

Valid 1Z0-1163-1 Exam Fee & 1Z0-1163-1 Latest Dumps Book

2025 Latest ITCertMagic 1Z0-1163-1 PDF Dumps and 1Z0-1163-1 Exam Engine Free Share: <https://drive.google.com/open?id=1LDKAn8kTtN5s8rOPIQftdZINB73XBS-D>

We aim to leave no misgivings to our customers so that they are able to devote themselves fully to their studies on 1Z0-1163-1 guide materials and they will find no distraction from us. I suggest that you strike while the iron is hot since time waits for no one. With our 1Z0-1163-1 Exam Questions, you will be bound to pass the exam with the least time and effort for its high quality. With our 1Z0-1163-1 study guide for 20 to 30 hours, you will be ready to take part in the exam and pass it with ease.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.
Topic 2	• OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.
Topic 3	• OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.

Topic 4	• OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.
Topic 5	• OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.
Topic 6	• Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.
Topic 7	• OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.
Topic 8	• OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.

Useful Valid 1Z0-1163-1 Exam Fee to Obtain Oracle Certification

There is nothing more exciting than an effective and useful 1Z0-1163-1 question bank if you want to get the 1Z0-1163-1 certification in the least time by the first attempt. The sooner you use our 1Z0-1163-1 training materials, the more chance you will pass 1Z0-1163-1 the exam, and the earlier you get your 1Z0-1163-1 certificate. You definitely have to have a try on our 1Z0-1163-1 exam questions and you will be satisfied without doubt. Besides that, We are amply praised by our customers all over the world not only for our valid and accurate 1Z0-1163-1 study materials, but also for our excellent service.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q21-Q26):

NEW QUESTION # 21

Which key metric measures the effectiveness of the Demand Forecast to Supply Plan OMBP?

- A. Lead Time Variability.
- B. Supply Chain Flexibility.
- C. Supplier Service Quality.
- **D. Demand Fulfillment.**

Answer: D

Explanation:

The Demand Forecast to Supply Plan OMBP in Oracle Fusion Cloud SCM bridges demand forecasting with supply planning, and its effectiveness is best measured by Demand Fulfillment—the percentage of demand met on time and in full. This metric evaluates how well the supply plan, derived from forecasts, satisfies actual customer orders. For example, if a forecast predicts 500 units and the supply plan delivers 480 units on time, the fulfillment rate is 96%. Option A (Lead Time Variability) assesses supplier performance, not the forecast-to-plan process. Option B (Supplier Service Quality) focuses on supplier reliability, a separate

concern. Option C (Supply Chain Flexibility) measures adaptability, not direct fulfillment success. Demand Fulfillment ties directly to the OMBP's goal of aligning supply with demand, ensuring customer satisfaction and operational efficiency while minimizing excess inventory or stockouts.

NEW QUESTION # 22

What is the function of Manufacturing Execution in Oracle Fusion Cloud SCM?

- A. It tracks and manages real-time production processes on the shop floor.
- B. It focuses only on financial reporting for manufacturing expenses.
- C. It eliminates the need for supplier coordination in production planning.

Answer: A

Explanation:

Manufacturing Execution in Oracle Fusion Cloud SCM is a critical function that tracks and manages real-time production processes on the shop floor, ensuring visibility and control over activities like work order execution, material consumption, and labor tracking. It captures data as production occurs-e.g., when a worker completes an assembly step or uses raw materials-allowing managers to monitor progress, identify bottlenecks, and ensure quality. Option A is incorrect because supplier coordination remains essential for raw material supply; Manufacturing Execution does not eliminate this need but integrates with it. Option C is wrong as financial reporting is handled by Cost Accounting, not Manufacturing Execution, though the latter provides data that feeds into cost calculations. For example, if a factory produces 100 units, Manufacturing Execution records the exact time, resources, and issues (e.g., machine downtime), enabling proactive adjustments. This real-time oversight improves efficiency, reduces waste, and ensures production aligns with planned schedules.

