1z0-808 Exam Training Programs & 1z0-808 Latest Test Sample & 1z0-808 Valid Test Questions

We will continue to pursue our passion for better performance and human-centric technology of latest 1z0-808 quiz prep. And we guarantee you to pass the 1z0-808 exam for we have confidence to make it with our technological strength. A good deal of researches has been made to figure out how to help different kinds of candidates to get the 1z0-808 Certification. We have made classification to those faced with various difficulties, aiming at which we adopt corresponding methods. According to the statistics shown in the feedback chart, the general pass rate for latest 1z0-808 test prep is 98%.

The 1z1-808 certification exam is essential for professionals who want to pursue advanced Java certifications such as Oracle Certified Professional (OCP) or Oracle Certified Master (OCM). Java SE 8 Programmer I certification exam is a prerequisite for the OCP certification program, which focuses on advanced Java programming concepts such as concurrency, JDBC, and JPA. The OCM certification program is designed for professionals who want to demonstrate their expertise in Java development by completing advanced projects.

Oracle Java SE 8 Programmer I Sample Questions (Q313-Q318):

NEW QUESTION # 313

Given the code fragment:

```
LocalDate Time dt= LocalDateTime.of (2014, 7, 31, 1, 1);
dt.plusDays (30);
dt.plusMonths (1);
System.out.print (dt.format (DateTimeFormatter. ISO_DATE) );
```

What is the result?

- A. An exception is thrown at runtime.
- B. 07-31-2014
- C. 2014-09-30
- D. 2014-07-31

Answer: C

NEW QUESTION # 314

Given the code fragment:

```
int[] array = {1, 2, 3, 4, 5};
```

And given the requirements:

1. Process all the elements of the array in the order of entry.
2. Process all the elements of the array in the reverse order of entry.
3. Process alternating elements of the array in the order of entry.

Which two statements are true? (Choose two.)

- A. Requirement 1 can be implemented by using the enhanced for loop.
- B. Requirements 1, 2, and 3 can be implemented by using the enhanced for loop.
- C. Requirements 1, 2, and 3 can be implemented by using the standard for loop.
- D. Requirements 2 and 3 CANNOT be implemented by using the standard for loop.
- E. Requirement 3 CANNOT be implemented by using either the enhanced for loop or the standard for loop.

Answer: A,E

NEW QUESTION # 315

Given:

```
public class Test {
    public static void main(String[] args) {
        Test ts = new Test();
        System.out.print(isAvailable + " ");
        isAvailable= ts.doStuff();
        System.out.println(isAvailable);
    }
    public static boolean doStuff() {
        return isAvailable;
    }
    static boolean isAvailable = false;
}
```

What is the result?

- A. true true
- B. false false
- C. true false
- D. Compilation fails.
- E. false true

Answer: E

NEW QUESTION # 316

Given:

MainTest.java:

```
public class MainTest {  
    public static void main(int[] args) {  
        System.out.println("int main " + args[0]);  
    }  
    public static void main(Object[] args) {  
        System.out.println("Object main " + args[0]);  
    }  
    public static void main(String[] args) {  
        System.out.println("String main " + args[0]);  
    }  
}
```

and commands:

```
javac MainTest.java  
java MainTest 1 2 3
```

What is the result?

- A. Compilation fails
- B. An exception is thrown at runtime
- C. Object main 1
- D. int main 1
- E. String main 1

Answer: E

NEW QUESTION # 317

You are asked to develop a program for a shopping application, and you are given the following information:

- The application must contain the classes Toy, EduToy, and consToy.
- The Toy class is the superclass of the other two classes.
- The int calculatePrice (Toy t) method calculates the price of a toy.
- The void printToy (Toy t) method prints the details of a toy.

Which definition of the Toy class adds a valid layer of abstraction to the class hierarchy?

- ☐ A)

```
public abstract class Toy{  
    public abstract int calculatePrice(Toy t);  
    public void printToy(Toy t) { /* code goes here */ }  
}
```
- ☐ B)

```
public abstract class Toy {  
    public int calculatePrice(Toy t) ;  
    public void printToy(Toy t) ;  
}
```
- ☐ C)

```
public abstract class Toy {  
    public int calculatePrice(Toy t);  
    public final void printToy(Toy t){ /* code goes here */ }  
}
```
- ☐ D)

```
public abstract class Toy {  
    public abstract int calculatePrice(Toy t) { /* code goes here */ }  
    public abstract void printToy(Toy t) { /* code goes here */ }  
}
```

- A. Option C
- B. Option A
- C. Option B
- D. Option D

Answer: B
