Questions remain unsuccessful in the Analytics-DA-201 test and lose their resources. That's why iPassleader is offering real Salesforce Analytics-DA-201 Questions that are real and can save you from wasting time and money. Hundreds of applicants have studied successfully from our Analytics-DA-201 latest questions in one go. We have launched our Analytics-DA-201 Practice Test after consulting with experts who have years of experience in this field. People who have used our Analytics-DA-201 exam preparation material rated it as the best option to study for the Analytics-DA-201 exam in a short time.

Salesforce Analytics-DA-201 Exam Syllabus Topics:

Topic	Details
Topic 1	• Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S • 4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices.
Topic 2	• ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.
Topic 3	• ABAP Core Data Services and Data Modeling: This section of the exam measures the skills of the SAP ABAP Cloud Developer and covers the fundamental understanding of core data services (CDS) and how to design data models in the SAP ABAP environment. Candidates are expected to know how to define, consume, and optimize CDS views effectively to support application development in the cloud.

Analytics-DA-201 Exam Questions Pdf | Analytics-DA-201 Discount

Salesforce Certified Tableau Data Analyst (Analytics-DA-201) Practice exams (desktop and web-based) are designed solely to help you get your Salesforce Certified Tableau Data Analyst (Analytics-DA-201) certification on your first try. Our Salesforce Analytics-DA-201 mock test will help you understand the Salesforce Certified Tableau Data Analyst (Analytics-DA-201) exam inside out and you will get better marks overall. It is only because you have practical experience of the Salesforce Certified Tableau Data Analyst (Analytics-DA-201) exam even before the exam itself.

Salesforce Certified Tableau Data Analyst Sample Questions (Q49-Q54):

NEW QUESTION # 49

Open the Link to Book1 found on the desktop. Open Map worksheet and use Superstore data source.

Create a filled map to show the distribution of total Sales by State across the United States.

Answer:

Explanation:

check the steps below in explanation.

Explanation:

To create a filled map to show the distribution of total Sales by State across the United States, you need to do the following steps:

- * Open the link to Book1 found on the desktop. This will open the Tableau workbook that uses the Superstore data source.
- * Click on the Map tab at the bottom of the workbook to open the Map worksheet. You will see a blank worksheet with no marks.
- * Drag State from the Dimensions pane to Detail on the Marks card. This will create a map that shows each state as a mark. You may need to zoom in or out to see the whole map.
- * Drag Sales from the Measures pane to Color on the Marks card. This will create a filled map that shows the distribution of total Sales by State across the United States. The color legend will show you the range of values and colors for Sales.
- * Optionally, you can adjust the color scheme, transparency, size, and borders of the marks by clicking on the Color menu on the Marks card. You can also add labels, tooltips, or filters to enhance your map.

NEW QUESTION # 50

You have a database that includes field named sales, City and Region.

You have the following chart that shows the number of sales made in different cities.

You want to dynamically show the corresponding region when users hover their mouse over any of the bars.

What should you do?

- **A. Drag Region to Tooltip on the Marks card**
- B. Right-click a bar in the chart select Mark Label and then select Always show.
- C. Edit the aliases for City.
- D. Right-click a in the chat, select Annotate and then select Mark.

Answer: A

Explanation:

To show the corresponding region when users hover their mouse over any of the bars, you need to drag Region to Tooltip on the Marks card. This will add Region as a field in the tooltip text that appears when users hover over a mark. You can also customize the tooltip text by editing it in the Tooltip dialog box.

References: https://help.tableau.com/current/pro/desktop/en-us/buildmanual_shelves.htm

https://help.tableau.com/current/pro/desktop/en-us/formatting_tooltips.htm To show additional information such as the corresponding region when hovering over a bar in Tableau, you can drag the 'Region' field to the 'Tooltip' shelf on the 'Marks' card. This will ensure that when a user hovers over a bar representing a city, the tooltip will dynamically display the region associated with that city.

