to Axis Communications' technical notes on video compression.

NEW QUESTION # 79

A Day & Night camera automatically removes the IR-cut filter for low light operations. In that mode, the camera becomes sensitive to IR light. Which wavelength is the camera most sensitive to?

- A. 1350 nm
- B. 1140 nm
- C. 950 nm
- D. 850 nm

Answer: D

NEW QUESTION # 80

Which technology can add audio and I/O functionality to a camera?

- A. Zipstream
- B. i264
- C. IEEE 802.1X
- D. Portcast

Answer: D

NEW QUESTION # 81

.....

In this society, only by continuous learning and progress can we get what we really want. It is crucial to keep yourself survive in the competitive tide. Many people want to get a ANVE certification, but they worry about their ability. So please do not hesitate and join our study. Our ANVE exam question will help you to get rid of your worries and help you achieve your wishes. So you will have more opportunities than others and get more confidence. Our ANVE Quiz guide is based on the actual situation of the customer. Customers can learn according to their actual situation and it is flexible. Next I will introduce the advantages of our ANVE test prep so that you can enjoy our products.
