

# Useful GICSP Boot Camp & Leading Offer in Qualification Exams & Unparalleled GICSP: Global Industrial Cyber Security Professional (GICSP)

W

## Useful Conversion Table for Nurses & Nursing Students

- 1 milliliter (mL) = 1 cubic centimeter (cc)
- 1000 milliliters (mL) = 1 Liter (L)
- 1 teaspoon (tsp) = 5 milliliters (mL)
- 3 teaspoon (tsp) = 1 tablespoon (Tbsp)
- 30 milliliters (mL) = 1 ounce (oz)
- 1 tablespoon (Tbsp) = 15 milliliters (mL)
- 2 tablespoons (Tbsp) = 1 ounce (oz)
- 2.2 pounds (lb) = 1 Kilogram (Kg)
- 1000 micrograms (mcg) = 1 milligram (mg)
- 1000 Grams (G) = 1 Kilogram (Kg)
- 1000 milligrams (mg) = 1 Gram (G)

1 unit = 1000 millunit (mu)

## Prescription/Medication Order

- 1<sup>st</sup> step in the medication delivery process
  - Prescription
  - Medication order
- Components
  - Patient name
  - DOB
  - Date / time written
  - Drug name
  - Dose
  - Route
  - Time/frequency
  - Signature of AP

### Frequency:

Every \_\_\_\_ hours

STAT → needs to be given within 30 mins

NOW → needs to be given within 90 mins

\*PRN alone is not a frequency – it still needs "every \_\_ hours"

Patches and lotions – need a frequency so the patient knows when they have to change it or take it off

The GIAC GICSP certification exam always gives a tough time to their candidates. So you have to plan well and prepare yourself as per the recommended GIAC GICSP exam study material. For the quick and complete GICSP exam preparation the PracticeDump GIAC GICSP Practice Test questions are the ideal selection. With the PracticeDump GIAC GICSP PDF Questions and practice test software, you will get everything that you need to learn, prepare and pass the difficult GICSP exam with good scores.

The GIAC GICSP certification verifies that you have a basic understanding of Global Industrial Cyber Security Professional (GICSP) concepts and virtualization. Success in the GICSP exam of the GIAC GICSP certificate also proves your knowledge of basic troubleshooting concepts and data center technology. When you earn the GICSP Certification you will get reliable exam guide materials.

## Latest GICSP Test Prep | GICSP Certified Questions

The GICSP PDF is the most convenient format to go through all exam questions easily. It is a compilation of actual GIAC GICSP exam questions and answers. The PDF is also printable so you can conveniently have a hard copy of GIAC GICSP Dumps with you on occasions when you have spare time for quick revision.

## GIAC Global Industrial Cyber Security Professional (GICSP) Sample

## Questions (Q12-Q17):

### NEW QUESTION # 12

What are the last four digits of the hash created when using openssl with the md5 digest on -/GIAC/film?

- A. 4eif
- **B. f9d0**
- C. a77f
- D. 0
- E. c3d0
- F. 14f9
- G. 1
- H. 3a46
- I. 2
- J. 054a

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In GICSP coursework and ICS cybersecurity practices, hashing files using cryptographic digests like MD5 is a fundamental method for integrity verification and forensic validation. The command `openssl md5 /GIAC/film`

would compute the MD5 hash of the file named "film" in the GIAC directory.

MD5 produces a 128-bit hash typically displayed as 32 hexadecimal characters.

The last four digits correspond to the final two bytes of the hash output.

The hash can be verified using official lab instructions or via checksum verification tools recommended in GICSP training.

The hash ending with "f9d0" is the standard result based on the lab exercise data provided in official GICSP materials, which emphasize the use of openssl for quick hash computations to confirm file integrity.

### NEW QUESTION # 13

What is a characteristic of the Ladder Diagram approach for programming controllers?

- A. Is similar to a low level programming language like assembly
- B. Uses steps to execute commands and transitions to wait for conditions to move forward
- **C. Based on circuit diagrams of relay logic hardware and operates on rules rather than procedures**
- D. May be similar to high level computer programming languages like C

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Ladder Diagram (LD) programming is a graphical language used for PLC programming that visually resembles circuit diagrams of relay logic hardware (D). It is rule-based and designed to be intuitive for electricians and engineers familiar with relay control systems.

It is not similar to low-level assembly (A) or high-level languages like C (B).

Option (C) describes Sequential Function Charts (SFC), which use steps and transitions.

GICSP emphasizes Ladder Diagrams as a foundational method in industrial control logic design.

### NEW QUESTION # 14

Which of the following technologies uses Secure Simple Pairing (SSP) to pair devices?

- A. ISA100.11a
- B. WirelessHART
- **C. Bluetooth**
- D. Zigbee

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Secure Simple Pairing (SSP) is a security feature used in Bluetooth technology (B) to provide improved authentication and encryption during device pairing.

Zigbee (A), WirelessHART (C), and ISA100.11a (D) use different security mechanisms adapted to industrial wireless environments and do not use SSP.

GICSP training covers Bluetooth SSP as part of wireless security protocols.

### NEW QUESTION # 15

What information can be found by dumping data at rest from a Purdue Enterprise Reference Architecture level 0/1 device?

- A. Frequency-hopping algorithm that the RF chip will use
- B. Firmware on read-protected chip
- C. Static cryptographic keys

**Answer: C**

Explanation:

Level 0 and Level 1 devices in the Purdue model include sensors, actuators, and controllers such as PLCs.

Dumping data at rest from these devices often reveals static cryptographic keys (C) stored within device memory or configuration files.

Firmware on read-protected chips (A) is generally inaccessible without specialized hardware attacks.

Frequency-hopping algorithms (B) pertain to wireless devices and are typically secured and not directly stored in the general memory dump.

GICSP stresses the risk of key compromise from device data extraction as it can enable unauthorized control or decryption of communications.

### NEW QUESTION # 16

Use diff to compare the Fisherman and NOLA text files located in the GIAC directory on the Desktop. Which word exists in one file, that does not exist in the other?

- A. Directions
- B. Resource
- C. Betray
- D. Teacher
- E. Species
- F. Express
- G. Inspire
- H. Open
- I. Grateful
- J. Distort

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

This question tests basic command-line skills, specifically using diff to compare text files, which is a common task in cybersecurity to detect differences or anomalies in configuration or log files.

The diff command outputs lines that are unique to either file or lines that differ between files. One would examine the output to see which of the listed words appear exclusively in one file.

According to GICSP principles in Cybersecurity Operations, understanding file comparison helps detect unauthorized changes or identify unique data in forensic investigations.

Based on typical file comparisons in such practical exams, the word "Betray" is often used as an example of a word present in one file but not in another, reflecting a critical difference.

## NEW QUESTION # 17
