Valid 1z0-1093-25 Regualer Update - 100% Pass 1z0-1093-25 Exam
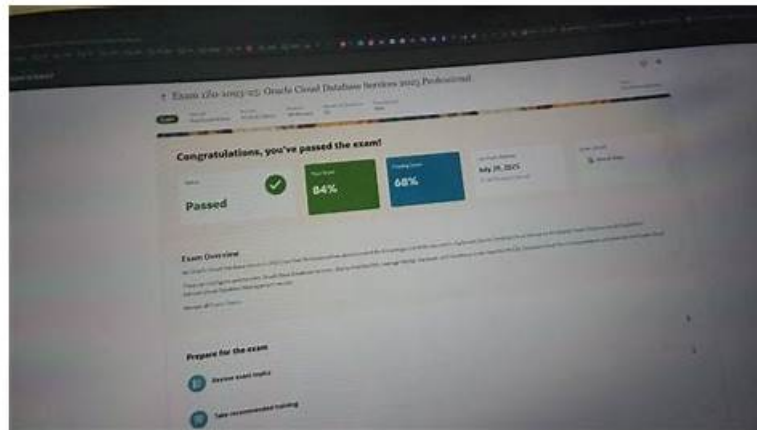

If you are still worried about your exam, our exam dumps may be your good choice. Our Oracle 1z0-1093-25 training dumps cover many real test materials so that if you master our dumps questions and answers you can clear exams successfully. Don't worry over trifles. If you purchase our Oracle 1z0-1093-25 training dumps you can spend your time on more significative work.

Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.
Topic 2	• Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.
Topic 3	• Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.
Topic 4	• MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.
Topic 5	• NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.

1z0-1093-25 Exam Lab Questions - 1z0-1093-25 Valid Test Materials

Our company attaches great importance on improving the 1z0-1093-25 study prep. In addition, we clearly know that constant improvement is of great significance to the survival of a company. The fierce competition in the market among the same industry has long existed. As for our 1z0-1093-25 exam braindump, our company masters the core technology, owns the independent intellectual property rights and strong market competitiveness. What is more, we have never satisfied our current accomplishments. The highest record is up to five seconds. There has no delay time of the grading process. Slow system response doesn't exist. In addition, the calculation system of the 1z0-1093-25 Test Question is very powerful and stable. We promise that the results of your exercises are accurate.

Oracle Cloud Database Services 2025 Professional Sample Questions (Q53-Q58):

NEW QUESTION # 53
Which two tools can you use to create a HeatWave MySQL Database Service System?

- A. OCI Console
- B. MySQL Shell on OCI Compute
- C. OCI Bastion Server
- D. OCI SQL Developer
- E. OCI Command Line Interface

Answer: A,E

Explanation:
OCI Console:
The Oracle Cloud Infrastructure Console is the primary graphical interface for creating and managing MySQL HeatWave Database Service Systems. It provides a user-friendly environment for configuring database instances and integrating HeatWave.
OCI CLI:
The OCI Command Line Interface allows for automation and scripting of database service creation. It is useful when managing multiple instances or performing bulk operations.
Why the other options are incorrect:
* C:OCI Bastion Server is used for secure SSH access, not for database creation.
* D:MySQL Shell is a client tool for interacting with databases, not for provisioning them.
* E:OCI SQL Developer is a database management tool, not a service provisioning tool.

NEW QUESTION # 54
Which of the following components is responsible for automatically offloading suitable queries from MySQL to the HeatWave accelerator?

- A. MySQL Shell
- B. Oracle Cloud Infrastructure (OCI) Load Balancer
- C. MySQL Query Optimizer
- D. MySQL Router
- E. HeatWave AutoPilot

Answer: C

Explanation:
A: MySQL Query Optimizer:
* TheMySQL Query Optimizerdetermines whether a query can benefit from HeatWave's in-memory, columnar processing.
* If a query is deemed suitable, it is automatically offloaded to the HeatWave cluster.
* This process significantly improves the execution speed of complex analytical queries.
Why the other options are incorrect:

* B. HeatWave AutoPilot:Manages workload optimization but does not directly offload queries.
* C. MySQL Router:Manages connection routing, not query offloading.
* D. MySQL Shell:Primarily used for administrative tasks, not query optimization.
* E. OCI Load Balancer:Manages network traffic distribution, unrelated to database query processing.

