Salesforce Certified Community Cloud Consultant Sample Questions (Q54-Q59):

NEW QUESTION # 54

O: 150

Universal Containers builds a self-service Community. They need to delegate moderation activities (e.g. removing flags) as well as editing and deleting content to certain members.

Which two things should the Salesforce Admin do to meet this requirement? Choose 2 answers.

- A. Assign the "Moderate Communities Feeds" permission to these members.
- B. Activate "Allow Members to Flag" for certain members.
- C. Assign the "Moderate Communities Files" permission to these members.
- D. Activate a moderation rule for certain members.

Answer: A,C

NEW QUESTION # 55

Universal Containers builds their customer Community on Customer Services Templates. They create several recommendations that are visible on the home page, including one for their annual conference event. After the event, the Salesforce Admin needs to remove the event recommendation. Where should the Salesforce Admin delete the recommendation?

Select one or more of the following:

- A. From the Community Builder
- B. From the Community Workspaces
- C. From the All Communities setup page
- D. From the Community site

Answer: B

NEW QUESTION # 56

Universal Containers has a Community for partners and another Community for their customers. They want to give their partners access to their Community for customers as well.

How should the Salesforce Admin do this?

- A. Add the Customer community to the Partner Community user profile.
- B. Create Partner users as members in the Customer Community and send login details to the users.
- C. Select the Enable Customer Community user option in the Partner contact in Salesforce.
- D. Include the partner profile as a member of the Community for customers.

Answer: D

NEW QUESTION # 57

Universal Containers houses their order information in their legacy backend systems. Customers need to see their orders from the back office in their customer-facing Community. - The existing Salesforce org (which hosts the community) has integration with the backend legacy system using Salesforce Connect - Customer users only need to see their orders in the Community - Orders are currently public read-only - Customer users need to access fields that are already part of the existing integration What two things should do Salesforce Admin do to meet these requirements? Choose 2 answers

- A. Update the customer user profile and given the "view all" permission on the integration object
- B. Leveraging existing integration with the legacy system
- C. Creating a new integration with the legacy system for customer users
- D. Set the external users' organisation wide defaults to private for external order objects

Answer: A,B

NEW QUESTION # 58

The product marketing team is revising its product data sheets and FAQ documentation to support major upgrades across the product line. Preliminary analysis shows the new articles have fewer views in the Partner and Customer Communities than expected. What are three ways to increase the visibility of these Knowledge articles? Choose 3 answers Select one or more of the following:

- A. Make sure that the right fields in the Knowledge object are indexed to improve results in the Universal Search component
- B. Use the Recommendations component to promote specific articles to defined groups of users (Channels)
- C. Place hotlink URLs to these topics in the header component
- D. Create a new navigational topic for "New Products" and make sure the new articles are assigned to that user
- E. Use the Featured Topics component to promote the topics related to these new articles

Answer: B,D,E