NEW QUESTION # 23

What is the primary purpose of the Supplier Collaboration feature in Oracle Fusion Cloud Procurement?

- A. It allows suppliers to view and respond to purchase orders in real time.
- B. It automates the creation of supplier contracts.
- C. It eliminates the need for supplier performance reviews.
- D. It restricts suppliers from accessing invoice details.

Answer: A

Explanation:

The Supplier Collaboration feature (D) in Oracle Fusion Cloud Procurement, often via the Supplier Portal, allows suppliers to view and respond to purchase orders (POs) in real time, fostering efficient communication. Suppliers can access PO details (e.g., 500 units due next week), confirm acceptance, or propose adjustments instantly, reducing delays. Option A is incorrect-performance reviews remain necessary, supported by collaboration data. Option B is false-contract creation is a separate process, not automated here. Option C is wrong-suppliers can view invoices and POs, not be restricted. For example, a supplier might use this feature to confirm a PO and flag a shipment delay, enabling proactive buyer adjustments. This real-time interaction strengthens partnerships, improves visibility, and accelerates procurement cycles.

NEW QUESTION # 24

Which two capabilities within the Predict Demand process in the Demand to Management OMBP make it a powerful tool for demand planning and management?

- A. Collaborative Forecasting Platform.
- B. Demand Sensing.
- C. Statistical Forecasting.
- D. Machine Learning-based Forecasting.

Answer: A,D

Explanation:

The Predict Demand process within the Demand to Management OMBP in Oracle Fusion Cloud SCM leverages advanced capabilities to enhance demand planning. Collaborative Forecasting Platform (A) enables stakeholders-such as sales teams, suppliers, and distributors-to collaborate in real time, inputting qualitative insights (e.g., market trends or promotions) that refine

forecasts beyond pure data analysis. For example, a retailer might adjust forecasts based on an upcoming sale confirmed via the platform, improving accuracy. Machine Learning-based Forecasting (B) uses algorithms to analyze historical data, detect patterns (e.g., seasonality or anomalies), and adapt predictions dynamically, making it more precise than traditional methods. For instance, it might identify a spike in demand for umbrellas during unexpected rainy seasons. Option C (Statistical Forecasting) is a traditional method relying on statistical models but lacks the adaptive intelligence of machine learning, though it's still used as a foundation. Option D (Demand Sensing) focuses on short-term demand signals (e.g., point-of-sale data) rather than long-term planning, making it complementary but not a core strength of Predict Demand. Together, A and B empower businesses with both human collaboration and cutting-edge AI, ensuring robust demand planning that balances quantitative and qualitative inputs.

NEW QUESTION # 25

What is the function of Cost Rollup in Oracle Fusion Cloud SCM?

- A. It calculates the total cost of a product by aggregating material, labor, and overhead expenses.
- B. It ensures material costs remain unchanged over time.
- C. It tracks only direct labor expenses, excluding materials.

Answer: A

Explanation:

Cost Rollup in Oracle Fusion Cloud SCM aggregates all cost components-material, labor, and overhead-to calculate the total cost of a product. This process rolls up costs from raw materials through production stages, providing a comprehensive view for pricing and profitability analysis. For example, producing a widget might involve \$5 in materials, \$3 in labor, and \$2 in overhead; Cost Rollup totals this to \$10 per unit. Option B is incorrect because it excludes materials and overhead, which are integral to the process. Option C is false-Cost Rollup reflects current costs, not fixed values, adapting to fluctuations like material price changes. This function supports accurate financial reporting, cost control, and strategic decision-making by revealing true production costs.

NEW QUESTION # 26

.....

Our company is thoroughly grounded in our values. They begin with a prized personal and organizational quality--Integrity--and end with a shared concern for the candidates who are preparing for the 1Z0-1163-1 exam. Our values include Innovation, Teamwork, Customer Focus, and Respect for Customers. These values guide every decision we make, everywhere we make them. As you can sense by now, and we really hope that you can be the next beneficiary of our 1Z0-1163-1 Training Materials.