NEW QUESTION # 55
You need to implement a backup and recovery strategy for your MySQL HeatWave Database System. What is the recommended method for backing up and restoring your HeatWave cluster?

- A. Using the MySQL Enterprise Backup tool directly on the HeatWave nodes.
- B. Using the OCI Object Storage service for storing manual database dumps.
- C. Relying solely on MySQL replication to another MySQL instance.
- D. Utilizing OCI Database backups, which include both the MySQL Database System and the HeatWave cluster.
- E. Manually copying the data files from the HeatWave cluster's storage.

Answer: D

Explanation:
C: Utilizing OCI Database backups:
* Integrated withOracle Cloud Infrastructure (OCI), providing consistent and complete backups.
* Supports both theMySQL Database Systemand the HeatWave cluster, ensuring data integrity.
* Automates backup scheduling and retention policies.
* Facilitates easy restoration in case of data loss or corruption.
Why the other options are incorrect:
* A. Manual copying:Prone to errors and lacks consistency.
* B. Manual dumps to Object Storage:Labor-intensive and not automated.
* D. MySQL replication:Suitable for high availability, but not a substitute for regular backups.
* E. MySQL Enterprise Backup on nodes:Complex and not designed for HeatWave's distributed environment.

NEW QUESTION # 56
When provisioning a new BaseDB VM, which statement BEST describes the relationship between the available Database Versions and the selected Operating System image?

- A. The Database Version determines the Operating System image that will be used, irrespective of the initially selected image.
- B. Only Database Versions compatible with the underlying Operating System image are presented as options during provisioning.
- C. The chosen Operating System image is automatically upgraded to the latest version compatible with the selected Database Version after provisioning.
- D. All Database Versions are compatible with all Operating System images available in the OCI Marketplace.

Answer: B

Explanation:
B: Only compatible Database Versions are presented:
* The provisioning process filters out incompatible combinations, presenting only database versions that match the chosen OS image.
* This ensures that the database software can run properly on the selected OS.
* This compatibility check prevents deployment failures and ensures system stability.
Why the other options are incorrect:
* A. All Database Versions are compatible:Incorrect; some versions are OS-specific.
* C. Automatic OS upgrade:OCI does not automatically upgrade the OS for compatibility.
* D. Database version determines OS image:The OS image is selected independently, with the system ensuring compatibility.

NEW QUESTION # 57
What is the primary purpose of installing and configuring the Oracle Management Agent when enabling Database Management Service for a cloud database on a Compute instance?

- A. To handle database backups and recovery operations.

- B. To provide a secure communication channel between the Database Management Service and the database.
- C. To manage the underlying operating system of the Compute instance.
- D. To automate database patching and upgrades.

Answer: B

Explanation:
A: Secure Communication Channel:
* The Oracle Management Agent acts as a bridge between theDatabase Management Serviceand the database.
* Enables secure data collection, monitoring, and performance analysis.
* Uses encryption to protect data during transmission.
* Facilitates monitoring, alerting, and management throughOCI services.
Why the other options are incorrect:
* B. Backup and recovery operations:These are typically handled by backup tools, not the management agent.
* C. OS management:The agent does not manage the operating system itself.
* D. Patching and upgrades:While it can assist, it is not specifically designed for patch management.

NEW QUESTION # 58
......

Perhaps you have also seen the related training tools about Oracle certification 1z0-1093-25 exam on other websites, but our SurePassExams has a pivotal position in the field of IT certification exam. SurePassExams research materials can 100% guarantee you to pass the exam. With SurePassExams your career will change and you can promote yourself successfully in the IT area. When you select SurePassExams you'll really know that you are ready to pass Oracle Certification 1z0-1093-25 Exam. We not only can help you pass the exam successfully, but also will provide you with a year of free service.
