

Valid 300-740 Test Notes, Braindumps 300-740 Torrent

P.S. Free 2025 Cisco 300-740 dumps are available on Google Drive shared by ITexamReview: https://drive.google.com/open?id=1SCqIYFD5QDolHO3KJkriD-fBTbl_Gq

Our 300-740 training materials are famous for high-quality, and we have a professional team to collect the first hand information for the exam. 300-740 learning materials of us also have high accuracy, since we have the professionals check the exam dumps at times. We are strict with the answers and quality, we can ensure you that the 300-740 Learning Materials you get are the latest one we have. Moreover, we offer you free update for one year and the update version for the 300-740 exam dumps will be sent to your email automatically.

Cisco 300-740 Exam Syllabus Topics:

Topic	Details
Topic 1	• User and Device Security: This section of the exam measures skills of Identity and Access Management Engineers and deals with authentication and access control for users and devices. It covers how to use identity certificates, enforce multifactor authentication, define endpoint posture policies, and configure single sign-on (SSO) and OIDC protocols. The section also includes the use of SAML to establish trust between devices and applications.

Topic 2	• SAFE Architectural Framework: This section of the exam measures skills of Security Architects and explains the Cisco SAFE framework, a structured model for building secure networks. It emphasizes the importance of aligning business goals with architectural decisions to enhance protection across the enterprise.
Topic 3	• Integrated Architecture Use Cases: This section of the exam measures the skills of Cloud Solution Architects and covers key capabilities within an integrated cloud security architecture. It focuses on ensuring common identity across platforms, setting multicloud policies, integrating secure access service edge (SASE), and implementing zero-trust network access models for more resilient cloud environments.
Topic 4	• Industry Security Frameworks: This section of the exam measures the skills of Cybersecurity Governance Professionals and introduces major industry frameworks such as NIST, CISA, and DISA. These frameworks guide best practices and compliance in designing secure systems and managing cloud environments responsibly.
Topic 5	• Cloud Security Architecture: This section of the exam measures the skills of Cloud Security Architects and covers the fundamental components of the Cisco Security Reference Architecture. It introduces the role of threat intelligence in identifying and mitigating risks, the use of security operations tools for monitoring and response, and the mechanisms of user and device protection. It also includes strategies for securing cloud and on-premise networks, as well as safeguarding applications, workloads, and data across environments.
Topic 6	• Threat Response: This section of the exam measures skills of Incident Response Engineers and focuses on responding to threats through automation and data analysis. It covers how to act based on telemetry and audit reports, manage user or application compromises, and implement response steps such as containment, reporting, remediation, and reinstating services securely.
Topic 7	• SAFE Key Structure: This section of the exam measures skills of Network Security Designers and focuses on the SAFE framework's key structural elements. It includes understanding 'Places in the Network'—the different network zones—and defining 'Secure Domains' to organize security policy implementation effectively.

2025 Professional 100% Free 300-740 – 100% Free Valid Test Notes | Braindumps Designing and Implementing Secure Cloud Access for Users and Endpoints Torrent

You can download the trial version of our 300-740 learning material for free. After using the trial version of our 300-740 study materials, I believe you will have a deeper understanding of the advantages of our 300-740 training engine. The development of society urges us to advance and use our 300-740 Study Materials to make us progress faster and become the leader of this era. The best you need is the best exam preparation materials. Our 300-740 exam simulation will accompany you to a better future.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q18-Q23):

NEW QUESTION # 18

Analyzing application dependencies is crucial for:

- A. Decreasing application performance deliberately
- **B. Identifying potential security risks and ensuring proper access controls are in place**
- C. Complicating application development and deployment
- D. Increasing the time needed for security compliance checks

Answer: B

NEW QUESTION # 19

Determine cloud platform security policies based on application connectivity requirements might involve:

- A. Configuring firewalls and access lists
- B. Selecting appropriate cloud service models (IaaS, PaaS, SaaS)
- C. Avoiding the use of security groups and ACLs
- D. Implementing network peering

Answer: A,B,D

NEW QUESTION # 20

Which of the following best describes multifactor authentication (MFA)?

- A. Authentication that relies solely on biometrics
- B. Authentication that requires two or more verification factors
- C. Authentication that requires only a user name
- D. Authentication using a single factor like a password

Answer: B

NEW QUESTION # 21

An engineer is configuring multifactor authentication using Duo. The implementation must use Duo Authentication Proxy and the Active Directory as an identity source. The company uses Azure and a local Active Directory. Which configuration is needed to meet the requirement?

- A. Configure the Identity Source as "SAML" on the Single Sign-On tab in the Duo Admin Panel, and configure the forwarding proxy as "local" for the Identity Source.
- B. Configure the Identity Source as "Active Directory" on the Single Sign-On tab, and configure the authentication proxy with the "[sso]" section.
- C. Configure the Identity Source as "Active Directory" on the Single Sign-On tab in the Duo Admin Panel, and configure the permit list to "Local database".
- D. Configure the Identity Source as "SAML" on the Single Sign-On tab, and configure the authentication proxy with the "[cloud]" section.

Answer: B

Explanation:

When integrating Duo Authentication Proxy with Active Directory for multifactor authentication (MFA), you must: Configure the Identity Source in the Duo Admin Panel as Active Directory (not SAML), since it's using the Authentication Proxy. Configure the authentication proxy settings in the [sso] section to communicate with both AD and the Duo cloud.

This setup allows Active Directory to be the primary identity store while Duo provides the second authentication factor.

User and Device Security, Pages 40-45

NEW QUESTION # 22

For enforcing application policy at the network security edge, which of the following are critical?

- A. Integrating endpoint security for comprehensive network protection
- B. Ignoring encrypted traffic as it is considered secure
- C. Enforcing uniform policies without considering individual application requirements
- D. Implementing dynamic security policies based on application behavior and user context

Answer: A,D

NEW QUESTION # 23

.....

If you want to own a better and bright development in the IT your IT career, it is the only way for you to pass 300-740 exam. Don't complain how difficult the 300-740 exam is. Because our ITexamReview experienced technicians have provided efficient way for you to easily get 300-740 Exam Certification. We constantly update test simulation software in order to help you who are preparing for 300-740 exam by efforts to get the satisfactory results.
