300-710 Valid Test Forum - Effective 300-710 Dumps Free Download and Valid Latest Braindumps Securing Networks with Cisco Firepower Ebook

You can take the Securing Networks with Cisco Firepower 300-710 practice exam many times to analyze and overcome your weaknesses before the final Securing Networks with Cisco Firepower 300-710 exam. You will also improve your time management abilities by learning Securing Networks with Cisco Firepower in PDF4Test. 300-710 Practice Test software 365 days updated and reliable. You will not face any problems in the final 300-710 exam.

Earning the Cisco 300-710 certification validates an individual's skills and knowledge in implementing and troubleshooting Cisco Firepower NGFWs and FMCs. Securing Networks with Cisco Firepower certification is an essential requirement for network security professionals who want to enhance their careers and stay up-to-date with the latest network security technologies. By earning the Cisco 300-710 certification, candidates demonstrate their ability to design, implement, and troubleshoot advanced network security solutions using Cisco Firepower NGFWs and FMCs, which can help them stand out in the highly competitive network security field.

Cisco 300-710 (Securing Networks with Cisco Firepower) certification exam is designed to test the knowledge and skills of network security professionals who use Cisco Firepower Next-Generation Firewall (NGFW), web security, and email security appliances. 300-710 exam focuses on the deployment, configuration, and management of Cisco Firepower NGFW, including its

integration with other Cisco security solutions. Securing Networks with Cisco Firepower certification is intended for security engineers, network designers, and administrators who want to enhance their knowledge and skills in network security.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q225-Q230):

NEW QUESTION # 225

Which command is run on an FTD unit to associate the unit to an FMC manager that is at IP address 10.0.0.10, and that has the registration key Cisco123?

- A. configure manager add Cisco123 10.0.0.10
- **B. configure manager add 10.0.0.10 Cisco123**
- C. configure manager local 10.0.0.10 Cisco123
- D. configure manager local Cisco123 10.0.0.10

Answer: B

Explanation:

<https://www.cisco.com/c/en/us/support/docs/security/firepower-ngfw/215540-configure-verify-and-troubleshoot-firep.html>

NEW QUESTION # 226

A mid-sized company is experiencing higher network bandwidth utilization due to a recent acquisition. The network operations team is asked to scale up their one Cisco FTD appliance deployment to higher capacities due to the increased network bandwidth. Which design option should be used to accomplish this goal?

- A. Deploy multiple Cisco FTD HA pairs to increase performance
- B. Deploy multiple Cisco FTD HA pairs in clustering mode to increase performance
- C. Deploy multiple Cisco FTD appliances using VPN load-balancing to scale performance.
- **D. Deploy multiple Cisco FTD appliances in firewall clustering mode to increase performance.**

Answer: D

Explanation:

Reference:

https://www.cisco.com/c/en/us/td/docs/security/firepower/pxos/clustering/ftd-cluster-solution.html#concept_C8502505F840451C9E600F1EED9BC18E

NEW QUESTION # 227

Which action must be taken to configure an isolated bridge group for IRB mode on a Cisco Secure Firewall device?

- A. Remove the route from the routing table.
- B. Add the restricted segment to the ACL.
- **C. Leave BVI interface name empty.**
- D. Define the NAT pool for the blocked traffic.

Answer: C

Explanation:

To configure an isolated bridge group for Integrated Routing and Bridging (IRB) mode on a Cisco Secure Firewall device, the action to take is to leave the BVI (Bridge Virtual Interface) interface name empty. This ensures that the bridge group operates in an isolated manner, where Layer 3 routing is not applied to the bridged interfaces, effectively isolating the traffic within the bridge group.

Steps:

* Access the firewall's configuration interface.

* Configure the bridge group interfaces.

* Ensure that the BVI interface name is left empty to isolate the bridge group.

This configuration prevents Layer 3 routing for the isolated bridge group, ensuring that traffic remains contained within the bridge group.

References: Cisco Secure Firewall Management Center Configuration Guide, Chapter on Bridge Groups and IRB Mode.

NEW QUESTION # 228

With Cisco Firepower Threat Defense software, which interface mode must be configured to passively receive traffic that passes through the appliance?

- A. passive
- B. inline tap
- C. inline set
- D. routed

Answer: A

Explanation:

Reference:

https://www.cisco.com/c/en/us/td/docs/security/firepower/640/configuration/guide/fpmc-config-guide-v64/interface_overview_for_firepower_threat_defense.html

NEW QUESTION # 229

An organization is implementing Cisco FTD using transparent mode in the network. Which rule in the default Access Control Policy ensures that this deployment does not create a loop in the network?

- A. STP BPDU packets are allowed by default.
- B. Multicast and broadcast packets are denied by default.
- C. ARP inspection is enabled by default.
- D. ARP packets are allowed by default.

Answer: B

NEW QUESTION # 230

.....

we will provide you with the best Cisco 300-710 exam dumps. You can pass the Cisco 300-710 exam with high marks with the help of the Cisco 300-710 exam questions. These Cisco 300-710 exam practice questions are designed and verified by experienced and qualified 300-710 Exam Preparation trainers. They work together and put all their expertise and knowledge while verifying 300-710 exam questions all the time.
