300-835 Exam Questions and Automating and Programming Cisco Collaboration Solutions Torrent Prep - 300-835 Test Guide

Dear customers, you may think it is out of your league before such as winning the 300-835 exam practice is possible within a week or a 300-835 practice material could have passing rate over 98 percent. This time it will not be illusions for you anymore. You can learn some authentic knowledge with our high accuracy and efficiency 300-835 simulating questions and help you get authentic knowledge of the exam.

Cisco Automating and Programming Cisco Collaboration Solutions Sample Questions (Q108-Q113):

NEW QUESTION # 108

In order for Cisco Unified Presence to show the presence status of an IP phone, which two configuration steps must be completed in the Cisco Unified Communications Manager server?

(Choose two.)

- A. Check the Allow Presence Status check box.
- B. Enable Cisco Unified Personal Communicator Status flag.
- C. Associate the directory number with the user.
- D. Associate the end device with the user.
- E. Allow the SIP publish trunk to forward presence status messages.

Answer: C,D

NEW QUESTION # 109

Using the Finesse REST APIs coupled with the Finesse notifications, which two use cases can be accomplished? (Choose two.)

- A. Add video calling capabilities to an existing application such as a CRM.

- B. Develop a fully functioning custom agent desktop for chat, email, and SMS interactions including the content of the chat, email, and SMS.
- C. Develop a fully functioning custom agent desktop that has call control, workflows, and client logging.
- D. Develop a secure monitoring application that captures the agent's states and dialog information of every agent in the contact center system.
- E. Add outbound call capabilities to an existing application such as a CRM.

Answer: B,E

NEW QUESTION # 110

Refer to the exhibit.

```

1 POST /WBXService/XMLService/LstsummaryUser HTTP/1.1
2 Content-Type: application/xml
3 Host: api.webex.com
4 Content-Length: 974
5
6 <?xml version="1.0" encoding="UTF-8"?>2 <serv:message xmlns:serv="http://www.webex.com/schemas/2002/06/service"
7   xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
8   <header>
9     <securityContext>
10       <siteName>apidemoeu</siteName>
11       <webExID>janedoe@example.com</webExID>
12       <sessionTicket>AAABb5LTcGcAABUYA0gAKEgyU</sessionTicket>
13     </securityContext>
14     <action>java:com.webex.service.binding.meeting.LstsummaryUser</action>
15   </header>
16   <body>
17     <method>java:com.webex.service.binding.meeting.LstsummaryUser</method>
18     <bodyContent xsi:type="java:com.webex.service.binding.meeting.LstsummaryUser">
19       <webExId>{{WEBEXID}}</webExId>
20     </bodyContent>
21   </body>
22 </serv:message>

```

A Webex Meetings XML API HTTP request message with several invalid portions is shown. Which reference points to a line in the exhibit that correctly indicates that this is a LstsummaryUser request?

- A. line 1
- B. line 17
- C. line 14
- D. line 18

Answer: A

NEW QUESTION # 111

Drag and Drop Question

Refer to the exhibit. Drag and drop the code snippets from the bottom onto the blanks in the code to construct a Python script that creates a webhook to notify the administrator when a message is deleted from a group Webex room. Not all options are used.

webexTeamsAPI	access_tokens	get() refresh()
	admin_audit_events	list()
	attachment_actions	create() get()
	events	list() get()
	guest_issuer	create()
	licenses	list() create()
	memberships	list() create() get() update() delete()
	messages	list() list_direct() create() get() delete()
	organizations	list() create()
	people	list() create() get() update() me()
	roles	list() create()
	rooms	list() create() get() get_meeting_info() update() delete()
	team_memberships	list() create() get() update() delete()
	teams	list() create() get() update() delete()
	webhooks	list() create() get() update() delete()

create(name, targetUrl, resource, event, filter=None, secret=None, **request_parameters) [\[source\]](#)

Create a webhook.

- Parameters:**
- **name** (basestring) – A user-friendly name for this Webhook.
 - **targetUrl** (basestring) – The URL that receives POST requests for each event.
 - **resource** (basestring) – The resource type for the webhook.
 - **event** (basestring) – The event type for the webhook.
 - **filter** (basestring) – The filter that defines the webhook scope.
 - **secret** (basestring) – The secret used to generate payload signature.
 - ****request_parameters** – Additional request parameters (provides support for parameters that may be added in the future).

Returns: A Webhook object with the details of the created webhook.

Return type: Webhook

- Raises:**
- **TypeError** – If the parameter types are incorrect.
 - **ApiError** – If the Webex Teams cloud returns an error.

Answer Area

```
from webxteamsdk import WebxTeamsAPI
Url = 'https://example.com/mywebhook'
Token = 'your_access_token'
api = WebxTeamsAPI(access_token=Token)
```

```
    (
```

```
        name="My Webhook",
        targetUrl=Url,
```

```
        filter="roomId=group",
```

```
        resource="messages",
```

```
        event="deleted"
```

```
)
```

filter="roomId=group"

api.webhooks.create

filter="roomType=group"

resource="memberships"

resource="messages"

event="deleted"

Answer:

Explanation:

Answer Area

```
from webxteamssdk import WebexTeamsAPI
Url = 'https://example.com/mywebhook'
Token = 'your_access_token'
api = WebexTeamsAPI(access_token=Token)

api.webhooks.create(
    name="My Webhook",
    targetUrl=Url,
    resource="messages",
    event="deleted",
    filter="roomId=group"
)
```

filter="roomType=group"

resource="memberships"

Explanation:

api.webhooks.create is the correct method to invoke based on the WebexTeamsAPI SDK (shown in image 1). To monitor deleted messages, you use event="deleted" (specifies the type of event (a message being deleted).) and resource="messages" (specifies the resource the webhook listens to (messages in this case)). The filter roomId=group filters events for a specific space (by its ID) - e.g., the CLAUTONOC room.

NEW QUESTION # 112

Refer to the exhibit. Which snippet of code does a user with the administrator role use in the missing "body" section to create a new user in a Webex Teams organization?

```
import requests

def createUser(apiKey, email, firstName, lastName, displayName):
    url = "https://api.ciscospark.com/v1/people"
    headers = {
        'Authorization': "Bearer " + apiKey,
        'Content-Type': "application/json"
    }
    body = {
        # Missing body content
    }
    response = requests.post(url = url, headers = headers, json=body)
    return response
```

• A.

```
"displayName": displayName,
"firstName": firstName,
"lastName": lastName
```

• B.

```
"emails": [
    email
],
"displayName": displayName,
"firstName": firstName,
"lastName": lastName
```

- ```

"emails": [
 email
],
"displayname": displayName,
"firstName": firstName,
"lastName": lastName

```
- C. 
  - D.

Answer: D

## NEW QUESTION # 113

.....

The Cisco 300-835 certification exam offers a great opportunity for Cisco professionals to demonstrate their expertise and knowledge level. In return, they can become competitive and updated with the latest technologies and trends. To do this they just need to enroll in Automating and Programming Cisco Collaboration Solutions (300-835) certification exam and have to put all efforts and resources to pass this challenging 300-835 exam. You should also keep in mind that to get success in the Cisco 300-835 exam is not an easy task.