NEW QUESTION # 51

The following table displays the row-level data in a Tableau data source:

Order ID	Item	Sales
1	A	10
1	C	10
2	B	15
3	D	40
4	D	10

A Data Analyst creates this calculated field:

$$\text{SUM}(\text{IF [Item] = 'A' THEN [Sales] END}) / \text{COUNT}([\text{Order ID}])$$

What is the result of this aggregate calculation?

- **A. 0**
- B. 1
- C. 2
- D. An error

Answer: A

NEW QUESTION # 52

You have the following worksheet.

State	2018	2019	2020	2021
Alabama	6,139	10,031	17,682	19,511
Arizona	8,295	17,906	24,148	35,282
Arkansas	6,303	6,746	8,970	11,678
California	91,304	179,747	311,299	457,688
Colorado	6,502	11,142	21,808	32,108
Connecticut	2,784	4,079	8,077	13,894
Delaware	4,786	10,976	13,696	27,451
District of Columbia		2,670	2,787	2,865
Florida	34,248	49,426	63,029	49,096
Georgia	4,540	15,878	29,936	4,382
Idaho	465	1,965	3,149	90,166
Illinois	16,203	34,781	55,814	53,555
Indiana	2,937	9,577	35,039	4,580
Iowa	1,191	2,904	3,863	2,914
Kansas	1,231	1,291	2,181	2,914

You want to create a table calculation that shows sales growth over each year.

How should you complete the formula? (Use the dropdowns in the Answer Area to select the correct options to complete the formula.)

Answer:

Explanation:

Explanation:

There are different ways to create a table calculation that shows sales growth over each year, but one possible answer is:

- * SUM([Sales])
- * LOOKUP(SUM([Sales]), -1)
- * PREVIOUS_VALUE(0)

To calculate the sales growth over each year, you need to compare the current year's sales with the previous year's sales and divide the difference by the previous year's sales. You can use the SUM, LOOKUP, and PREVIOUS_VALUE functions to achieve this. The SUM function returns the total sales for each year. The LOOKUP function returns the value of an expression in a target row, specified as a relative offset from the current row. The PREVIOUS_VALUE function returns the value of the expression in the previous row, or a specified value if there is no previous row. The formula for the table calculation is:

$(\text{SUM}([Sales]) - \text{LOOKUP}(\text{SUM}([Sales]), -1)) / \text{PREVIOUS_VALUE}(0)$

This formula subtracts the sales of the previous year (LOOKUP(SUM([Sales]), -1)) from the sales of the current year (SUM([Sales])) and divides the result by the sales of the previous year. If there is no previous year, the formula uses 0 as the denominator (PREVIOUS_VALUE(0)) to avoid division by zero errors.

Tableau Help: LOOKUP Function Tableau Help: PREVIOUS_VALUE Function

NEW QUESTION # 53

You have the following dataset.

Which Level of Detail (LOD) expression should you use to calculate the grand total of all the regions?

- A. {FIXED: [Region] SUM Sales}
- B. {FIXED: TOTAL (Sales)}
- C. {FIXED: SUM Sales}
- D. {Fixed: [Region]: TOTAL Sales}

Answer: C

Explanation:

The correct Level of Detail (LOD) expression to calculate the grand total of sales across all regions would be {SUM(Sales)}. The FIXED expression is not needed here because we are not computing the sum at the level of each region, but rather the total sum across all regions. The FIXED keyword is typically used to aggregate at a certain level regardless of the view. https://help.tableau.com/current/pro/desktop/en-us/functions_functions_tablecalculation.htm#TOTAL

NEW QUESTION # 54

• • • • •

We stipulate the quality and accuracy of Analytics-DA-201 exam questions every year for your prospective dream. And our experts team keep close eyes on the upfront message that can help you deal with the new question points emerging during your simulation exercise of Analytics-DA-201 practice materials. So instead of being seduced by the prospect of financial reward solely, we consider more to the interest and favor of our customers. By our customers' high praise, we will do better on our Analytics-DA-201 exam braindumps!
